1985 DAIRY FARM BUSINESS SUMMARY
Eastern Plateau Region*

Introduction

Dairy farmers throughout the State have been participating in New York Cooperative Extension's farm business summary and analysis program since the early 1950's. Each participating farmer receives a complete summary and analysis of his or her farm business in addition to this publication. The information in this report is compiled by averaging data submitted from the region described at the bottom of this page.

Program Objective

The primary objective of the dairy farm business summary, DFBS, is to provide farm managers information concerning profitability, financial condition, productivity, and efficiency to be used to assist them in delineating the strengths/weaknesses of the farm business and to improve decision-making. In short, DFBS identifies the records farmers need and provides information to be used in making business and financial management decisions.

Program Improvements

The 1985 DFBS report features improved accrual accounting procedures, a new measure of farm profitability, a more indepth balance sheet, an annual cash flow statement, and several major improvements in the business analysis format and the analysis measures used. These and other changes are identified in the body of this report.

The revised format provides one full page for the analysis of the farm cropping program and another for complete analysis of the dairy program. Corn and hay crop related expenses are evaluated separately for cooperating farmers. The cost of producing milk per cow and per hundredweight of milk sold has been compiled. An annual cash flow worksheet has been added to the farmer's individual report. The popular Progress of The Farm Business report has been moved to page one of the farmer's report and added to this publication.

Micro DFBS, which allows Cooperative Extension agents and specialists to calculate and print individual farm business reports in their offices, is now being used by more than 50 percent of our dairy farm management field staff. This innovative program provides faster processing of farm record data and increased use of DFBS in farm management programs.

*This summary was prepared by Linda D. Putnam and Robert A. Milligan, Department of Agricultural Economics, New York State College of Agriculture and Life Sciences, Cornell University, in cooperation with Cooperative Extension Agents Carl Crispell, Joe Dell, Tom Donnelly, Bill Gengenbach, and Jerry LeClair. The Eastern Plateau Region is comprised of Broome, Chemung, Chenango, Delaware, Otsego, Schuyler, Tioga, and Tompkins Counties.

SUMMARY OF THE FARM BUSINESS

Business Characteristics

Finding the right management strategies is an important part of farming. Various combinations of farm resources, enterprises, business arrangements, and management techniques are used by the dairy farmers in this region. The following table shows important farm business characteristics and the number of farmers reporting these characteristics.

BUSINESS CHARACTERISTICS
60 Eastern Plateau Region Dairy Farms, 1985

<u>Type of Farm</u>	<u>Number</u>	<u>Type of Business</u>	<u>Number</u>
Dairy	58	Single proprietorship	44
Part-time dairy	2	Partnership	16
Dairy cash-crop	0	Corporation	0
Part-time cash-crop dairy	0	Other	0
<u>Type of Ownership</u>	<u>Number</u>	<u>Type of Barn</u>	<u>Number</u>
Owner	52	Stanchion	45
Renter	8	Freestall	14
		Other	1
<u>Milking System</u>	<u>Number</u>	<u>Business Record System</u>	<u>Number</u>
Bucket & carry	1	CAMIS	4
Dumping station	6	Account book	28
Pipeline	39	Agrifax (mail-in only)	6
Herringbone parlor	13	On-Farm Computer	2
Other parlor	1	Other	20
<u>Dairy Records Service</u>	<u>Number</u>		<u>Number</u>
DHIC	42	Other	4
O.S.	8	None	6
<u>Milk Diversion Program Participants</u>		<u>Number:</u>	6

The averages used in this report were compiled using data from all the participating dairy farms in this region unless noted otherwise. There may be regular dairy farms, part-time farms, dairy cash-crop farms, farm renters, partnerships, and corporations included in the average. These specific classifications are used to separate farms in the State Business Summary.

A part-time farm has less than 12 months of labor from all operators.

A dairy cash-crop farm has income from crop sales that exceed 10 percent of milk sales.

A farm renter owns no farm real estate at the end of the year or owns no tillable land.

Milk Diversion Program Participants are the farmers that were in the 1984-85 federal milk diversion program. These farms have also been included in the regional summary averages.

Income Statement

The revised accrual income statement begins with an accounting of all farm business expenses.

