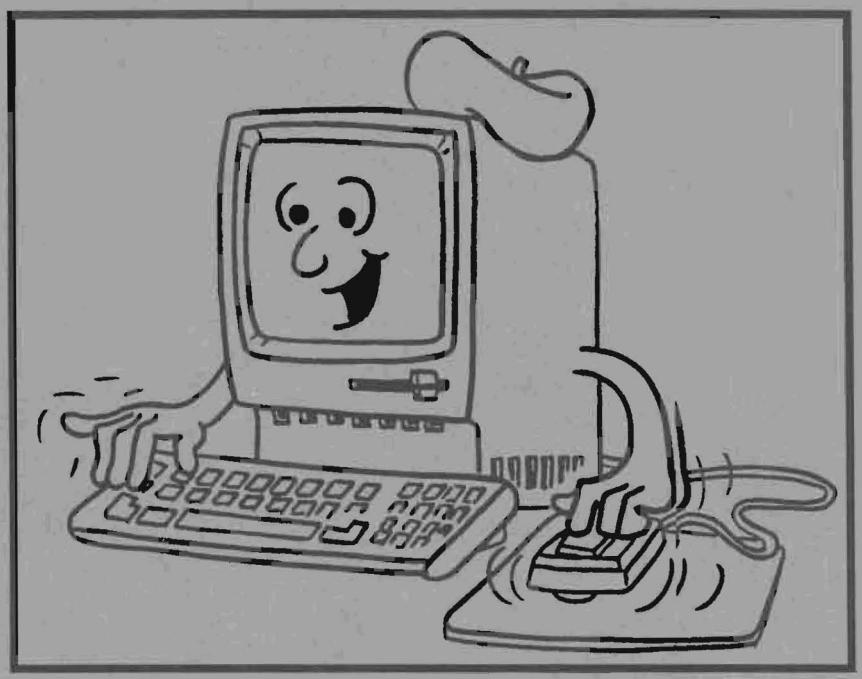
January 1998 E.B. 98-02

MICRO DFBS



A Guide to Processing Dairy Farm Business Summaries in County and Regional Extension Offices for

Micro DFBS Version 4.1

Linda D. Putnam
Wayne A. Knoblauch

Department of Agricultural, Resource, and Managerial Economics
College of Agriculture and Life Sciences
Cornell University, Ithaca, New York 14853

It is the Policy of Cornell University actively to support equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of any legally prohibited discrimination involving, but not limited to, such factors as race, color, creed, religion, national or ethnic origin, sex, age or handicap. The University is committed to the maintenance of affirmative action programs which will assure the continuation of such equality of opportunity.

TABLE OF CONTENTS

INTRODUCTION

This publication is a guide to using the Microcomputer Dairy Farm Business Summary (Micro DFBS) computer program for analyzing the financial and production performance of individual dairy farm businesses. County Cooperative Extension agents and regional specialists are the intended audience, however, college faculty in other states may also find this publication of value. Farm business summary and analysis projects have long been a basic part of the agricultural Extension program in New York State. Records submitted by New York State dairy farmers provide the basis for many Extension educational programs and the data for applied research studies and classroom teaching.

Extension offices have the capability to strengthen their dairy farm business analysis activities by calculating and printing the individual farm summaries for immediate use by the agent and farmer, at any time. After entry in the county, individual farm data are sent to the Department of Agricultural, Resource, and Managerial Economics at Cornell University for additional review prior to calculation of county, regional, and State summaries.

HARDWARE REQUIREMENTS

Version 4.1 of the Micro DFBS program will run on IBM and IBM-compatible computers with a 386 processor (or higher) with a minimum of 640K of random-access memory (RAM), 5 megabytes of free disk space, and at least one floppy disk drive. The WINDOWS™ 3.1[1] or higher operating system is needed.

Printers vary from one Extension office to another, and an effort is made to make the program work with as many printers as possible. Most printers capable of printing 10 characters per inch and 66 lines per page should work. Micro DFBS version 4.1 uses the default printer specified in the Windows™ Print Manager.

Each farm summary printout is 12 pages long and you typically need three copies -- one for the farmer, one for your county or regional Extension office file, and one to send to Cornell for the regional and State summaries.

VERSION 4.1 REVISIONS

Revisions made for Micro DFBS Version 4.1 include the following:

1. Worksheet screens have been added for grown feed inventory, changes in accounts receivable, and changes in accounts payable. Enter data in the worksheet screens and the totals will automatically carry over to the appropriate screens.
2. "Set screen directory" is an option added to the utility menu. You may have the data in a directory other than c:\dfbs\database (including the a: or b: drive). The program defaults to c:\dfbs\database so you will have to run "set screen directory" each time you use the program if you wish to use a directory other than the default for your data.
3. There is a "recalculate" box to check when you select "Single Farm Report". Check this box whenever you have made updates in your data before printing the report. The files oldcalc.dbf, oldcalc2.dbf and oldcp.dbf will be updated with the calculated values.
4. The "Condensed Balance Sheet Including Deferred Taxes" is now operational. If a farm has data for deferred taxes in Screen 14, select "Opt. Cond. Bal. St." from the "Choose pages" drop-down box in the Report window.
5. bST has been added to the supply inventory in Screen 3 and expenses in Screen 13.

---

[1] Windows is a trademark of Microsoft Corporation.

6. The constant used for the value of unpaid family labor and value of operator's labor is $1,550 per month. This is based on the wage rate for all hired farm workers reported by the New York Agricultural Statistics Service.

