## DAIRY FARM BUSINESS SUMMARY Northern Hudson Region

### INTRODUCTION

This report is part of your Cooperative Extension Farm Business Management Program. Each year dairy farmers throughout New York State submit business records for summarization and analysis. In addition to this publication, each participating farmer receives an individual farm summary and analysis report for his or her business. The information in this publication is compiled by combining and averaging data submitted by the participating farmers from the region described at the bottom of this page.

### Program Objectives

Primary objectives of the dairy farm business management program are to (1) assist farmers in developing and maintaining more complete farm business data for use in management decisions and (2) help farmers improve their management skills through appropriate use of farm record data and application of modern decision-making techniques. This report is prepared in workbook form for use in the systematic study of individual farm business performance.

The need for a thorough dairy farm business examination and follow-up plan is greater than ever. The years immediately ahead will bring continued economic pressures on dairy farmers. We must continue to place emphasis on cost control and improvements in operating efficiency to maintain adequate farm incomes. Projecting cash flows, planning for future needs, and recognizing how those needs can be met will be required to survive the current dairy farm financial crisis.

### New Developments

This year, several farm management agents and specialists are participating in a Dairy Farm Business Summary Pilot Program. Cooperative Extension Associations with appropriate microcomputers, have the capability to strengthen their dairy farm business analysis activities by calculating and printing the individual farm summary and analysis reports for immediate use by the agent and farmer, at any time. After the individual farm data is entered in the county office using the Micro DFBS computer program, it is sent to the Department of Agricultural Economics at Cornell University for additional review prior to transfer to a mainframe computer program for calculation of regional and state summaries.

Dairy farmers participating in the milk diversion program are included in this report. Since there is a relatively small number from any one region, the data from these farms has not been summarized separately. A separate summary and analysis of milk diversion program farms will be included in the 1984 New York State Dairy Farm Business Summary.

This summary was prepared by Stuart F. Smith, Linda D. Putnam, and Cindy Farrell, Department of Agricultural Economics, New York State College of Agriculture and Life Sciences, Cornell University, in cooperation with Cooperative Extension Agents Tom Gallagher, John Thurgood, Cathy Wickswat, and David Wood submitted the farm business financial data. The Albany Farm Credit Association and Charles Radick cooperated with data collection. The Northern Hudson Region is comprised of Albany, Rensselaer, Saratoga, and Washington Counties.

## SUMMARY OF THE FARM BUSINESS

Business Characteristics

Finding the right combination of resources and management strategies is an important part of farming. The tables below show important farm business characteristics, the number of farms reporting these characteristics, and the average level of resources used in production.

MANAGEMENT SYSTEMS, PRODUCTION TECHNOLOGY AND FARM SIZE  
60 Northern Hudson Region Dairy Farms, 1984

Type of Business	Number	Business Records	Number	Dairy Records	Number
Proprietorship	42	CAMIS	11	D.H.I.C.	42
Partnership	14	Account Book	17	Owner Sampler	10
Corporation	4	Agrifax	14	None	1
Owner	53	On-Farm Computer	1	Other	7
Renter	7	Other	17		

Barn Type	Number	Milking System	Number		Number
Stanchion	36	Bucket & Carry	1	Herringbone	19
Freestall	22	Dumping Station	7	Other Parlor	3
Other	2	Pipeline	30		

Labor Force	My Farm	Average	Land Use	My Farm	Average
Operator 1.	_____	mo. 12	Total acres owned	_____	275
2 & 3.	_____	mo. 5	Total acres rented	_____	170
Family paid	_____	mo. 5	Total tillable acres	_____	263
Family unpaid	_____	mo. 2	Tillable acres rented	_____	121
Hired	_____	mo. 11			
Total	_____	mo. 35	Number of Cows	My Farm	Average
			Beginning of		
			year (owned)	_____	86
Age of operator(s) 1.	_____	yrs. 44	End of year (owned)	_____	86
2.	_____	yrs. 37	Avg. for year (all)	_____	85

Capital Investment-Farm Inventory represents the market value of resources committed to the farm business at the beginning and end of the year. Increases in inventory occur with herd expansion, new machinery, and building additions and appreciation of land, buildings and livestock.