CASH AND ACCRUAL FARM EXPENSES
60 Eastern Plateau Region Dairy Farms, 1985

Expense Item	Cash Paid	Change in + Inventory	Change in + Accounts Payable	Accrual = Expenses
<u>Hired Labor</u>	\$ 11,334		\$ -5	\$ 11,329
<u>Feed</u>				
Dairy grain & conc.	37,823	\$-258	-196	37,369
Dairy roughage	1,134	0	0	1,134
Other livestock	1,644	18	19	1,681

Fertilizer & lime	6,945	-26	100	7,019
Seeds & plants	2,106	-61	33	2,078
Spray, other crop exp.	2,029	126	-41	2,114
<u>Real Estate</u>				
Land/bldg./fence repair	1,814		15	1,829
Taxes	3,686		311	3,997
Insurance	2,323		7	2,330
Rent & lease	2,760		-67	2,693
<u>Other</u>				
Telephone (f.s.)	611		10	621
Electricity (f.s.)	3,732		57	3,789
Interest paid	14,138		-20	14,118
Miscellaneous	1,878	3	-96	1,785
Total Operating	\$129,398	\$ 99	\$ 138	\$129,635
Expansion livestock	\$ 652		\$ 0	\$ 652
Machinery depreciation				12,324
Building depreciation				5,629
TOTAL ACCRUAL EXPENSES				\$148,240

Cash paid is the actual amount of money paid out during the year and does not necessarily represent the cost of goods and services actually used.

Accrual expenses are the costs of inputs actually used in this year's production. The value of feed and supplies used out of inventory are included as are the costs of inputs purchased but not paid for (net increases in accounts payable). Items paid for and not used (net additions to inventory) are excluded from accrual expenses as are payments made on inputs used in a prior year (net decreases in accounts payable).

Worksheets are provided to enable any dairy farmer to compute his or her accrual farm income and compare it with the averages on the opposite page.

Expansion livestock	_____	_____	_____	_____
Machinery depreciation	_____	_____	_____	_____
Building depreciation	_____	_____	_____	_____
TOTAL ACCRUAL EXPENSES	\$ _____	\$ _____	\$ _____	\$ _____

Cash paid is the actual amount of money paid out during the year and does not necessarily represent the cost of goods and services actually used.

Accrual expenses are the costs of inputs actually used in this year's production. Purchased feed and supplies used out of inventory must be included. Beginning of year less end of year purchased feed and supply inventory equals the change in inventory to include in accrual expenses. Feed, supplies, and services used but not paid for must be included by adding the net increase in operating accounts payable. Increases in operating accounts payable are determined by subtracting the balance at the beginning of the year from the end of year balance.

CASH AND ACCRUAL FARM RECEIPTS
60 Eastern Plateau Region Dairy Farms, 1985

Receipt Item	Cash Receipts	Change in + Inventory	Change in Accounts + Receivable	Accrual Receipts
Milk sales	\$142,702		\$-327	\$142,375
Dairy cattle	9,654	\$2,458	13	12,125
Dairy calves	1,768		0	1,768
Other livestock	362	-22	0	340
Crops	970	1,744	5	2,719
Government receipts	1,994		-453	1,541
Custom machine work	346		49	395
Gas tax refund	146		0	146
Other	<u>2,851</u>	<u> </u>	<u>87</u>	<u>2,938</u>
Total Accrual Receipts	\$160,793	\$4,180	\$-626	\$164,347

Cash receipts includes the gross value of milk checks received during the year plus all other payments received for the sale of farm products, services, and government programs.

Accrual receipts represent the value of all farm commodities produced and services actually provided by the farmer during the year. Increases in live-stock inventory caused by herd growth and/or quality, are included as accrual receipts. Decreases in inventory caused by herd reduction are deducted. Changes in inventories of crops grown are accounted for in accrual receipts. Changes in accounts receivable include the January milk check for this December's marketings compared with the previous January's check, and other delayed payments.