7. The discount rates used in calculation of lease assets and liabilities are 8.75 percent at the beginning of year, and 9.25 percent at the end of the year. These are the typical interest rates paid by farm borrowers during the year.

USING MICRO DFBS

This tutorial section will serve as a learning guide and "hands-on" exercise in using Micro DFBS. The user becomes familiar with the operation of Micro DFBS by:

a) installing MicroDFBS Version 4.1
b) starting the program
c) typing information from a sample input form
d) calculating and printing a summary
e) preparing a diskette for shipment to Cornell

This tutorial assumes that a suitable microcomputer and printer are available and the user knows how to operate them. Microcomputer hardware requirements were explained above. If you are not familiar with the operation of your microcomputer and operating system, refer to your Windows™ User's Manual.

INSTALLING MICRO DFBS VERSION 4.1

You should have three installation disks and one data disk. You will need about 5 megabytes of hard disk space for the program and your data.

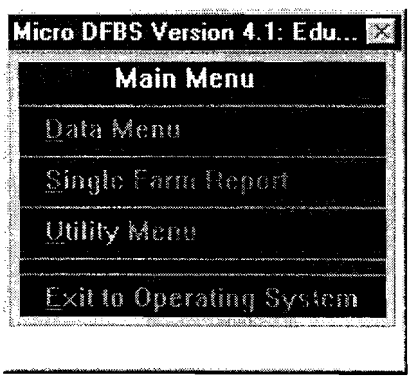
Insert the first installation disk in the floppy drive. From the Windows Program Manager, select **F**ile, **R**un. Type *a:install* in the space if the installation disk is in your A: drive; type *b:intall* if it is in your B: drive. Follow the directions on the screen. If you have an existing \dfbs directory, you may want to copy the contents to another directory before installing the new program.

When installation of the program is complete, copy the contents of the data disk to the \dfbs\database\ directory. Copy the files by using File Manager, Windows Explorer or DOS.

START THE PROGRAM

Double-click on the Micro DFBS Version 4.1 icon to start the program.

You should see the main menu.



The main menu shows the options available in DFBS. Select an option by clicking the mouse on your choice, or by typing the underlined letter.

Data Menu is selected when entering the input data for a new farm or when editting existing data.

Report Menu is selected when you want to print or view all or part of the 12-page calculated report.

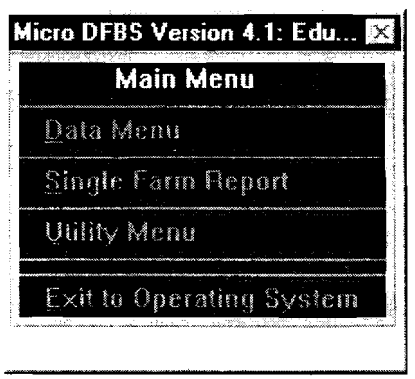
Utility Menu is selected when you need to delete a farm from the database or make backup copies of the database.

Exit to Operating System is selected to exit the Micro DFBS Verison 4.1 program and return to the Windows™ Program Manager.

ENTER THE INPUT DATA.[2]

The Data Menu option on the main menu is used to enter input data for a new farm or to change or display a previously entered farm record. Use the cursor keys (↑ or ↓), the mouse, or type a "d" (for data) to select the Data Menu option.

The Data Entry Menu is shown below.



"New Farm Input or Edit All Screens" is used when you are entering the farm data for the first time, even if the farm participated last year. Also use this option when proofreading or editing data when you want to move through all 14 input screens in sequential order.

"Edit Farm Using Single Screens" is used when you have previously entered the data for the farm and you want to go to selected screens.

"Return to Main Menu" exits the data entry menu.

Select "New Farm Input or Edit All Screens" by clicking on it with the mouse; or use the cursor key to highlight the option, then press <enter>.

The program will continue to Screen 1. The cursor begins in the field for "Year". The default year is one year less than the current date. For example, data entered in 1998 is assumed to be for a 1997 DFBS since that is the last complete calendar year. If you wish to do a DFBS for a different year, type it in the field "Year". If the year displayed is correct, press <enter> or click the mouse in the next field, Farm Number.

---

[2] See Appendix A for guidelines to completing the Dairy Farm Business Summary check-in form.

You will see a field to enter a farm number. The farm number assigned will be made up of your 2-digit county number, followed by a 3-digit number identifying the individual farm.[3]

Important - select farm numbers carefully following the recommended procedure. You must assign the same number to the same farm each year and assign a new number to a new farm. This is essential for the first page of the summary, "Progress of The Farm Business", and page 8, "Repayment Analysis", to work properly.

If you make an error entering data and you notice it before typing the ↵ (return/enter) key, you can correct the error by using the backspace key to erase the error, or the ← key or mouse to move the cursor back and type the correct entry. If you press ↵ (return/enter) before noticing the error, you can move back to the incorrect entry by using the ↑ key or mouse, and then retype the number.

The top of the first page of the sample farm check-in form is shown below. The sample farm number is 46007 and the number is written in the space labeled "Processing number".

CORNELL COOPERATIVE EXTENSION
DAIRY FARM BUSINESS SUMMARY
DATA CHECK-IN FORM

SCREEN 1.