CAPITAL INVESTMENT - FARM INVENTORY  
60 Northern Hudson Region Dairy Farms, 1984

Item	My Farm		Average	
	1/1/84	1/1/85	1/1/84	1/1/85
Livestock	\$ _____	\$ _____	\$111,490	\$109,564
Feed & supplies	_____	_____	38,809	41,418
Machinery & equipment	_____	_____	97,668	100,859
Land & buildings	_____	_____	220,718	225,367
TOTAL	\$ _____	\$ _____	\$468,685	\$477,208

Inventory Accounting

The value of the dairy herd is influenced by market prices, herd quality and quantity. Changes in market value caused by inflationary or deflationary price changes, are separated from changes in inventory caused by changes in herd quality and quantity.

CHANGE IN LIVESTOCK INVENTORY  
60 Northern Hudson Region Dairy Farms, 1984

Item	My Farm	Average
End of year market value	\$ _____	\$109,564
less end at beginning prices	- _____	<u>-113,100</u>
Change due to price	\$ _____	\$-3,536
End inventory at beginning prices	\$ _____	\$113,100
less beginning of year inventory	- _____	<u>-111,490</u>
Change due to quality & quantity	\$ _____	\$ 1,610

Machinery and real estate inventories, based on current market values, include a depreciation charge and are balanced by the residual called appreciation.

MACHINERY AND EQUIPMENT INVENTORY  
60 Northern Hudson Region Dairy Farms, 1984

Item	My Farm	Average
End of year market value	(1)\$ _____	\$100,859
Beginning market value	\$ _____	\$97,668
Plus machinery purchased	+ _____	+15,066
Less machinery sold	- _____	- 453
Less depreciation	- _____	<u>-15,081</u>
Net end investment	(2)\$ _____	\$ 97,200
APPRECIATION (1 minus 2)	\$ _____	\$ 3,659

The change in real estate value is affected by market forces, building depreciation, and lost capital which is the portion of a new building investment that is not reflected in the value of the farm.

REAL ESTATE INVENTORY CALCULATIONS  
60 Northern Hudson Region Dairy Farms, 1984

Item	My Farm	Average
End of year market value	(1)\$ _____	\$225,367
Beginning market value	\$ _____	\$220,718
Cost of new real estate	\$ _____	\$8,568
Less lost capital	- _____	<u>- 933</u>
Value of new added	+ _____	+ 7,635
Less building depreciation	- _____	- 7,394
Less real estate sold	- _____	<u>- 4</u>
Net end investment	(2)\$ _____	\$220,955
APPRECIATION (1 minus 2)	\$ _____	\$ 4,412

## Receipts

Receipts from the business should be large enough to cover all expenses and leave a reasonable return for the operator's labor and management. Cash receipts occur when farm products and livestock are sold or services are performed and payment is received during the year. Noncash receipts do not result from sales, but are due to appreciation in value or increases in physical quantities of inventories that occurred during the year. Most of these items could be readily transformed into cash.

### FARM RECEIPTS 60 Northern Hudson Region Dairy Farms, 1984

Item	My Farm	Per Farm	Per Cow
<b>CASH RECEIPTS</b>			
Milk sales	\$ _____	\$183,685	\$2,161.00
Crop sales	_____	916	10.78
Dairy cattle sold	_____	11,905	140.06
Calves & other livestock sales	_____	2,091	24.60
Gas tax refunds	_____	281	3.31
Government payments	_____	3,904	45.93
Custom machine work	_____	246	2.89
Other	_____	2,465	29.00
Total Cash Receipts	\$ _____	\$205,493	\$2,417.56
<b>NONCASH RECEIPTS</b>			
Increase in livestock inventory <sup>1</sup>	_____	1,610	18.94
Increase in feed & supplies	_____	2,609	30.69
TOTAL FARM RECEIPTS EXCLUDING APPRECIATION	\$ _____	\$209,712	\$2,467.20
Livestock appreciation <sup>2</sup>	_____	- 3,536	- 41.60
Machinery appreciation <sup>3</sup>	_____	3,659	43.05
Real estate appreciation <sup>3</sup>	_____	4,412	51.91
TOTAL FARM RECEIPTS	\$ _____	\$214,247	\$2,520.55

<sup>1</sup> The increase in herd market value attributed to a change in numbers and/or a definite change in herd quality.

<sup>2</sup> The increase in herd market value, caused by inflationary price increase.

<sup>3</sup> Defined on page 3.