CASH AND ACCRUAL FARM RECEIPT WORKSHEET

Receipt Item	Cash Receipts	Change in + Inventory	Change in Accounts + Receivable	Accrual Receipts
Milk sales	\$ _____	\$ _____	\$ _____	\$ _____
Dairy cattle	_____	_____	_____	_____
Dairy calves	_____	_____	_____	_____
Other livestock	_____	_____	_____	_____
Crops	_____	_____	_____	_____
Government receipts	_____	_____	_____	_____
Custom machine work	_____	_____	_____	_____
Gas tax refund	_____	_____	_____	_____
Other	_____	_____	_____	_____
Total Accrual Receipts	\$ _____	\$ _____	\$ _____	\$ _____

To calculate the change in inventory to be included in the above worksheet, subtract the beginning of year values from the end of year values excluding appreciation. The changes in inventories caused by declining prices must be excluded from the calculation of accrual receipts. Changes in accounts receivable are also determined by subtracting beginning of year balances from end of year balances.

Profitability Analysis

Farm owners/operators contribute labor, management, and capital to their businesses and the best combination of these resources produces optimum profits. Farm profits can be measured as the return to all family resources or as the return to one or more individual resources such as labor and management.

Net farm income is the total combined return to the farm operator(s) and other unpaid family members for their labor, management, and equity capital. It is the farm family's net annual return from working, managing, financing, and owning the farm business. This is not a measure of cash available from the year's business operation. Cash flow is evaluated later in this report.

Net farm income is computed with and without appreciation. Appreciation represents the change in livestock, machinery, and real estate inventory values caused by changes in prices during the year. Appreciation is a major factor contributing to changes in farm net worth and must be included in the profitability analysis.

NET FARM INCOME 60 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm
Total accrual receipts	\$164,347	\$ _____
Appreciation: Livestock	-8,378	_____
Machinery	3,699	_____
Real Estate	5,501	_____
Total Including Appreciation	\$165,169	\$ _____
Total accrual expenses	148,240	- _____
Net Farm Income (with appreciation)	\$ 16,929	\$ _____
Net Farm Income (without appreciation)	\$ 16,107	\$ _____

Return to operator(s') labor, management, and equity capital measures the total business profits for the farm operators. It is calculated by deducting a charge for unpaid family labor from net farm income. Operator(s') labor is not included in unpaid family labor. Return to operator(s') labor, management, and equity capital has been compiled with and without appreciation. Appreciation is considered an important part of the return to ownership of farm assets.

RETURN TO OPERATOR(S') LABOR, MANAGEMENT, AND EQUITY 60 Eastern Plateau Region Dairy Farms, 1985

Item	Average		My Farm	
	Without Apprec.	With Apprec.	Without Apprec.	With Apprec.
Net farm income	\$16,107	\$16,929	\$ _____	\$ _____
Family labor unpaid @ \$550 per month	2,200	2,200	- _____	- _____
Return to operator(s') labor, management, & equity	\$13,907	\$14,729	\$ _____	\$ _____

Labor and management income is the share of net farm income without appreciation returned to the operator(s') labor and management. Appreciation is not included as part of the return to labor and management. Labor and management income is determined by deducting the cost of using equity capital at a real interest rate of five percent, from the return to operator(s') labor, management, and equity capital excluding appreciation. The interest charge reflects the long-term average rate of return that a farmer might expect to earn in comparable risk investments in a low inflation economy.

Labor and management income per operator measures the return to each operator's labor and management.

LABOR AND MANAGEMENT INCOME
60 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm
Return to operator(s') labor, management, & equity without appreciation	\$13,907	\$ _____
Real interest @ 5% on \$245,567 equity capital	<u>12,278</u>	- _____
Labor & Management Income (1.33 operators)	\$1,629	\$ _____
Labor & Management Income per Operator	\$1,221	\$ _____

Return on equity capital measures the net return remaining for the farmer's equity or owned capital after a charge has been made for the owner-operator's labor and management. The earnings or amount of net farm income allocated to labor and management is the opportunity cost or value of operator(s') labor and management estimated by the cooperators. Return on equity capital is calculated with and without appreciation. The rate of return on equity capital is determined by dividing the amount returned by the end of year farm net worth or equity capital.

RETURN ON EQUITY CAPITAL
60 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm
Return to operator(s') labor, management, & equity capital with appreciation	\$14,729	\$ _____
Value of operator(s') labor & management	<u>20,387</u>	- _____
Return on equity capital with appreciation	\$-5,658	\$ _____
Rate of return on equity capital with appreciation	-2.3%	_____
Return on equity capital without appreciation	\$-6,480	\$ _____
Rate of return without appreciation	-2.6%	_____

Farm and Family Financial Status

Evaluating the financial status of the farm business and the farm family is an important part of business analysis. The first step is to recognize all the assets and liabilities that make up the balance sheet. The second step is to analyze your filled out balance sheet by evaluating changes made during the year.

