## DAIRY FARM BUSINESS SUMMARY Western Plateau Region

### INTRODUCTION

This report is part of your Cooperative Extension Farm Business Management Program. Each year dairy farmers throughout New York State submit business records for summarization and analysis. In addition to this publication, each participating farmer receives an individual farm summary and analysis report for his or her business. The information in this publication is compiled by combining and averaging data submitted by the participating farmers from the Northern New York Region.

#### Program Objectives

Primary objectives of the dairy farm business management program are to (1) assist farmers in developing and maintaining more complete farm business data for use in management decisions and (2) help farmers improve their management skills through appropriate use of farm record data and application of modern decision-making techniques. This report is prepared in work-book form for use in the systematic study of individual farm business performance.

The need for a thorough dairy farm business examination and follow-up plan is greater than ever. The years immediately ahead will bring continued economic pressures on dairy farmers. We must continue to place emphasis on cost control and improvements in operating efficiency to maintain adequate farm incomes. Projecting cash flows, planning for future needs, and recognizing how those needs can be met will be required to survive the current dairy farm financial crisis.

#### New Developments

This year, several farm management agents and specialists are participating in a Dairy Farm Business Summary Pilot Program. Cooperative Extension Associations with appropriate microcomputers, have the capability to strengthen their dairy farm business analysis activities by calculating and printing the individual farm summary and analysis reports for immediate use by the agent and farmer, at any time. After the individual farm data is entered in the county office using the Micro DFBS computer program, it is sent to the Department of Agricultural Economics at Cornell University for additional review prior to transfer to a mainframe computer program for calculation of regional and state summaries.

Fourteen dairy farmers participating in the milk diversion program are included in this report. Since this is a relatively small number, the data from these farms has not been summarized separately. A separate summary and analysis of milk diversion program farms will be included in the 1984 New York State Dairy Farm Business Summary.

This summary was prepared by George L. Casler and Linda D. Putnam, Department of Agricultural Economics, New York State College of Agriculture and Life Sciences, Cornell University, in cooperation with Cooperative Extension Agents Lee Brumback, Andrew Dufresne, Davis Hill, and Joan Petzen. The Western Plateau Region is comprised of Allegany, Cattaraugus, Chautauqua, and Steuben Counties.

## SUMMARY OF THE FARM BUSINESS

Business Characteristics

Finding the right combination of resources and management strategies is an important part of farming. The tables below show important farm business characteristics, the number of farms reporting these characteristics, and the average level of resources used in production.

MANAGEMENT SYSTEMS, PRODUCTION TECHNOLOGY AND FARM SIZE  
76 Western Plateau Region Dairy Farms, 1984

Type of Business	Number	Business Records	Number	Dairy Records	Number
Proprietorship	64	CAMIS	8	D.H.I.C.	48
Partnership	12	Account Book	35	Owner Sampler	9
Corporation	0	Agrifax	12	Other	2
		Farm Bureau	2	None	17
Owner	68	Agway	7		
Renter	8	On-Farm Computer	4		
		Other	8		
Barn Type	Number	Milking System	Number		Number
Stanchion	51	Bucket & Carry	1	Herringbone	21
Freestall	24	Dumping Station	17	Other Parlor	4
Other	1	Pipeline	33		
Labor Force	My Farm	Average	Land Use	My Farm	Average
Operator 1.	_____	mo. 12	Total acres owned	_____	327
2.	_____	mo. 2	Total acres rented	_____	116
3.	_____	mo. <1	Total tillable acres	_____	242
Family paid	_____	mo. 5	Tillable acres rented	_____	88
Family unpaid	_____	mo. 4			
Hired	_____	mo. 9	Number of Cows	My Farm	Average
Total	_____	mo. 32	Beginning of		
Age of operator(s) 1.	_____	yrs. 43	year (owned)	_____	72
2.	_____	yrs. 35	End of year (owned)	_____	71
3.	_____	yrs. 25	Avg. for year (all)	_____	70

Capital Investment-Farm Inventory represents the market value of resources committed to the farm business at the beginning and end of the year. Increases in inventory occur with herd expansion, new machinery, and building additions and appreciation of land, buildings and livestock.