Income Analysis provides a means of examining the annual receipt producing capability of the farm business.

### INCOME ANALYSIS Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Average price/cwt. milk sold	\$ _____	\$14.19	\$14.36
Milk and cattle sales per cow	_____	\$2,326	\$2,309

TOTAL FARM EXPENSES	\$ _____	\$210,751	\$2,479.42

## Farm Business Profitability

The results of management are reflected in the net return from the business. Four common ways to measure the returns from a farm business are calculated.

Net cash farm income reflects the cash available from the year's operation of the business. Family living has first claim on cash income followed by fixed payments on debts. A family may have additional cash available if they have nonfarm income. Cash flow is not a good measure of farm business profits, but it is useful when planning debt repayment programs. Guidelines for annual cash flow planning are presented on page 9. Monthly cash flow planning is also recommended and may be required in order to identify cash flow problems in the year ahead. This is particularly true when major changes in the business are planned or when the price of important factors such as milk or purchased grain are expected to change significantly.

### NET CASH FARM INCOME Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Cash Farm Receipts	\$ _____	\$205,493	\$191,309
Cash Farm Expenses	_____	<u>170,004</u>	<u>158,281</u>
NET CASH FARM INCOME	\$ _____	\$ 35,489	\$ 33,028

Labor and management income is the return to the operator for his or her labor and management input into the business. A five percent charge for the use of the operator's equity capital in the business has been included as a farm expense. This interest charge reflects the long term average rate of return that a farmer might expect to earn in investments with comparable risk to farm businesses in an economy with little or no inflation. Labor and management income is the measure used most commonly when comparing farm businesses. Appreciation in livestock, machinery and real estate inventories is included as ownership income, not return to operator labor and management.

### LABOR AND MANAGEMENT INCOME Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Total farm receipts excluding appreciation	\$ _____	\$209,712	\$195,126
Total farm expenses	_____	<u>210,751</u>	<u>190,680</u>
LABOR & MANAGEMENT INCOME	\$ _____	\$ -1,039	\$ 4,446
Full-time operator-manager equivalents	_____	1.40	1.37
LABOR & MANAGEMENT INCOME PER OPERATOR-MANAGER	\$ _____	\$ -742	\$ 3,245

Labor, management and ownership income per operator reflects the combined return to the farmer for his or her triple role of worker-manager, financier and owner. Again, this is not a measure of the cash flow situation of the farm business. A satisfactory labor, management and ownership income does not eliminate cash flow problems if liabilities are large and repayment is rapid.

LABOR, MANAGEMENT AND OWNERSHIP INCOME  
Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Total farm receipts	\$ _____	\$214,247	\$193,158
Total farm expenses excluding interest on equity capital	_____	<u>194,215</u>	<u>176,784</u>
LABOR, MANAGEMENT AND OWNERSHIP INCOME PER FARM	\$ _____	\$ 20,032	\$ 16,374
Full-time operator-manager equivalents	_____	1.40	1.37
LABOR, MANAGEMENT AND OWNERSHIP INCOME PER OPERATOR-MANAGER	\$ _____	\$ 14,309	\$ 11,952

Return on equity capital measures the net profit remaining for the farmer's owned or equity capital after earnings have been allocated to the owner-operator's labor and management. The earnings or amount of gross profit allocated to labor and management is the opportunity cost or value of operator's labor and management estimated by the cooperators. Return on equity capital is computed including and excluding appreciation.

RETURN ON EQUITY CAPITAL  
Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Labor, management & ownership income per farm	\$ _____	\$20,032	\$16,374
Less value of operator's labor & management	_____	<u>21,276</u>	<u>21,144</u>
Return on equity capital	\$ _____	\$-1,244	\$-4,770
RATE OF RETURN INCLUDING APPRECIATION	_____ %	-0.4%	-1.7%
RATE OF RETURN EXCLUDING APPRECIATION	_____ %	-1.7%	-1.0%

The rate of return on equity capital is computed as the amount returned divided by farm net worth or equity capital.

# Farm Family Financial Situation

The financial situation is an important part of the farm business summary. It has a direct affect on current cash outflow and future capital investment decisions. Financial lease obligations are included in the balance sheet. The present value of all future payments is listed as a liability since the farmer is committed to make the payments. The present values are also listed as assets, representing the future value the item has to the business.