1985 FARM BUSINESS & NONFARM BALANCE SHEET 60 Eastern Plateau Region Dairy Farms, 1985

Farm Assets			Farm Liabilities & Net Worth		
	Jan. 1	Dec. 31		Jan. 1	Dec. 31

Balance sheet analysis continues by examining financial and debt ratios and factors measuring levels of debt. Percent equity is calculated by dividing net worth by assets. The debt to asset ratio is compiled by dividing liabilities by assets. Low debt to asset ratios reflect strength in solvency and the potential capacity to borrow. The debt analysis ratios show how well the debt is structured and managed.

BALANCE SHEET ANALYSIS
60 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm		
<u>Change in Farm Net Worth:</u>				
From Balance Sheet	-\$3,525	\$ _____		
Excluding Appreciation	-\$4,347	\$ _____		
<u>Financial Ratios - Farm:</u>				
Percent equity	61%	_____ %		
Debt/asset ratio: total	0.39	_____

Percent equity	63%	_____ %		
Total debt/asset ratio	0.37	_____		
<u>Farm Debt Analysis:</u>				
Accounts payable as % of total debt	4%	_____ %		
Long-term liabilities as a % of total debt	57%	_____ %		
Current & inter. liab. as a % of total debt	43%	_____ %		
<u>Farm Debt Levels:</u>	<u>Per Cow</u> <u>Per Tillable Acre Owned</u>	<u>Per Cow</u> <u>Per Tillable Acre Owned</u>		
Total farm debt	\$2,074	\$1,271	\$ _____	\$ _____
Long-term debt	1,180	723	_____	_____
Intermediate & current debt	894	548	_____	_____

Balance sheet analysis concludes with a summary of the inventory balancing procedure for farm real estate and machinery and equipment. It is important to account for the value of these assets used on the balance sheet and the changes that occur from the beginning to end of year. Changes in the livestock inventory are included in the dairy analysis.

Cash Flow Summary and Analysis

Completing an annual cash flow summary and analysis is important to determine how well the cash generated by the business, plus that brought in from outside, met the annual cash needs of the business and the farm family. Understanding last year's cash flow is the first step toward planning and managing cash flow for the current and future years.

The Annual Cash Flow Statement in the following table is structured to compare all the cash inflows with all the cash outflows for the year. Cash inflows include all the cash farm receipts, receipts from the sale of farm assets, additional funds borrowed, as well as the amount of cash available at the beginning of the year. Cash outflows include all the cash farm expenses, capital purchases, principal payments, money taken out of the business, and the cash balance left at year's end. When all the cash inflows and outflows are correct, the statement will balance. If the imbalance (error) amount is positive, recorded cash inflows exceed outflows by this amount. If it is negative, cash outflows are too high in relation to inflows.

ANNUAL CASH FLOW STATEMENT 60 Eastern Plateau Region Dairy Farms, 1985

<u>Item</u>	<u>Average</u>	<u>My Farm</u>
<u>Cash Inflows</u>		
Beginning farm cash, checking & savings	\$ 3,601	\$ _____
Cash farm receipts	160,793	_____
Sale of assets: Machinery	335	_____
Real estate	183	_____
Money borrowed (intermediate & long-term)	19,128	_____
Money borrowed (short-term)	1,337	_____
Increase in operating debt	876	_____
Nonfarm income	2,303	_____
Money borrowed - nonfarm	425	_____
Total	\$188,981	\$ _____
<u>Cash Outflows</u>		
Cash farm expenses	\$129,398	\$ _____
Capital purchases: Expansion livestock	652	_____
Machinery	10,658	_____
Real estate	5,043	_____
Principal payments (intermediate & long-term)	16,172	_____
Principal payments (short-term)	996	_____
Decrease in operating debt	0	_____
Nonfarm debt payments	623	_____
Personal withdrawals & family exp.	11,492	_____
Ending farm cash, checking & savings	3,447	_____
Total	\$178,477	\$ _____
Imbalance (error)	\$ 10,504	\$ _____

Repayment Analysis

The second step of cash flow planning is to compare and evaluate debt payments planned and made last year, and estimate the payments required in the current year. It is helpful to compare and evaluate by using debt payments per unit of production and receipt/debt payment ratios.