CAPITAL INVESTMENT - FARM INVENTORY  
76 Western Plateau Region Dairy Farms, 1984

Item	My Farm		Average	
	1/1/84	1/1/85	1/1/84	1/1/85
Livestock	\$ _____	\$ _____	\$ 91,117	\$ 88,680
Feed & supplies	_____	_____	27,779	27,991
Machinery & equipment	_____	_____	69,858	70,161
Land & buildings	_____	_____	179,608	181,062
TOTAL	\$ _____	\$ _____	\$368,362	\$367,894

Inventory Accounting

The value of the dairy herd is influenced by market prices, herd quality and quantity. Changes in market value caused by inflationary or deflationary price changes, are separated from changes in inventory caused by changes in herd quality and quantity.

CHANGE IN LIVESTOCK INVENTORY  
76 Western Plateau Region Dairy Farms, 1984

Item	My Farm	Average
End of year market value	\$ _____	\$ 88,680
less end at beginning prices	- _____	- 91,875
Change due to price	\$ _____	\$-3,195
End inventory at beginning prices	\$ _____	\$ 91,875
less beginning of year inventory	- _____	- 91,117
Change due to quality & quantity	\$ _____	\$ 758

Machinery and real estate inventories, based on current market values, include a depreciation charge and are balanced by the residual called appreciation.

MACHINERY AND EQUIPMENT INVENTORY  
76 Western Plateau Region Dairy Farms, 1984

Item	My Farm	Average
End of year market value	(1)\$ _____	\$70,161
Beginning market value	\$ _____	\$ 69,858
Plus machinery purchased	+ _____	+ 9,268
Less machinery sold	- _____	- 259
Less depreciation	- _____	-12,880
Net end investment	(2)\$ _____	\$65,987
APPRECIATION (1 minus 2)	\$ _____	\$ 4,174

The change in real estate value is affected by market forces, building depreciation, and lost capital which is the portion of a new building investment that is not reflected in the value of the farm.

REAL ESTATE INVENTORY CALCULATIONS  
76 Western Plateau Region Dairy Farms, 1984

Item	My Farm	Average
End of year market value	(1)\$ _____	\$181,062
Beginning market value	\$ _____	\$179,608
Cost of new real estate	\$ _____	\$ 4,400
Less lost capital	- _____	-1,019
Value of new added	+ _____	+ 3,381
Less building depreciation	- _____	- 5,135
Less real estate sold	- _____	- 151
Net end investment	(2)\$ _____	\$177,703
APPRECIATION (1 minus 2)	\$ _____	\$ 3,359

## Receipts

Receipts from the business should be large enough to cover all expenses and leave a reasonable return for the operator's labor and management. Cash receipts occur when farm products and livestock are sold or services are performed and payment is received during the year. Noncash receipts do not result from sales, but are due to appreciation in value or increases in physical quantities of inventories that occurred during the year. Most of these items could be readily transformed into cash.

### FARM RECEIPTS 76 Western Plateau Region Dairy Farms, 1984

Item	My Farm	Per Farm	Per Cow
<b>CASH RECEIPTS</b>			
Milk sales	\$ _____	\$138,473	\$1,978
Crop sales	_____	1,759	25
Dairy cattle sold	_____	10,070	144
Calves & other livestock sales	_____	2,381	34
Gas tax refunds	_____	170	2
Government payments	_____	3,607	52
Custom machine work	_____	477	7
Other	_____	3,983	57
Total Cash Receipts	\$ _____	\$160,920	\$2,299
<b>NONCASH RECEIPTS</b>			
Increase in livestock inventory <sup>1</sup>	_____	758	11
Increase in feed & supplies	_____	212	3
<b>TOTAL FARM RECEIPTS EXCLUDING APPRECIATION</b>			
	\$ _____	\$161,890	\$2,313
Livestock appreciation <sup>2</sup>	_____	- 3,195	- 46
Machinery appreciation <sup>3</sup>	_____	4,174	60
Real estate appreciation <sup>3</sup>	_____	3,359	48
<b>TOTAL FARM RECEIPTS</b>		<b>\$166,228</b>	<b>\$2,375</b>

<sup>1</sup>The increase in herd market value attributed to a change in numbers and/or a definite change in herd quality.

<sup>2</sup>The increase in herd market value, caused by inflationary price increase.

<sup>3</sup>Defined on page 3.