## FARM FAMILY NET WORTH 60 Northern Hudson Region Dairy Farms, January 1, 1985

Item	My Farm	Average
<u>Assets</u>		
Livestock	\$ _____	\$109,564
Feed and supplies	_____	41,418
Machinery and equipment	_____	101,455
(includes discounted lease payments)*	(596)	
Land and buildings	_____	227,499
(includes discounted lease payments)*	(2,132)	
Co-op investments	_____	14,127
Accounts receivable	_____	16,645
Cash and checking accounts	_____	2,205
Total Farm Assets	\$ _____	\$512,913
Savings accounts	\$ _____	\$ 4,703
Cash value life insurance	_____	1,300
Stocks and bonds	_____	2,526
Nonfarm real estate	_____	4,200
Auto (personal share)	_____	856
All Other	_____	4,263
TOTAL FARM & NONFARM ASSETS	\$ _____	\$530,761
<u>Liabilities</u>		
Long term	\$ _____	\$ 94,567
Intermediate	_____	67,335
Financial lease*	_____	2,728
Short term	_____	6,818
Other farm accounts	_____	10,739
Total Farm Liabilities	\$ _____	\$182,187
Nonfarm Liabilities	_____	138
TOTAL LIABILITIES	\$ _____	\$182,325
FARM NET WORTH (EQUITY CAPITAL)	\$ _____	\$330,726
FAMILY NET WORTH	\$ _____	\$348,436

\*Future payments were discounted at an annual rate of 13 percent.

Payment ability is the most important consideration in determining if and how proposed investments should be financed. The farm business must produce sufficient cash income to meet operating expenses, to cover family living expenses and to make payments on debts. Interest paid and income from off-farm work are added to net cash farm income because planned debt payments will include interest as well as principal. Estimate your family living expenses to calculate cash available for debt payments and capital purchases made in cash.

A cash flow coverage ratio of less than one indicates that planned cash outflows exceed cash availability determined from 1984 records.

**FARM FAMILY DEBT REPAYMENT**  
60 Northern Hudson Region Dairy Farms, January 1, 1985

Item	My Farm	Average
<u>Payment Ability</u>		
Net cash farm income	\$ _____	\$35,489
Plus interest paid	_____	17,755
Plus off-farm income	_____	677
CASH AVAILABLE FOR DEBT SERVICE AND LIVING	\$ _____	\$53,921
Less family living expenses <sup>1</sup>	_____	23,479
CASH AVAILABLE FOR DEBT PAYMENTS AND CAPITAL PURCHASES	\$ _____	\$30,442
<u>Scheduled Annual Debt Payments</u>		
Long term	\$ _____	\$13,275
Intermediate	_____	20,003
Short term	_____	5,184
Other farm accounts	_____	1,968
TOTAL FARM DEBT PAYMENTS	\$ _____	\$40,430
Nonfarm debt payments	_____	133
TOTAL PAYMENTS PLANNED 1985	\$ _____	\$40,563
CASH FLOW COVERAGE RATIO <sup>2</sup>	_____	0.75
<u>Commitment and Measures of Debt Equity Position</u>		
Farm debt payments planned per cow	\$ _____	\$465
Farm debt payments as % milk sales	_____ %	22%
Farm debt/asset ratio-long term	_____	0.42
Farm debt/asset ratio-intermediate and short term	_____	0.27
Farm debt per cow	\$ _____	\$2,094
Percent equity (total)	_____ %	66%

<sup>1</sup>Estimated as \$10,900 per family plus four percent of cash farm receipts.

<sup>2</sup>Cash available for debt payments and capital purchases divided by total payments planned.

## ANALYSIS OF THE FARM BUSINESS

When analyzing a farm business, a manager must consider measures or factors that reflect the performance of specified parts of the farm business. To do this one must look at factors of size, rates of production, labor efficiency, capital efficiency and cost control. These measures and factors are detailed on the following pages.

Size of Business

Studies have shown that, in general, larger farms are more profitable than smaller farms. Larger businesses make possible more efficient use of overhead inputs such as labor and machinery and there are more units of production on which to earn a profit. Profitable farm businesses with good management have the ability and incentive to become larger. Large farms are not necessarily more profitable however, and size increases are only profitable with good management.