Name *Henry Holstein* County *Suffolk*
Farm Name
Address *123 Dairy Lane*
Howardville, NY 12345-1234
Phone no. *607-255-8429*
Check if Certified Organic Milk Producer [X]
Year first became certified: *1996*

Proc. number *46007* Year 1997
(X)complete, ( ) entered, ( )ready
Update Screens:

Type the farm number:

46007 ↵

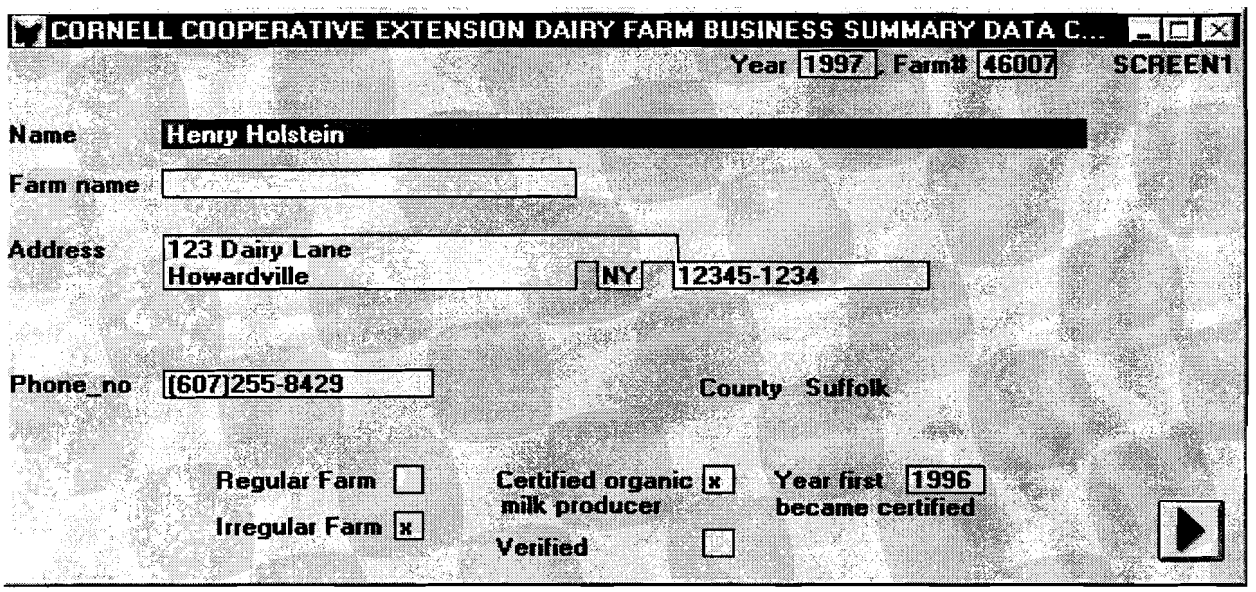
Micro DFBS will find the record for farm 46007. This record already contains data from the previous year, such as beginning of year inventory values and beginning of year assets and liabilities.

[3] Assign farm numbers for new cooperators from the list of available farm numbers provided by Cornell

Screen 1 contains the farm name, address, and phone number from the boxed-in area at the top of page 1 of the check-in form. Screen numbers 2 through 14 correspond to the other 13 boxed-in areas of the check-in form. Worksheet screens 3, 6, and 7 correspond to the worksheets by the same number on the check-in form.

Screen 1 should look like Screen 1 below. The farm number and county are already inserted for you and the cursor is at the operator's name.

Enter the farmer's name. There is no farm name, so enter ↵ (return/enter) to move to the address line and type the rest of the farm information, (use the sample farm information from above).



At the bottom of the screen, find the classifications "Regular" and "Irregular". The regular and irregular classifications indicate the accuracy and completeness of the information for determination of whether or not this farm will be included in the county, regional, and state summaries. Regular is included; irregular is not. Select the appropriate classification by clicking the mouse in the box and typing "X".

Also at the bottom of Screen 1 is a box to check if the farm is a certified organic milk producer. To check the box, click the mouse in the box and type "X". Type ↵ (return/enter) to move to the space for the year certified and enter the year.

The box labeled "Verified" is for Cornell use.

The entering of farm information in Screen 1 has now been completed. It is possible to change data in the screen at this point. For example, use the mouse or ↑ or ↓ keys to move the cursor to "Farm Name" and type:

Holstein Haven ↵ (return/enter)

There are three ways to get out of Screen 1 and move to the next screen:

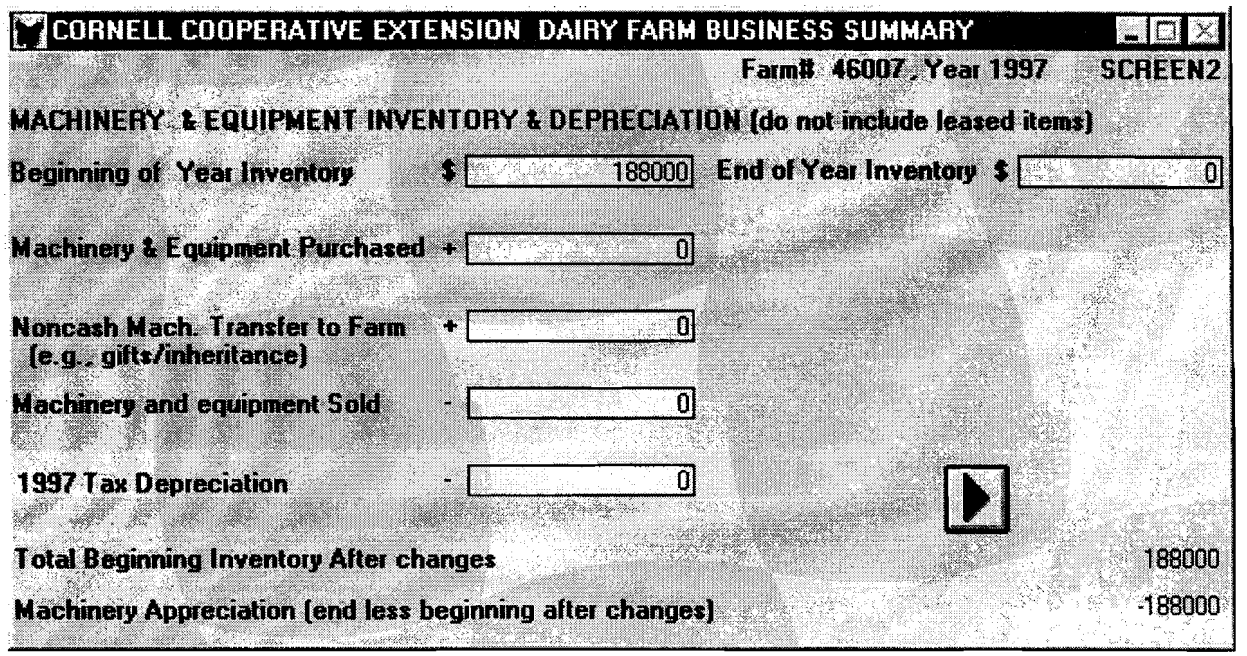
1) ↵ (return/enter). Keep pressing return until the cursor goes to the "proceed" ▶ button and then to the next screen.