Income Analysis provides a means of examining the annual receipt producing capability of the farm business.

### INCOME ANALYSIS Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Average price/cwt. milk sold	\$ _____	\$13.25	\$13.25
Milk and cattle sales per cow	_____	\$2,156	\$2,141

Interest on equity capital @ 5%	_____	12,716	182
TOTAL FARM EXPENSES	\$ _____	\$163,554	\$2,336

### Farm Business Profitability

The results of management are reflected in the net return from the business. Four common ways to measure the returns from a farm business are calculated.

Net cash farm income reflects the cash available from the year's operation of the business. Family living has first claim on cash income followed by fixed payments on debts. A family may have additional cash available if they have nonfarm income. Cash flow is not a good measure of farm business profits, but it is useful when planning debt repayment programs. Guidelines for annual cash flow planning are presented on page 9. Monthly cash flow planning is also recommended and may be required in order to identify cash flow problems in the year ahead. This is particularly true when major changes in the business are planned or when the price of important factors such as milk or purchased grain are expected to change significantly.

#### NET CASH FARM INCOME Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Cash Farm Receipts	\$ _____	\$160,920	\$168,346
Cash Farm Expenses	_____	<u>130,146</u>	<u>134,534</u>
NET CASH FARM INCOME	\$ _____	\$ 30,774	\$ 33,812

Labor and management income is the return to the operator for his or her labor and management input into the business. A five percent charge for the use of the operator's equity capital in the business has been included as a farm expense. This interest charge reflects the long term average rate of return that a farmer might expect to earn in investments with comparable risk to farm businesses in an economy with little or no inflation. Labor and management income is the measure used most commonly when comparing farm businesses. Appreciation in livestock, machinery and real estate inventories is included as ownership income, not return to operator labor and management.

#### LABOR AND MANAGEMENT INCOME Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Total farm receipts excluding appreciation	\$ _____	\$161,890	\$172,639
Total farm expenses	_____	<u>163,554</u>	<u>168,443</u>
LABOR & MANAGEMENT INCOME	\$ _____	\$ -1,664	\$ 4,196
Full-time operator-manager equivalents	_____	1.18	1.17
LABOR & MANAGEMENT INCOME PER OPERATOR-MANAGER	\$ _____	\$ -1,410	\$ 3,586

Labor, management and ownership income per operator reflects the combined return to the farmer for his or her triple role of worker-manager, financier and owner. Again, this is not a measure of the cash flow situation of the farm business. A satisfactory labor, management and ownership income does not eliminate cash flow problems if liabilities are large and repayment is rapid.

LABOR, MANAGEMENT AND OWNERSHIP INCOME  
Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Total farm receipts	\$ _____	\$166,228	\$165,749
Total farm expenses excluding interest on equity capital	_____	<u>150,838</u>	<u>154,901</u>
LABOR, MANAGEMENT AND OWNERSHIP INCOME PER FARM	\$ _____	\$ 15,390	\$ 10,848
Full-time operator-manager equivalents	_____	1.18	1.17
LABOR, MANAGEMENT AND OWNERSHIP INCOME PER OPERATOR-MANAGER	\$ _____	\$ 13,042	\$ 9,272

Return on equity capital measures the net profit remaining for the farmer's owned or equity capital after earnings have been allocated to the owner-operator's labor and management. The earnings or amount of gross profit allocated to labor and management is the opportunity cost or value of operator's labor and management estimated by the cooperators. Return on equity capital is computed including and excluding appreciation.

RETURN ON EQUITY CAPITAL  
Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Labor, management & ownership income per farm	\$ _____	\$15,390	\$10,848
Less value of operator's labor & management	_____	<u>19,056</u>	<u>18,292</u>
Return on equity capital	\$ _____	\$-3,666	\$-7,444
RATE OF RETURN INCLUDING APPRECIATION _____%		-1.4%	-2.7%
RATE OF RETURN EXCLUDING APPRECIATION _____%		-3.1%	-0.2%

The rate of return on equity capital is computed as the amount returned divided by farm net worth or equity capital.

Farm Family Financial Situation

The financial situation is an important part of the farm business summary. It has a direct affect on current cash outflow and future capital investment decisions. Financial lease obligations are included in the balance sheet. The present value of all future payments is listed as a liability since the farmer is committed to make the payments. The present values are also listed as assets, representing the future value the item has to the business.