MEASURES OF SIZE OF BUSINESS  
Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Number of cows	_____	85	80
Number of heifers	_____	72	67
Pounds of milk sold	_____	1,294,500	1,201,300
Worker equivalent	_____	2.92	2.67
Total work units	_____	956	907
Total tillable acres	_____	263	270

In the table below, the 510 New York farms for 1983 are sorted by number of cows and the labor and management income is shown for each size group. In general, the large farms paid better, but, variability of income was significant.

FARM SIZE AND FARM INCOME MEASURES  
510 New York Dairy Farms, 1983

Number of Cows	Number of Farms	Worker Equivalent	Net Cash Farm Income	Labor, Management & Owner- ship Income Per Operator
Under 40	51	1.67	\$12,955	\$ 2,541
40 to 54	103	2.08	19,443	6,279
55 to 69	95	2.42	32,659	14,886
70 to 84	79	2.83	33,688	11,517
85 to 99	54	3.08	43,739	19,509
100 to 149	64	3.75	50,521	21,210
150 to 199	38	4.58	62,048	7,458
200 to 249	13	6.00	100,374	43,033
250 & over	13	8.42	180,903	99,327

### Rates of Production

Crop yields and rates of animal production are factors that have a significant impact on farm incomes. Here is a description of crops grown and yields along with the pounds of milk sold per cow.

#### CROP YIELDS & MILK SOLD PER COW 60 Northern Hudson Region Dairy Farms, 1984

Crop	My Farm		Average of Farms Reporting		
	Acres	Yield	Farms	Acres	Yield/Acre
Dry hay	_____	_____	50	(combined below)	
Hay crop silage	_____	_____	47	(combined below)	
Total hay crops	_____	_____	59	136	2.8 tons D.M.
Corn silage	_____	_____	57	80	13.4 tons
Other forage	_____	_____	5	12	1.3 tons
Total forage crops	_____	_____	59	214	3.4 tons D.M.
Grain corn	_____	_____	33	69	86.8 bushels
Oats	_____	_____	5	29	38.2 bushels
Wheat	_____	_____	3	42	54.3 bushels
Other crops	_____	_____	9	26	
Tillable pasture	_____	_____	14	20	
Idle tillable land	_____	_____	11	13	
-----					
Milk sold per cow	_____			15,229 pounds	

Tons of dry matter per acre from all hay and silage is a good measure of the overall rate of forage production.

The importance of strong milk output per cow is shown in the table below.

#### MILK SOLD PER COW AND LABOR AND MANAGEMENT INCOME 510 New York Dairy Farms, 1983

Pounds of Milk Sold Per Cow	Number of Farms	Number of Cows	Labor & Mgmt. Income/Oper.	Labor, Mgmt., & Owner-ship Income/Operator
Under 11,000	26	58	\$-4,275	\$ -903
11,000 to 11,999	35	62	-1,323	370
12,000 to 12,999	44	71	-3,493	5,074
13,000 to 13,999	56	79	-1,391	5,411
14,000 to 14,999	85	87	4,607	13,504
15,000 to 15,999	95	101	2,804	11,607
16,000 to 16,999	80	101	13,797	28,297
17,000 to 17,999	49	96	12,335	31,231
18,000 & over	40	101	18,716	36,819

Labor Efficiency

Labor input is an important factor in farm production. Several measures of accomplishment per worker (labor efficiency) are shown below.

MEASURES OF LABOR EFFICIENCY  
Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Worker equivalent	_____	2.92	2.67
Cows per worker	_____	29	30
Lbs. milk sold per worker	_____	443,322	449,925
Work units per worker	_____	327	340

Number of cows per worker is calculated by dividing the average number of cows by the worker equivalent which represents the total farm labor force. Pounds of milk sold per worker is an important measure of labor efficiency on the dairy farm. It measures the ability of the labor force to handle a large number of cows without sacrificing milk output per cow.

It is important to look at other measures of labor efficiency, such as work units per worker because all dairy farms do not have the same relationship between cows, heifers, and crops grown.

Labor efficiency depends on a number of things. Among these are the amount of mechanization, the field and building layout, the work methods, and the abilities of the workers. All of these are management items under the control of the operator.

Another factor which may influence the productivity of labor is the wage paid to employees. A productive employee will require a reasonable and competitive wage.