FARM DEBT PAYMENTS PLANNED

Same 49 Eastern Plateau Region Dairy Farms, 1985 and 1986

Debt Payments	Average		Planned 1986	My Farm		Planned 1986
	1985 Payments Planned	Made		1985 Payments Planned	Made	
Long-term	\$12,274	\$13,667	\$12,205	\$_____	\$_____	\$_____
Intermediate-term	18,069	18,723	18,338	_____	_____	_____
Short-term	4,436	1,348	1,396	_____	_____	_____
Operating (net reduction)	0	0	295	_____	_____	_____
Accounts payable (net reduction)	<u>2,379</u>	<u>1,099</u>	<u>871</u>	_____	_____	_____
Total	\$37,158	\$34,837	\$33,106	\$_____	\$_____	\$_____
Per cow	\$492	\$461		\$_____	\$_____	
Per cwt. 1985 milk	\$3.27	\$3.06		\$_____	\$_____	
Percent of total 1985 receipts	22%	21%		_____	_____	
Percent of 1985 milk receipts	26%	24%		_____	_____	

The Cash Flow Coverage Ratio measures the ability of the farm business to meet its planned debt payment schedule. The ratio shows the percentage of planned payments that could have been made with last year's available cash flow. Farmers that did not participate in DFBS last year will find in their report a cash flow coverage ratio based on this year's planned debt payments.

CASH FLOW COVERAGE RATIO

Same 49 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm
Cash farm receipts	\$164,749	\$_____
- Cash farm expenses	132,582	_____
+ Interest paid	15,603	_____
- Net personal withdrawals from farm*	<u>9,837</u>	_____
(A) = Amount Available for Debt Service	\$ 37,933	\$_____
(B) = Debt Payments Planned for 1985	\$ 37,158	\$_____
(A + B) = Cash Flow Coverage Ratio for 1985	1.02	_____

*Personal withdrawals and family expenditures less nonfarm income. If family withdrawals are excluded the cash flow coverage ratio will be incorrect.

ANALYSIS OF THE FARM BUSINESS

The farm business has been divided into three parts to allow a more indepth analysis of the cropping program, the dairy program, and the factors affecting capital and labor efficiency.

Cropping Program Analysis

The cropping program is an important part of the dairy farm business and sometimes it is overlooked and neglected. A complete evaluation of available land resources, how they are being used, how well crops are producing and what it costs to produce them, is required to evaluate alternative cropping and feed purchasing choices.

LAND RESOURCES AND CROP PRODUCTION
60 Eastern Plateau Region Dairy Farms, 1985

Item	Average			My Farm		
<u>Land</u>	<u>Owned</u>	<u>Rented</u>	<u>Total</u>	<u>Owned</u>	<u>Rented</u>	<u>Total</u>
Tillable	124	95	219	_____	_____	_____
Nontillable	80	31	112	_____	_____	_____
Other nontillable	97	19	116	_____	_____	_____
Total	301	145	447	_____	_____	_____
<u>Crop Yields</u>	<u>Farms</u>	<u>Acres</u>	<u>Prod/Acre</u>	<u>Acres</u>	<u>Prod/Acre</u>	
Hay crop	60	134	2.3 tn DM	_____	_____	tn DM
Corn silage	54	54	13.9 tn	_____	_____	tn
			4.6 tn DM	_____	_____	tn DM

Total forage	60	184	2.9 tn DM	_____	_____	tn DM
Corn grain	15	84	96 bu	_____	_____	bu
Oats	8	23	65 bu	_____	_____	bu
Wheat	1	21	69 bu	_____	_____	bu
Other crops	6	19		_____	_____	
Tillable pasture	11	29		_____	_____	
Idle	12	16		_____	_____	
Total Tillable Acres		219		_____	_____	

Average crop acres and yields compiled for the region are for the number of farms reporting each crop. Yields of forage crops have been converted to tons of dry matter using dry matter coefficients reported by the farmers. Grain production has been converted to bushels of dry grain equivalent based on dry matter information provided.

The following measures of crop management measure how efficiently the land resource is being used and how well total forage requirements are being met.