FARM FAMILY NET WORTH  
76 Western Plateau Region Dairy Farms, January 1, 1985

Item	My Farm	Average
<u>Assets</u>		
Livestock	\$ _____	\$ 88,680
Feed and supplies	_____	27,991
Machinery and equipment	_____	71,069
(includes discounted lease payments)*		(908)
Land and buildings	_____	182,623
(includes discounted lease payments)*		(1,561)
Co-op investments	_____	3,275
Accounts receivable	_____	12,145
Cash and checking accounts	_____	1,866
Total Farm Assets	\$ _____	\$387,649
Savings accounts	\$ _____	\$ 1,622
Cash value life insurance	_____	3,084
Stocks and bonds	_____	2,721
Nonfarm real estate	_____	3,611
Auto (personal share)	_____	2,057
All Other	_____	7,058
TOTAL FARM & NONFARM ASSETS	\$ _____	\$407,802
<u>Liabilities</u>		
Long term	\$ _____	\$ 66,384
Intermediate	_____	55,606
Financial lease*	_____	2,469
Short term	_____	2,962
Other farm accounts	_____	5,918
Total Farm Liabilities	\$ _____	\$133,339
Nonfarm Liabilities	_____	153
TOTAL LIABILITIES	\$ _____	\$133,492
FARM NET WORTH (EQUITY CAPITAL)	\$ _____	\$254,310
FAMILY NET WORTH	\$ _____	\$274,310

\*Future payments were discounted at an annual rate of 13 percent.

Payment ability is the most important consideration in determining if and how proposed investments should be financed. The farm business must produce sufficient cash income to meet operating expenses, to cover family living expenses and to make payments on debts. Interest paid and income from off-farm work are added to net cash farm income because planned debt payments will include interest as well as principal. Estimate your family living expenses to calculate cash available for debt payments and capital purchases made in cash.

A cash flow coverage ratio of less than one indicates that planned cash outflows exceed cash availability determined from 1984 records.

FARM FAMILY DEBT REPAYMENT  
76 Western Plateau Region Dairy Farms, January 1, 1985

Item	My Farm	Average
<u>Payment Ability</u>		
Net cash farm income	\$ _____	\$30,774
Plus interest paid	_____	12,500
Plus off-farm income	_____	2,243
CASH AVAILABLE FOR DEBT SERVICE AND LIVING	\$ _____	\$45,517
Less family living expenses <sup>1</sup>	_____	19,298
CASH AVAILABLE FOR DEBT PAYMENTS AND CAPITAL PURCHASES	\$ _____	\$26,219
<u>Scheduled Annual Debt Payments</u>		
Long term	\$ _____	\$10,407
Intermediate	_____	16,201
Short term	_____	3,151
Other farm accounts	_____	2,449
TOTAL FARM DEBT PAYMENTS	\$ _____	\$32,208
Nonfarm debt payments	_____	93
TOTAL PAYMENTS PLANNED 1985	\$ _____	\$32,301
CASH FLOW COVERAGE RATIO <sup>2</sup>	_____	0.81
<u>Commitment and Measures of Debt Equity Position</u>		
Farm debt payments planned per cow	\$ _____	\$454
Farm debt payments as % milk sales	_____ %	23%
Farm debt/asset ratio-long term	_____	0.36
Farm debt/asset ratio-intermediate and short term	_____	0.30
Farm debt per cow	\$ _____	\$1,878
Percent equity (total)	_____ %	67%

<sup>1</sup>Estimated as \$10,900 per family plus four percent of cash farm receipts.

<sup>2</sup>Cash available for debt payments and capital purchases divided by total payments planned.

## ANALYSIS OF THE FARM BUSINESS

When analyzing a farm business, a manager must consider measures or factors that reflect the performance of specified parts of the farm business. To do this one must look at factors of size, rates of production, labor efficiency, capital efficiency and cost control. These measures and factors are detailed on the following pages.

Size of Business

Studies have shown that, in general, larger farms are more profitable than smaller farms. Larger businesses make possible more efficient use of overhead inputs such as labor and machinery and there are more units of production on which to earn a profit. Profitable farm businesses with good management have the ability and incentive to become larger. Large farms are not necessarily more profitable however, and size increases are only profitable with good management.