MILK SOLD PER WORKER AND LABOR AND MANAGEMENT INCOME  
510 New York Dairy Farms, 1983

Pounds of Milk Sold Per Worker	Number of Farms	Number of Cows	Pounds Milk Per Cow	Labor & Mgmt. Income Per Operator	Labor, Mgmt., & Ownership Income Per Operator
Under 250,000	46	44	11,386	\$-2,734	\$ 926
250,000 to 299,999	38	48	13,298	-1,281	4,804
300,000 to 349,999	56	64	14,128	860	5,896

600,000 & over	56	187	16,473	26,312	48,943

### Capital Efficiency

Capital is a key resource in dairy farm businesses and a manager must continually analyze its use in the business. The measures of capital efficiency shown in the following table include owned as well as borrowed capital. It is possible for the business to be undercapitalized, but investing too much capital per productive unit is a more common problem.

MEASURES OF CAPITAL EFFICIENCY  
Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Farm capital per worker	\$ _____	\$163,427	\$159,233
Farm capital per cow	\$ _____	5,485	4,887
Machinery investment per cow	\$ _____	1,159	985
Machinery per tillable acre	\$ _____	383	317
Land & buildings per cow	\$ _____	2,590	2,297
Land & buildings/tillable acre owned	\$ _____	1,400	1,197
Capital turnover (years)	_____	2.2	2.2

Land and building investment per crop acre owned shows the relationship between investments in land and buildings. The farmer who owns little cropland but builds many farm buildings will have a relatively large land and building investment per crop acre owned. This could be an indication that capital use is out of balance.

Capital turnover is calculated by dividing the total farm capital (total year-end farm inventory) by the total farm receipts for the year. The factor is called capital turnover because it measures the number of years of receipts needed to equal or "turnover" farm capital. A fast rate of turnover is more desirable than a slow rate because it means capital purchases can be paid off at a faster rate. This figure also depends upon the enterprise selection of the business.

CAPITAL TURNOVER AND LABOR AND MANAGEMENT INCOME  
510 New York Dairy Farms, 1983

Capital Turnover Rate - Years	Number of Farms	Number of Cows	Capital Investment		Labor & Mgmt. Income Per Operator
			Per Cow	Per Worker	
less than 1.5	14	126	\$3,178	\$105,385	\$ 34,525
1.5 to 1.99	92	121	4,493	153,029	15,742
2.0 to 2.49	168	97	5,246	163,826	5,682
2.5 to 2.99	113	74	6,239	170,148	3,794
3.0 to 3.49	66	63	6,364	168,003	-2,369
3.5 & over	57	60	7,601	206,061	-8,415

## Cost Control

The control of costs is a big factor in the success of modern commercial dairy operations. Feed, machinery and labor costs are major items and should be examined in detail. It is important to check all cost items both large and small. Expenses should be incurred only when the returns from the expense are expected to be greater than the cost incurred.

### Feed Costs

Purchased feed is the largest single expenditure on most dairy farms. Two considerations are important in keeping the feed bill down: (1) Be careful that only nutrients required by the cow are being fed. A dairy farmer cannot afford to buy a feed mix that overfeeds energy or protein. (2) Be certain that the required nutrients are being obtained from their least expensive source. For example, is the lowest cost source of protein, urea, soybean meal or a commercial protein? Help in answering these questions can come from budgeting, from agribusiness people selling feeds, and from dairy and management extension agents. Extension is supporting computerized decision aids to assist in answering these questions including the NEWPLAN program, Least-Cost Balanced Dairy Rations, and the dairy ration analyzers.

The size and productivity of the cropping program has an important influence on the amount of the purchased feed bill. Increased production of either roughages or grains should reduce the purchased feed expense unless cow numbers are increased. Also, heifer raising practices affect feed costs. The overall feed situation must be examined and evaluated as a "system".

#### FEED COSTS AND RELATED MEASURES Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Dairy concentrate purchased per cow	\$ _____	\$514	\$532
Dairy concentrate purchased per cwt. of milk sold	\$ _____	\$3.38	\$3.55
Percent dairy concentrate is of milk receipts	_____ %	24%	25%
Crop expense per cow	\$ _____	\$197	\$191
Feed & crop expense/cwt. milk	\$ _____	\$4.88	\$4.89
Forage dry matter harv./cow (tons)	_____	8.6	7.8
Acres of forage per cow	_____	2.5	2.8
Total tillable acres per cow	_____	3.1	3.4
Fertilizer and lime/tillable acre	\$ _____	\$39	\$38
Heifers as % of cow numbers	_____ %	85%	84%

### Machinery, Labor and Miscellaneous Costs

Labor and machinery operate as a team on a dairy farm. The challenge is to obtain an efficient combination of these two inputs that will result in a low cost per unit of output.