2) ↓ key. Keep pressing the down arrow key until the cursor goes to the "proceed" ▶ button and then to the next screen.

3) Use the mouse to select the "proceed" ▶ button to go to the next screen.

Move to Screen 2 by clicking the mouse on the "proceed" ➢ button.

You should see Screen 2.



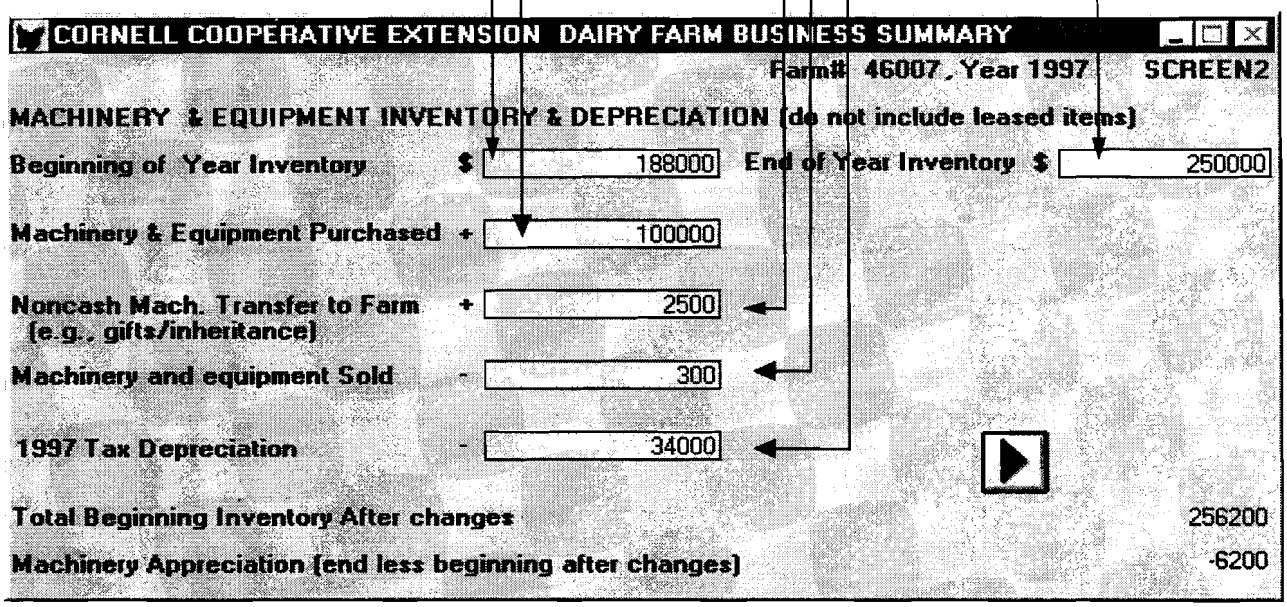
Part of page 1 of Henry Holstein's check-in sheet, the machinery inventory and depreciation information, is shown below. The arrows show where each item is typed into Screen 2 of Micro DFBS. If there were previous year's data, the beginning of year inventory value will be displayed. If this value does not need to be revised, press ↵ (return/enter) to move to the next item. If it needs to be changed, simply type the revised value over the existing one and ↵ (return/enter). Enter the data called for. Use ↵ (return/enter) to move from one item to the next one below. Do not type commas or spaces within or to the left of numbers. Use the mouse, cursor (↓) key, or ↵ (return/enter) to skip zero entries. The last two items are calculated by Micro DFBS. When you have entered all the data for Screen 2, advance to Worksheet 3 by clicking the mouse on the "proceed" button.

SCREEN 2.

MACHINERY & EQUIPMENT INVENTORY & DEPRECIATION (do not include leased items)

Beginning of Year Inventory	$ 188,000	End of Year Inventory	$ 250,000
Machinery & Equipment Purchased	+ 100,000		
Noncash Machinery Transfer to Farm (e.g., gifts & inheritances)	+ 2,500		
Machinery & Equipment Sold	- 300		
1997 Tax Depreciation[2]	- 34,000		
Total Beginning Inventory After Changes			$ 256,200
Machinery Appreciation (end less beginning after changes)			$ -6,200

[2]Exclude buildings and cattle from ACRS depreciation.