MEASURES OF SIZE OF BUSINESS  
Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Number of cows	_____	70	75
Number of heifers	_____	61	62
Pounds of milk sold	_____	1,044,900	1,115,700
Worker equivalent	_____	2.67	2.75
Total work units	_____	795	834
Total tillable acres	_____	242	252

In the table below, the 510 New York farms for 1983 are sorted by number of cows and the labor and management income is shown for each size group. In general, the large farms paid better, but, variability of income was significant.

FARM SIZE AND FARM INCOME MEASURES  
510 New York Dairy Farms, 1983

Number of Cows	Number of Farms	Worker Equivalent	Net Cash Farm Income	Labor, Management & Owner- ship Income Per Operator
Under 40	51	1.67	\$12,955	\$ 2,541
40 to 54	103	2.08	19,443	6,279
55 to 69	95	2.42	32,659	14,886
70 to 84	79	2.83	33,688	11,517
85 to 99	54	3.08	43,739	19,509
100 to 149	64	3.75	50,521	21,210
150 to 199	38	4.58	62,048	7,458
200 to 249	13	6.00	100,374	43,033
250 & over	13	8.42	180,903	99,327

### Rates of Production

Crop yields and rates of animal production are factors that have a significant impact on farm incomes. Here is a description of crops grown and yields along with the pounds of milk sold per cow.

#### CROP YIELDS & MILK SOLD PER COW 76 Western Plateau Region Dairy Farms, 1984

Crop	My Farm		Average of Farms Reporting		
	Acres	Yield	Farms	Acres*	Yield/Acre
Dry hay			63	(combined below)	
Hay crop silage			59	(combined below)	
Total hay crops			75	134	2.5 tons D.M.
Corn silage			71	57	13.6 tons
Other forage			8	18	2.3 tons D.M.
Total forage crops			75	190	3.1 tons D.M.
Grain corn			46	32	84.0 bushels
Oats			21	32	41.6 bushels
Other crops			7	12	
Tillable pasture			27	31	
Idle tillable land			30	36	
<hr/>					
Milk sold per cow				14,927 pounds	

\*Average per farm on those farms having that crop.

Tons of dry matter per acre from all hay and silage is a good measure of the overall rate of forage production.

The importance of strong milk output per cow is shown in the table below.

#### MILK SOLD PER COW AND LABOR AND MANAGEMENT INCOME 510 New York Dairy Farms, 1983

Pounds of Milk Sold Per Cow	Number of Farms	Number of Cows	Labor & Mgmt. Income/Oper.	Labor, Mgmt., & Ownership Income/Operator
Under 11,000	26	58	\$-4,275	\$ -903
11,000 to 11,999	35	62	-1,323	370
12,000 to 12,999	44	71	-3,493	5,074
13,000 to 13,999	56	79	-1,391	5,411
14,000 to 14,999	85	87	4,607	13,504
15,000 to 15,999	95	101	2,804	11,607
16,000 to 16,999	80	101	13,797	28,297
17,000 to 17,999	49	96	12,335	31,231
18,000 & over	40	101	18,716	36,819

### Labor Efficiency

Labor input is an important factor in farm production. Several measures of accomplishment per worker (labor efficiency) are shown below.

#### MEASURES OF LABOR EFFICIENCY Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Worker equivalent	_____	2.67	2.75
Cows per worker	_____	26	27
Lbs. milk sold per worker	_____	391,348	405,709
Work units per worker	_____	298	303

Number of cows per worker is calculated by dividing the average number of cows by the worker equivalent which represents the total farm labor force. Pounds of milk sold per worker is an important measure of labor efficiency on the dairy farm. It measures the ability of the labor force to handle a large number of cows without sacrificing milk output per cow.

It is important to look at other measures of labor efficiency, such as work units per worker because all dairy farms do not have the same relationship between cows, heifers, and crops grown.

Labor efficiency depends on a number of things. Among these are the amount of mechanization, the field and building layout, the work methods, and the abilities of the workers. All of these are management items under the control of the operator.

Another factor which may influence the productivity of labor is the wage paid to employees. A productive employee will require a reasonable and competitive wage.