#### MACHINERY AND LABOR COSTS Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
<u>Machinery:</u> Depreciation <sup>1</sup>	\$ _____	\$15,081	\$11,897
Interest <sup>2</sup>	_____	4,963	4,202
Operating expense <sup>3</sup>	_____	<u>17,367</u>	<u>17,350</u>
Total machinery	\$ _____	\$37,411	\$33,448
Per cow	_____	\$440	\$418
<u>Labor:</u> Value of operators <sup>4</sup>	\$ _____	\$12,438	\$12,201
Unpaid family <sup>5</sup>	_____	950	1,245
Hired	_____	<u>18,026</u>	<u>14,660</u>
Total labor	\$ _____	\$31,414	\$28,106
Per cow	_____	\$370	\$351
Per cwt. milk	_____	\$2.43	\$2.34
Labor & machinery costs per cow	_____	\$810	\$769
Labor & machinery costs/cwt. milk	\$ _____	\$5.32	\$5.12

<sup>1</sup> Regular depreciation from last year's tax plus 10 percent of new purchases.

<sup>2</sup> Five percent of average machinery investment.

<sup>3</sup> Machine hire, repairs, farm share auto expense, and gas and oil.

<sup>4</sup> \$750 per month.

<sup>5</sup> \$500 per month.

#### MISCELLANEOUS COST CONTROL MEASURES Northern Hudson Region Dairy Farms, 1984 & 1983

Item	My Farm	60 Farms 1984	108 Farms 1983
Livestock expense per cow	\$ _____	\$372	\$349
Real estate expense per cow	\$ _____	\$160	\$173
Total farm expense per cow	\$ _____	\$2,479	\$2,384

Livestock expense per cow includes breeding fees, veterinary and medicine, milk marketing, dairy supplies, bedding and DHIC fees. Real estate expenses include repairs, taxes, insurance and rent.

## YEARLY CASH FLOW PLANNING &amp; ANALYSIS

This worksheet is a valuable tool in financial planning, expansions and for setting goals for improving the farm business.

Item	60 N. Hudson Region Farms	My Farm, _____		Cows
	Avg. Per Cow	Per Cow	Total	Goal
<b>CASH RECEIPTS</b>				
Milk sales	\$2,161	\$ _____	\$ _____	\$ _____
Crop sales	11	_____	_____	_____

Total Cash Expenses <sup>1</sup>	-1,790	-	-	-
Net Cash Flow	\$ 628	\$ _____	\$ _____	\$ _____
Cash Family Living Expense <sup>2</sup>	- 276	-	-	-
Amount Left for Debt Service, Capital Investment & Retained Earnings	\$ 352	\$ _____	\$ _____	\$ _____
Scheduled Farm Debt Service	- 465	-	-	-
Available for Capital Investment	\$ -113	\$ _____	\$ _____	\$ _____
Planned Expansion Livestock Purch.		_____	_____	_____
Planned Equipment Purchase		_____	_____	_____
Borrowed or Equity Funds Needed		\$ _____	\$ _____	\$ _____

<sup>1</sup> Interest paid excluded for it is contained in Scheduled Debt Service.

<sup>2</sup> Estimated: \$10,900 per family and four percent of cash farm receipts.

# PROGRESS OF THE FARM BUSINESS

Comparing your business with that of other farmers is one part of a business checkup. It is equally important to compare your current year's business with that of earlier years to show the progress you are making, and to plan ahead, by setting business targets or goals. Data from 49 identical Northern Hudson Region dairy farms is included to provide a basis for comparison.

Item	Average of 49 Northern Hudson Region Farms*		My Farm		
	1983	1984	1983	1984	Goal

\*Average of the same 49 farms for 1983 and 1984.

### Farm Business Chart

The Farm Business Chart is a tool which can be used in analyzing a business by drawing a line through the figure in each column which represents the current level of management performance. The figure at the top of each column is the average of the top 10 percent of the 510 farms for that factor. The other figures in each column are the average for the second 10 percent, third 10 percent, etc. Each column of the chart is independent of the others. The farms which are in the top 10 percent for one factor would not necessarily be the same farms which make up the top 10 percent for any other factor.