CROP MANAGEMENT FACTORS
60 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm
Total tillable acres per cow	2.96	_____
Total forage acres per cow	2.49	_____
Harvested forage dry matter, tons per cow	7.26	_____

Cropping Program Analysis (continued)

A substantial number of cooperators have allocated crop expenses to hay crop, corn, and other crop production. This additional data has been compiled to show the traditional crop expenses per acre and per production unit for these crops. Corn production has been converted to corn silage equivalent using 5.88 bushels of dry shell equivalent to equal one ton of corn silage as fed.

CROP RELATED ACCRUAL EXPENSES
60 Eastern Plateau Region Dairy Farms, 1985

Expense	Total Per Till. Acre	Hay Crop*		Corn* Per Acre	Per Ton Corn Silage Equiv.**	Other Crops* Per Acre
		Per Acre	Per Ton DM			
Fertilizer & lime	\$32.09	\$20.60	\$5.02	\$ 65.04	\$2.55	\$ 49.91
Seeds & plants	9.50	3.54	0.86	17.86	0.70	47.37
Spray & other crop expense	<u>9.67</u>	<u>1.66</u>	<u>0.41</u>	<u>29.32</u>	<u>1.15</u>	<u>25.31</u>

*Hay: 31 farms reporting, 146 average acres; corn: 27 farms reporting, 90 average acres; other crops: 12 farms reporting, 10 average acres.

**Corn grain converted to silage equivalent using 5.88 bushels = one ton silage as fed.

Most machinery costs are associated with crop production and should be analyzed with the crop enterprise. Total machinery expenses include the major fixed costs (interest and depreciation), as well as the accrual operating costs. Although machinery costs have not been allocated to individual crops, they are shown per total tillable acre.

ACCRUAL MACHINERY EXPENSES
60 Eastern Plateau Region Dairy Farms, 1985

Machinery Expense Item	Average		My Farm	
	Total Expenses	Per Til. Acre	Total Expenses	Per Til. Acre

Total	\$30,230	\$138.21	\$_____	\$_____

Dairy Program Analysis

Analysis of the dairy enterprise can tell a great deal about the strengths and weaknesses of the dairy farm business. Changes in dairy herd size and market values that occur during the year are identified in the table below. The change in inventory value without appreciation is attributed to physical changes in herd size and quality. This real increase in inventory has been included as an accrual farm receipt on page 5.

DAIRY HERD INVENTORY
60 Eastern Plateau Region Dairy Farms, 1985

Item	Dairy Cows		Heifers	
	Number	Value	Number	Value
Beginning of year (owned)	73	\$65,955	57	\$27,004

+ Appreciation	_____	_____	_____	_____
End of year (owned)	_____	_____	_____	_____
End including leased	_____	_____	_____	_____
Average number	_____	\$ _____	_____	\$ _____

Total milk sold and milk sold per cow are extremely valuable measures of productivity on the dairy farm. These measures of milk output are based on pounds of milk marketed during the year.

MILK PRODUCTION
60 Eastern Plateau Region Dairy Farms, 1985

Item	Average	My Farm
Total milk sold, lbs.	1,112,055	_____
Milk sold per cow, lbs.	15,051	_____
Average milk plant test, percent butterfat	3.61%	_____

The cost of producing milk has been compiled using the whole farm method, and is featured in the following table. Accrual receipts from milk sales can be compared with the accrual costs of producing milk per cow and per hundredweight of milk. Using the whole farm method, operating costs of producing milk are estimated by deducting nonmilk accrual receipts from total accrual operating expenses. Total costs of producing milk include the operating costs plus expansion livestock purchased, depreciation on machinery and buildings, the value of operator(s') labor and management, and the interest charge for using equity capital. Note that the cost of labor, management, and equity capital has been excluded in the intermediate compilation.

ACCRUAL RECEIPTS FROM DAIRY AND COST OF PRODUCING MILK
60 Eastern Plateau Region Dairy Farms, 1985

Item	Total	Average		Total	My Farm	
		Per Cow	Per Cwt.		Per Cow	Per Cwt.

PROGRESS OF THE FARM BUSINESS

Comparing your business with average data from regional DFBS co-operators that participated in both of the last two years is one part of a business checkup. It is equally important for you to determine the progress your business has made over the past two or three years and to set targets or goals for the future.

PROGRESS OF THE FARM BUSINESS

Same 49 Eastern Plateau Region Dairy Farms, 1984 and 1985

Selected Factors	Average		My Farm		Goal

Debt to asset ratio	0.40	0.42			
Farm debt per cow	\$2,209	\$2,273			

*Average for the year.