#### MILK SOLD PER WORKER AND LABOR AND MANAGEMENT INCOME 510 New York Dairy Farms, 1983

Pounds of Milk Sold Per Worker	Number of Farms	Number of Cows	Pounds Milk Per Cow	Labor & Mgmt. Income Per Operator	Labor, Mgmt., & Ownership Income Per Operator
Under 250,000	46	44	11,386	\$-2,734	\$ 926
250,000 to 299,999	38	48	13,298	-1,281	4,804
300,000 to 349,999	56	64	14,128	860	5,896
350,000 to 399,999	70	75	14,793	993	9,853
400,000 to 449,000	95	77	15,319	6,463	17,787
450,000 to 499,999	68	89	15,293	3,590	13,037
500,000 to 599,999	81	104	15,710	5,968	19,317
600,000 & over	56	187	16,473	26,312	48,943

### Capital Efficiency

Capital is a key resource in dairy farm businesses and a manager must continually analyze its use in the business. The measures of capital efficiency shown in the following table include owned as well as borrowed capital. It is possible for the business to be undercapitalized, but investing too much capital per productive unit is a more common problem.

MEASURES OF CAPITAL EFFICIENCY  
Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Farm capital per worker	\$ _____	\$137,788	\$145,427
Farm capital per cow	\$ _____	5,182	5,332
Machinery investment per cow	\$ _____	988	1,037
Machinery per tillable acre	\$ _____	290	309
Land & buildings per cow	\$ _____	2,550	2,647
Land & buildings/tillable acre owned	\$ _____	1,053	1,085
Capital turnover (years)	_____	2.2	2.4

Land and building investment per crop acre owned shows the relationship between investments in land and buildings. The farmer who owns little cropland but builds many farm buildings will have a relatively large land and building investment per crop acre owned. This could be an indication that capital use is out of balance.

Capital turnover is calculated by dividing the total farm capital (total year-end farm inventory) by the total farm receipts for the year. The factor is called capital turnover because it measures the number of years of receipts needed to equal or "turnover" farm capital. A fast rate of turnover is more desirable than a slow rate because it means capital purchases can be paid off at a faster rate. This figure also depends upon the enterprise selection of the business.

CAPITAL TURNOVER AND LABOR AND MANAGEMENT INCOME  
510 New York Dairy Farms, 1983

Capital Turnover Rate - Years	Number of Farms	Number of Cows	Capital Investment		Labor & Mgmt. Income Per Operator
			Per Cow	Per Worker	
less than 1.5	14	126	\$3,178	\$105,385	\$ 34,525
1.5 to 1.99	92	121	4,493	153,029	15,742
2.0 to 2.49	168	97	5,246	163,826	5,682
2.5 to 2.99	113	74	6,239	170,148	3,794
3.0 to 3.49	66	63	6,364	168,003	-2,369
3.5 & over	57	60	7,601	206,061	-8,415

## Cost Control

The control of costs is a big factor in the success of modern commercial dairy operations. Feed, machinery and labor costs are major items and should be examined in detail. It is important to check all cost items both large and small. Expenses should be incurred only when the returns from the expense are expected to be greater than the cost incurred.

### Feed Costs

Purchased feed is the largest single expenditure on most dairy farms. Two considerations are important in keeping the feed bill down: (1) Be careful that only nutrients required by the cow are being fed. A dairy farmer cannot afford to buy a feed mix that overfeeds energy or protein. (2) Be certain that the required nutrients are being obtained from their least expensive source. For example, is the lowest cost source of protein, urea, soybean meal or a commercial protein? Help in answering these questions can come from budgeting, from agribusiness people selling feeds, and from dairy and management extension agents. Extension is supporting computerized decision aids to assist in answering these questions including the NEWPLAN program, Least-Cost Balanced Dairy Rations, and the dairy ration analyzers.

The size and productivity of the cropping program has an important influence on the amount of the purchased feed bill. Increased production of either roughages or grains should reduce the purchased feed expense unless cow numbers are increased. Also, heifer raising practices affect feed costs. The overall feed situation must be examined and evaluated as a "system".