#### FARM BUSINESS CHART FOR FARM MANAGEMENT COOPERATORS 510 New York Dairy Farms, 1983

Size of Business			Rates of Production			Labor Efficiency	
Worker Equiv- valent	No. of Cows	Pounds Milk Sold	Pounds Milk Sold Per Cow	Tons Hay Crop D.M./ Acre	Tons Corn Silage Per Acre	Cows Per Worker	Pounds Milk Sold Per Worker
6.3	233	3,749,300	18,500	4.8	21	47	722,800
4.2	136	2,058,600	17,200	3.5	17	37	570,200
3.4	100	1,547,000	16,500	3.1	16	34	510,400
3.1	85	1,324,900	15,900	2.7	15	31	472,400
2.8	75	1,153,100	15,300	2.5	14	29	437,800
2.5	67	988,000	14,800	2.3	13	27	413,100
2.2	59	870,600	14,200	2.1	12	26	373,900
2.0	51	730,000	13,400	1.9	12	23	340,700
1.8	44	600,600	12,400	1.7	10	21	290,800
1.4	34	410,300	10,300	1.3	7	17	200,300
<hr/>							
Feed Bought Per Cow	% Feed is of Milk Receipts		Machinery Costs Per Cow	Labor and Machinery Costs Per Cow		Feed and Crop Expenses Per Cwt. Milk	
\$224	12%		\$215	\$ 499		\$2.82	
329	17		281	598		3.55	
389	20		324	641		4.00	
448	23		354	678		4.29	
505	26		384	723		4.57	
552	28		418	767		4.83	
596	29		458	816		5.04	
646	31		501	875		5.30	
698	34		557	952		5.67	
830	40		684	1,141		6.63	

The cost control factors are ranked from low to high, but the lowest cost is not necessarily the most profitable. In some cases, the "best" management position is somewhere near the middle or average. Many things affect the level of costs, and must be taken into account when analyzing the factors.

### Financial Analysis Chart

The farm financial analysis chart is designed just like the Farm Business Chart in Table 35 on page 28 and may be used to measure the financial health of the farm business. Most of the financial measures used are defined on pages 14 through 16 and 21 in this publication.

#### FINANCIAL ANALYSIS CHART 510 New York Dairy Farms, 1983

Liquidity (Repayment)				
Debt Payments Per Cow	Available for Debt Service Per Cow	Cash Flow Coverage Ratio	Debt Payments as Percent of Milk Sales	Debt Per Cow
\$ 56	\$844	7.49	3	\$ 152

## MEASURE YOUR PERFORMANCE

After you have entered your farm business data on the pages of this workbook, categorize your farm business performance into three groups. List the strong points, those which indicate average performance and those areas which need improvement. Your business factors that exceed the regional average should be listed as strong points, factors that are close to the regional average should be identified as average, and factors that are below average should be listed under need improvement.

The Farm Business Chart on the page 18 and the Financial Analysis Chart on page 19 can be used to identify strengths and weaknesses by comparing your business with a large number of New York dairy farms summarized for the previous year. It is recommended that you use more than one standard for comparison when analyzing the farm business.

## STRONG POINTS:

---

---

---

---

## AVERAGE:

---

---

---

---

## NEED IMPROVEMENT:

---

---

---

After identifying opportunities for improvement, consider alternative ways of solving each problem. List each alternative and analyze the consequences in detail. Extension conducts many schools, meetings, and provides many printed materials that should be of assistance. Local agribusinesses often provide helpful information and assistance. Seek out information related to the problem under consideration.

Another way to measure your management performance is to compare your current business factors with those from previous years. Page 17 is provided for this purpose. Answering the following questions may also help evaluate your farm business progress.

- 1) Do livestock numbers, labor force, and crop acres make up a well balanced unit of resources?
- 2) Have rates of production shown a steady increase?
- 3) When will milk output per worker reach 600,000 pounds?
- 4) Have increases in costs been limited to the effects of inflation?
- 5) Is growth in net worth keeping up with increased capital investment?
- 6) Is net cash farm income increasing fast enough to meet your needs?
- 7) Have you reached the business goals set for 1984 and have you set new goals for 1985?