BAR MENU OPTIONS

The bar menu above the data input screen provides some useful options. These are selected by clicking the mouse on the menu item.

"Screens" allows you to open another data input screen for data entry or viewing. Click the mouse on the screen number you wish to open **(WHEN DONE WITH THE SCREEN, CLICK THE MOUSE ON THE PROCEED ➢ BUTTON TO CLOSE THE SCREEN. NOT CLOSING THE SCREEN COULD RESULT IN TOO MANY WINDOWS OPEN, AND COULD CAUSE AN UNEXPECTED CONDITION.)**

Choose "Database", then "Browse" to view the entire database for the data input screen. Use this option to **view** previous year's data for the farm you are working on, or to **view** data from other farms. Use the scroll panels along the bottom and right side of the screen to view the data. **Do not attempt to edit the data using Database, Browse.** See Appendix D for a listing of field names and a description of each field name. You may change the order in which the columns are displayed. Do this by clicking and holding the mouse on the field name at the top of the column you wish to move. Then drag the column to where you want it

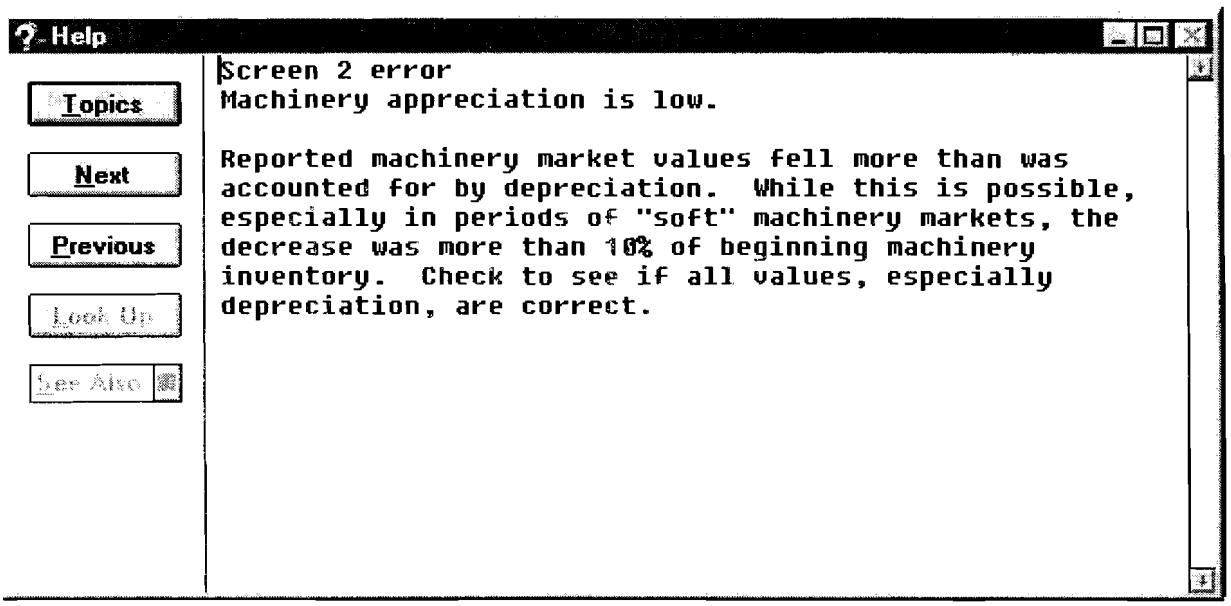
in the database and then let go of the mouse button. In this way you can position the fields you want to see next to each other. **(This does not change the structure of the database in any way. This only changes the way you view the data.)** To exit the "database" option, click the mouse on the control-menu box (appears as a red fox in Windows "95) in the upper left corner of the window, then select "next window" to go back to the data input screen. The column order will return to its original structure.

"Help" allows you to view diagnostic messages or make use of a calculator.

"Exit" returns you to the Data Entry Menu.

ON-SCREEN DIAGNOSTICS

As data are entered in the input screens, you may see a message in a box displayed in the upper right-hand corner. These are diagnostic statements that result from a series of checks performed on the data to look for values out of a range, missing data, or possibly incorrect data. When you see a diagnostic message displayed on the screen, check your data for accuracy. If you want more information than the diagnostic statement tells you, select "Help" from the bar menu above the screen. You will see a help screen as shown below.



Click the mouse on the "Topics" button to see the list of diagnostics by screen number. Press the "Help" button to return to the help screen. Click the mouse on the "Next" or "Previous" buttons to move down and up the list of diagnostic messages.

When finished using the help screen, be sure to close the window. Do this by clicking the mouse on the control-menu box in the upper left corner of the window, then select "Close". You may now continue with data entry.

To get back to the input screen when a diagnostic message is on the screen, click the mouse on the screen or type ↵ (return/enter).

COMPLETE THE DATA ENTRY

Screens 3 through 14 and Worksheets 3, 6, and 7 are handled in a similar way as Screen 2 and, are designed to resemble the check-in form as closely as possible.