### FEED COSTS AND RELATED MEASURES Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Dairy concentrate purchased per cow	\$ _____	\$509	\$532
Dairy concentrate purchased per cwt. of milk sold	\$ _____	\$3.41	\$3.58
Percent dairy concentrate is of milk receipts	_____ %	26%	27%
Crop expense per cow	\$ _____	\$165	\$144
Feed & crop expense/cwt. milk	\$ _____	\$4.76	\$4.71
Forage dry matter harv./cow (tons)	_____	8.3	7.8
Acres of forage per cow	_____	2.7	2.5
Total tillable acres per cow	_____	3.5	3.4
Fertilizer and lime/tillable acre	\$ _____	\$30	\$28
Heifers as % of cow numbers	_____ %	87%	83%

### Machinery, Labor and Miscellaneous Costs

Labor and machinery operate as a team on a dairy farm. The challenge is to obtain an efficient combination of these two inputs that will result in a low cost per unit of output.

#### MACHINERY AND LABOR COSTS Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
<u>Machinery:</u> Depreciation <sup>1</sup>	\$ _____	\$12,880	\$12,973
Interest <sup>2</sup>	_____	3,500	3,873
Operating expense <sup>3</sup>	_____	15,902	16,141
Total machinery	\$ _____	\$32,282	\$32,987
Per cow	_____	\$461	\$440
<u>Labor:</u> Value of operators <sup>4</sup>	\$ _____	\$10,441	\$10,232
Unpaid family <sup>5</sup>	_____	2,033	1,836
Hired	_____	12,720	14,638
Total labor	\$ _____	\$25,194	\$26,706
Per cow	_____	\$360	\$356
Per cwt. milk	_____	\$2.41	\$2.39
Labor & machinery costs per cow	_____	\$821	\$796
Labor & machinery costs/cwt. milk	\$ _____	\$5.50	\$5.35

<sup>1</sup>Regular depreciation from last year's tax plus 10 percent of new purchases.

<sup>2</sup>Five percent of average machinery investment.

<sup>3</sup>Machine hire, repairs, farm share auto expense, and gas and oil.

<sup>4</sup>\$750 per month.

<sup>5</sup>\$500 per month.

#### MISCELLANEOUS COST CONTROL MEASURES Western Plateau Region Dairy Farms, 1984 & 1983

Item	My Farm	76 Farms 1984	70 Farms 1983
Livestock expense per cow	\$ _____	\$298	\$267
Real estate expense per cow	\$ _____	\$167	\$147
Total farm expense per cow	\$ _____	\$2,336	\$2,246

Livestock expense per cow includes breeding fees, veterinary and medicine, milk marketing, dairy supplies, bedding and DHIC fees. Real estate expenses include repairs, taxes, insurance and rent.

## YEARLY CASH FLOW PLANNING &amp; ANALYSIS

This worksheet is a valuable tool in financial planning, expansions and for setting goals for improving the farm business.

Item	76 Western	My Farm,		Cows

Planned Equipment Purchase				
Borrowed or Equity Funds Needed		\$	\$	\$

<sup>1</sup>Interest paid excluded for it is contained in Scheduled Debt Service.

<sup>2</sup>Estimated: \$10,900 per family and four percent of cash farm receipts.

# PROGRESS OF THE FARM BUSINESS

Comparing your business with that of other farmers is one part of a business checkup. It is equally important to compare your current year's business with that of earlier years to show the progress you are making, and to plan ahead, by setting business targets or goals. Data from 55 identical Western Plateau dairy farms is included to provide a basis for comparison.

Item	Average of 55 Western Plateau Identical* Farms		My Farm		
	1983	1984	1983	1984	Goal
<u>Size of Business</u>					
Number of cows	79	77	_____	_____	_____
Number of heifers	65	68	_____	_____	_____
Milk sold (cwt.)	11,829	11,532	_____	_____	_____
Worker equivalent	2.92	3.0	_____	_____	_____

Percent equity	67%	69%	_____%	_____%	_____%
Farm debt per cow	\$1,884	\$1,844	\$ _____	\$ _____	\$ _____

\*"Identical" means that each of these farms were included in the data for both 1983 and 1984.

### Farm Business Chart

The Farm Business Chart is a tool which can be used in analyzing a business by drawing a line through the figure in each column which represents the current level of management performance. The figure at the top of each column is the average of the top 10 percent of the 510 farms for that factor. The other figures in each column are the average for the second 10 percent, third 10 percent, etc. Each column of the chart is independent of the others. The farms which are in the top 10 percent for one factor would not necessarily be the same farms which make up the top 10 percent for any other factor.