Farm Business Chart

The Farm Business Chart is a tool which can be used in analyzing a business by drawing a line through the figure in each column which represents the current level of management performance. The figure at the top of each column is the average of the top 10 percent of the 458 farms for that factor. The other figures in each column are the average for the second 10 percent, third 10 percent, etc. Each column of the chart is independent of the others. The farms which are in the top 10 percent for one factor would not necessarily be the same farms which make up the top 10 percent for any other factor.

FARM BUSINESS CHART FOR FARM MANAGEMENT COOPERATORS 458 New York Dairy Farms, 1984

Size of Business			Rates of Production			Labor Efficiency	
Worker Equiv- alent	No. of Cows	Pounds Milk Sold	Pounds Milk Sold Per Cow	Tons Hay Crop DM/Acre	Tons Corn Silage Per Acre	Cows Per Worker	Pounds Milk Sold Per Worker
6.8	255	4,211,900	18,800	4.7	20	45	697,300
4.3	138	2,118,100	17,300	3.7	18	36	560,900
3.6	100	1,551,500	16,500	3.3	16	33	503,900
3.1	83	1,287,200	15,900	2.9	15	30	456,100
2.8	72	1,090,400	15,300	2.7	14	28	423,300
2.5	63	950,300	14,800	2.5	13	26	392,200
2.2	56	818,600	14,200	2.3	12	25	361,400
2.0	49	691,500	13,400	2.0	12	23	328,000
1.7	43	577,800	12,200	1.7	10	20	275,500
1.4	33	395,200	10,000	1.3	8	16	191,300

Feed Bought Per Cow	% Feed is of Milk Receipts	Machinery Costs Per Cow	Labor & Machinery Costs Per Cow	Feed & Crop Expenses Per Cwt. Milk
\$214	11%	\$205	\$ 511	\$2.75
306	16	286	610	3.47
369	19	337	662	3.87
432	22	379	713	4.21
474	25	408	771	4.45
523	27	445	818	4.68
574	28	481	873	4.97
624	31	519	928	5.31
685	33	580	1,004	5.72
809	40	765	1,201	6.73

The cost control factors are ranked from low to high, but the lowest cost is not necessarily the most profitable. In some cases, the "best" management position is somewhere near the middle or average. Many things affect the level of costs, and must be taken into account when analyzing the factors.

Financial Analysis Chart

The farm financial analysis chart is designed just like the Farm Business Chart and may be used to measure the financial health of the farm business. Most of the financial measures used in the chart are presented on pages 7, 10, 12, and 17 of this publication.

FINANCIAL ANALYSIS CHART 458 New York Dairy Farms, 1984

MEASURE YOUR PERFORMANCE

After you have entered your farm business data on the pages of this workbook, categorize your farm business performance into three groups. List the strong points, those which indicate average performance, and those areas which need improvement. Your business factors that exceed the regional average should be listed as strong points, factors that are close to the regional average should be identified as average, and factors that are below average should be listed under need improvement.

The Farm Business Chart on page 20 and the Financial Analysis Chart on page 21 can be used to identify strengths and weaknesses by comparing your business with a large number of New York dairy farms summarized for the previous year. It is recommended that you use more than one standard for comparison when analyzing the farm business.

STRONG POINTS:

AVERAGE:

NEED IMPROVEMENT:

After identifying opportunities for improvement, consider alternative ways of solving each problem. List each alternative and analyze the consequences in detail. Cooperative Extension conducts many schools, meetings, and provides many printed materials that should be of assistance. Local agribusinesses often provide helpful information and assistance. Seek out information related to the problem under consideration.

Another way to measure your management performance is to compare your current business factors with those from previous years. Page 19 is provided for this purpose. Answering the following questions may also help evaluate your farm business progress.

1. Do livestock number, labor force, and crop acres make up a well balanced unit of resources?
2. Have rates of production shown a steady increase?
3. When will milk output per worker reach 700,000 pounds?
4. Have some costs of production declined over the last two years?
5. Is net farm income improving fast enough to meet your needs?
6. Is growth in net worth keeping up with increased capital investment?
7. Have you reached the business goals set for 1985 and have you set new goals for 1986?