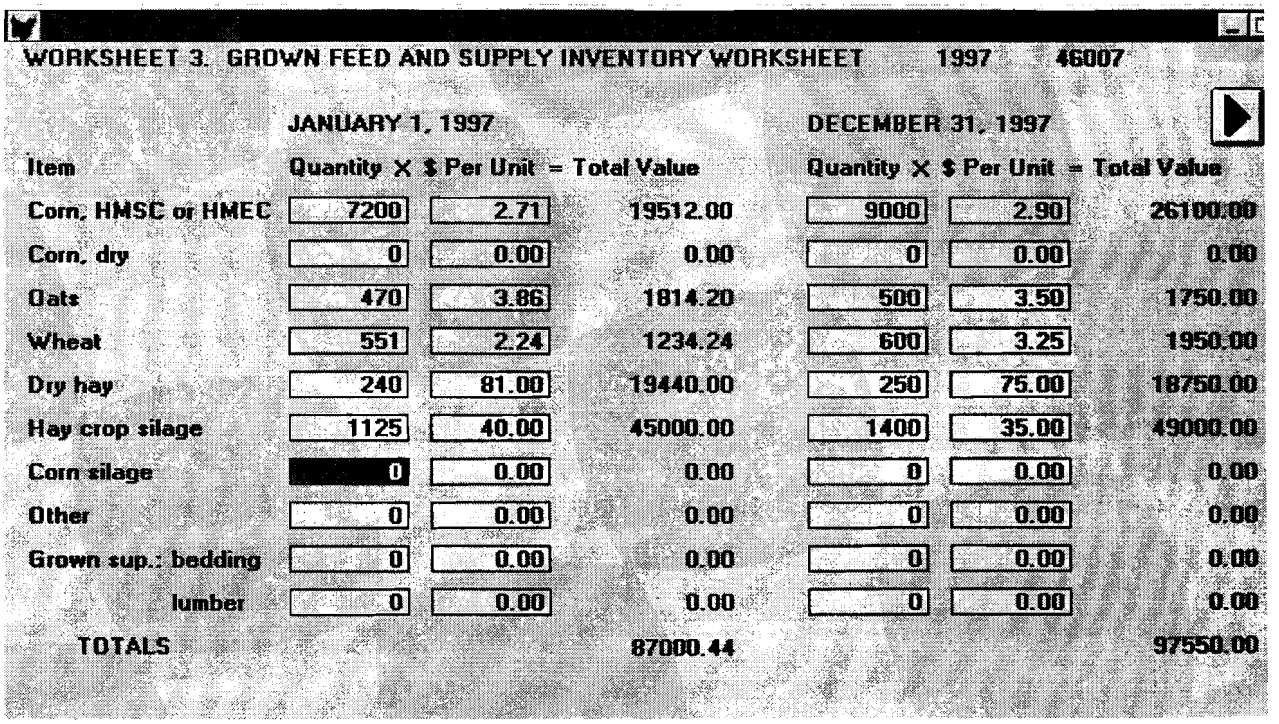
Now finish typing the farm information for Henry Holstein into Screens 3 through 14 and Worksheets 3, 6, and 7 using the data on the following pages. After Screen 14, you should be back to the Data Entry Menu.

The data for Worksheet 3, Grown Feed and Supply Inventory Worksheet, are entered across the rows. The "Total Value" columns are calculated as are the total beginning and ending grown feed and supply inventory. These totals are carried forward to Screen 3, Feed and Supply Inventory.

WORKSHEET 3. GROWN FEED INVENTORY WORKSHEET

Use this worksheet to calculate beginning and end year values of grown feed and supplies.

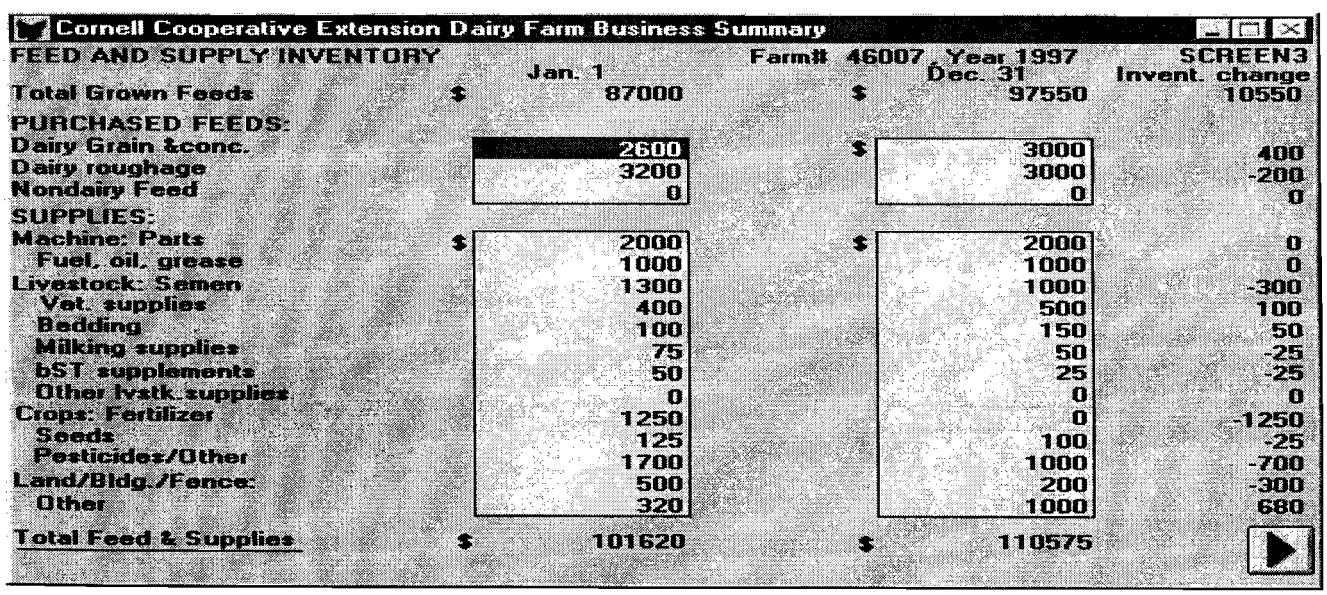
	January 1, 1997			December 31, 1997		
Item	Quant.	x $ per Unit	= Total Value	Quant.	x $ per Unit	= Total Value
GROWN FEED AND SUPPLIES:						
Corn-HMSC or HMEC	7,200	$ 2.71	$ 19,512.00	9,000	$ 2.90	$ 26,100
Corn-dry, _____						
Oats	470	3.86	1,814.20	500	3.50	1,750
Wheat	551	2.24	1,234.24	600	3.25	1,950
Dry hay	240	$ 81.00	$ 19,440.00	250	$ 75.00	$ 18,750
Hay crop silage	1,125	40.0	45,000.00	1,400	35.00	49,000
Corn silage						
Other _____						
Grown supplies: bedding		$	$		$	$
lumber			↓			↓