#### FARM BUSINESS CHART FOR FARM MANAGEMENT COOPERATORS 510 New York Dairy Farms, 1983

Size of Business			Rates of Production			Labor Efficiency	
Worker	No.	Pounds	Tons Hay			Cows	Pounds
Equiv-	of	Milk	Pounds	Crop	Tons Corn	Per	Milk Sold
valent	Cows	Sold	Milk Sold	D.M./	Silage	Worker	Per Worker
			Per Cow	Acre	Per Acre		
6.3	233	3,749,300	18,500	4.8	21	47	722,800
4.2	136	2,058,600	17,200	3.5	17	37	570,200
3.4	100	1,547,000	16,500	3.1	16	34	510,400
3.1	85	1,324,900	15,900	2.7	15	31	472,400
2.8	75	1,153,100	15,300	2.5	14	29	437,800
2.5	67	988,000	14,800	2.3	13	27	413,100
2.2	59	870,600	14,200	2.1	12	26	373,900
2.0	51	730,000	13,400	1.9	12	23	340,700
1.8	44	600,600	12,400	1.7	10	21	290,800
1.4	34	410,300	10,300	1.3	7	17	200,300
<hr/>							
Feed Bought	% Feed is	Machinery		Labor and		Feed and Crop	
Per Cow	of Milk	Costs		Machinery		Expenses Per	
	Receipts	Per Cow		Costs Per Cow		Cwt. Milk	
\$224	12%	\$215		\$ 499		\$2.82	
329	17	281		598		3.55	
389	20	324		641		4.00	
448	23	354		678		4.29	
505	26	384		723		4.57	
552	28	418		767		4.83	
596	29	458		816		5.04	
646	31	501		875		5.30	
698	34	557		952		5.67	
830	40	684		1,141		6.63	

The cost control factors are ranked from low to high, but the lowest cost is not necessarily the most profitable. In some cases, the "best" management position is somewhere near the middle or average. Many things affect the level of costs, and must be taken into account when analyzing the factors.

## Financial Analysis Chart

The farm financial analysis chart is designed just like the Farm Business Chart in Table 35 on page 28 and may be used to measure the financial health of the farm business. Most of the financial measures used are defined on pages 14 through 16 and 21 in this publication.

### FINANCIAL ANALYSIS CHART 510 New York Dairy Farms, 1983

Liquidity (Repayment)						
Debt Payments Per Cow	Available for Debt Service Per Cow	Cash Flow Coverage Ratio	Debt Payments as Percent of Milk Sales	Debt Per Cow

## MEASURE YOUR PERFORMANCE

After you have entered your farm business data on the pages of this workbook, categorize your farm business performance into three groups. List the strong points, those which indicate average performance and those areas which need improvement. Your business factors that exceed the regional average should be listed as strong points, factors that are close to the regional average should be identified as average, and factors that are below average should be listed under need improvement.

The Farm Business Chart on the page 18 and the Financial Analysis Chart on page 19 can be used to identify strengths and weaknesses by comparing your business with a large number of New York dairy farms summarized for the previous year. It is recommended that you use more than one standard for comparison when analyzing the farm business.

## STRONG POINTS:

---

---

---

---

## AVERAGE:

---

---

---

---

## NEED IMPROVEMENT:

---

---

---

After identifying opportunities for improvement, consider alternative ways of solving each problem. List each alternative and analyze the consequences in detail. Extension conducts many schools, meetings, and provides many printed materials that should be of assistance. Local agribusinesses often provide helpful information and assistance. Seek out information related to the problem under consideration.

Another way to measure your management performance is to compare your current business factors with those from previous years. Page 17 is provided for this purpose. Answering the following questions may also help evaluate your farm business progress.

- 1) Do livestock numbers, labor force, and crop acres make up a well balanced unit of resources?
- 2) Have rates of production shown a steady increase?
- 3) When will milk output per worker reach 600,000 pounds?
- 4) Have increases in costs been limited to the effects of inflation?
- 5) Is growth in net worth keeping up with increased capital investment?
- 6) Is net cash farm income increasing fast enough to meet your needs?
- 7) Have you reached the business goals set for 1984 and have you set new goals for 1985?
