FARM COST ACCOUNTS
50 Farms -- 1947

New York State College of Agriculture
Department of Agricultural Economics
Ithaca, New York
December, 1948

ACKNOWLEDGEMENTS

This report was prepared by the cost accounts staff consisting of: Helen Smith, Marjorie Evans, Evalyn Skirpan, Onolee Stapley, and Norma Foster. Additional assistance was received from Grace Bush, Oneta Shipe, Ruth Weaver, Malfisa Paolangeli, Joan Yengo, and Edith Lapham.

The work was done under the supervision of A. J. Ashe and C. DelMar Kearl.

FOREWORD

Each farm enterprise is tabulated separately in this report. The enterprises are arranged according to size; for example, the farm with the largest number of cows is shown first on page 10, and the farm with the largest number of hens is first on page 13.

Enterprises with 12 or more farms have been divided into three equal groups according to the size of the enterprises: Largest, medium sized, and smallest.

The averages for each of these groups, shown near the bottom of the following pages, are weighted by farms; that is, each farm is given equal weight in the calculation of the averages. For example, on page 10, the value per cow for the high third was \$173, the average of the 9 figures representing the value per cow on the 9 farms in the group.

The annual averages are weighted by animals or acres rather than by farms. The average value per cow for 1947 of \$172 is the sum of the value of all cows, \$238,669, divided by 1,384, the total number of cows.

* The figures indicate the size of each tractor in terms of the number of plow shares usually pulled. Of the 94 tractors, 10 were one-plow, 57 two-plow, and 27 three-plow. Farms 130, 146, 165, 170, 171, 174, 186, 192, 211, 267, 288, 310, 324, 331, 339, 362, 366, 368, 375, 377, 378, 379, 382 had more than one tractor, but the cost records were not separated by machines. Farms 188, 200, 315, 316, 340, 344, 359, 371, 376, 383 had two or three tractors but had separate accounts for each tractor.

* Mileage unknown

** Based on 45 trucks with known mileage

*** The letters in the second column indicate the size of the truck. S = 1 ton or smaller. L = 1½ ton or larger.

Six farms had 1 account for 2 or more trucks. Five farms had 2 trucks with a separate account for each truck. Two farms had 3 trucks with a separate account for each truck. Two farms had 3 trucks with a separate account for each truck. The 16 small trucks with know mileage were driven an average of 6,624 miles at a cost of \$439 or 6.6 cents per mile. The 29 large trucks were driven 3,370 miles at a cost of \$478 or 14.2 cents per mile.