Screen 3, Feed and Supply Inventory, has three columns, two of which are for data entry. The beginning and end year columns for purchased feeds and supplies are entered and the beginning and end year totals and inventory change column are computed. The totals for beginning and end year for the grown feed and supplies are calculated from Worksheet 3. The check-in form has additional columns in Screen 3 for quantities and $ per unit; however, these are work spaces. If there were previous year's data, the beginning of year inventory values will be displayed. The order of data entry is across the rows.

The inventory change for all feed and supplies is calculated by subtracting the beginning year inventory value from the end year inventory value. The inventory change for grown feeds is then transferred automatically to Screen 12, the accrual receipts screen. The inventory changes for purchased feeds and supplies are transferred to Screen 13, the accrual expenses screen.

FEED & SUPPLY INVENTORY							SCREEN 3. Invent. Change[1]
Total Grown Feed and Supplies (from above)			$ 87,000			$ 97,550	$ 10,550
PURCHASED FEED: (use p.11 definitions)							
Dairy grain & conc.		x	=$ 2,600		x	=$ 3,000	400
Dairy roughage	3.2	1000	3,200	30	100	3,000	-200
Nondairy feed							
SUPPLIES:							
Machine: Parts		x	=$ 2,000		x	=$ 2,000	$ 0
Fuel, oil, grease			1,000			1,000	0
Livestock: Semen			1,300			1,000	-300
Veterinary supplies			400			500	100
Bedding			100			150	50
Milking supplies			75			50	-25
bST supplements			50			25	-25
Other lvsk supplies			0			0	0
Crops: Fertilizer			1,250			0	-1,250
Seeds			125			100	-25
Pesticides & other			1,700			1,000	-700
Land,building & fence			500			200	-300
Other:			320			1,000	680
Total Feed & Supplies			$ 101,620			$ 110,575	



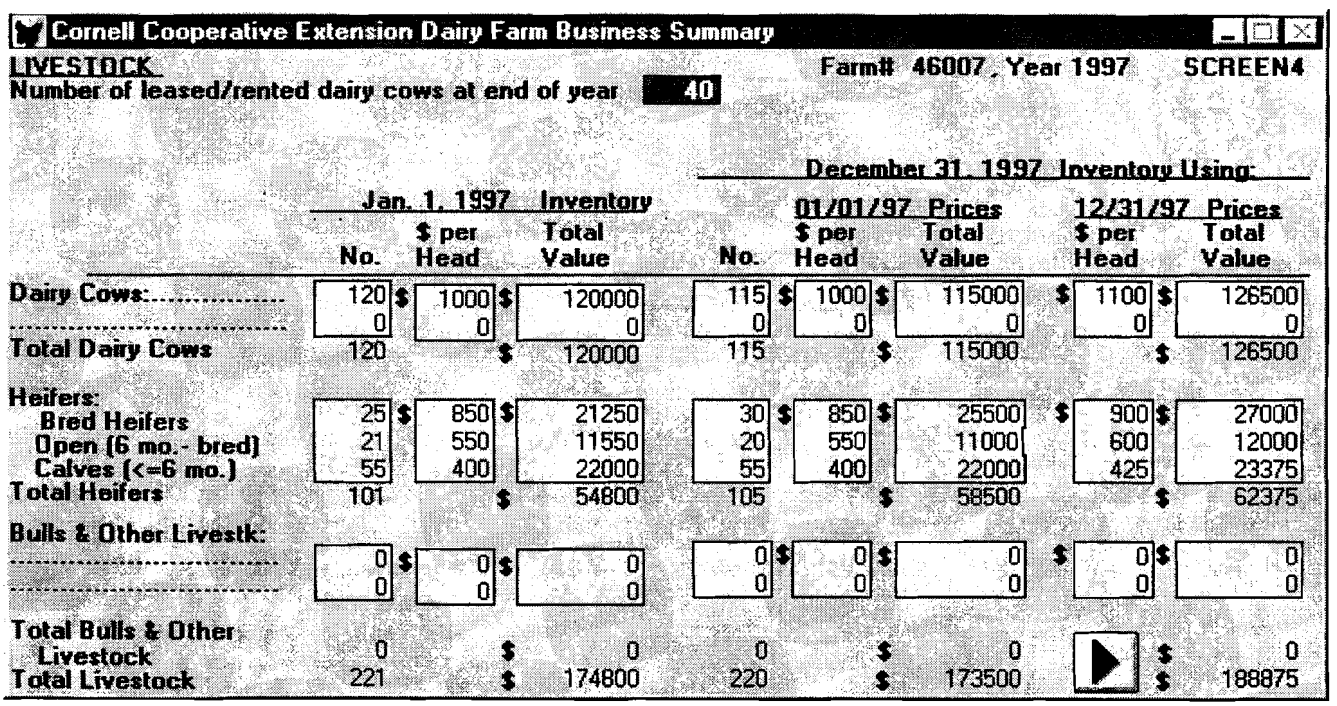
Data entry in Screen 4, Livestock Inventory, starts with "leased dairy cows" then continues across the remaining rows. All totals are calculated. The "$ per Head" columns are calculated after the "number of head" and "total value" entries are made for each row. If you prefer to enter "$ per Head" values, the "Total Value" will be calculated.

If there were previous year's data, the beginning of year inventory values will be displayed.

LIVESTOCK SCREEN 4.

Number of leased and rented dairy cows at end of year 40

	Jan. 1, 1997 Inventory			December 31, 1997 Inventory Using: 1/1/97 Prices			12/31/97 Prices	
	No.	$ per Head	Total Value	No.	$ per Head	Total Value	$ per Head	Total Value
Dairy Cows:	120	$ 1,000	$ 120,000	115	$ 1,000	$ 115,000	$ 1,100	$126,500
Total Dairy Cows	120		$ 120,000	115		$ 115,000		$126,500
Heifers:								
Bred Heifers	25	$ 850	$ 21,250	30	$ 850	$ 25,500	$ 900	$ 27,000
Open (6 mo. - bred)	21	550	11,550	20	550	11,000	600	12,000
Calves (< 6 mo.)	55	400	22,000	55	400	22,000	425	23,375
Total Heifers	101		54,800	105		58,500		62,375
Bulls & Other Livestock:								
		$	$		$	$	$	$
Total Bulls & Other Livestock			$			$		$
Total Livestock	221		$174,800	220		$173,500		$188,875



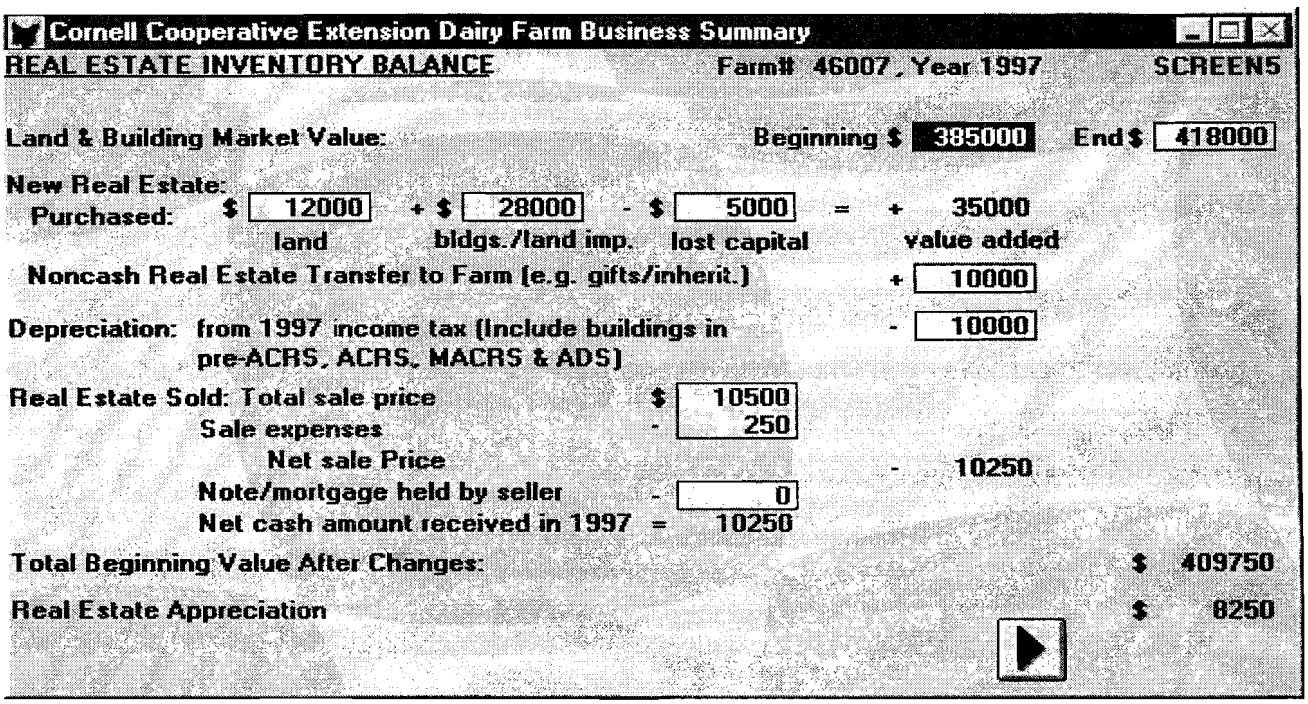
The data for Screen 5, Real Estate Inventory, are entered in the following order: beginning year market value, end year market value, new land, new buildings, lost capital, nonfarm noncash transfer, depreciation, and real estate sold (total sale price, sale expenses, and note/mortgage held by seller). All remaining items are calculated.

If there were previous year's data, the beginning of year inventory value will be displayed. It may be revised, if necessary, by typing the new value over the existing one and ↵ (return/enter).

REAL ESTATE INVENTORY BALANCE — SCREEN 5

Land & Building Market Value:				Beginning $ 385,000	End $ 418,000
New Real Estate:					
Purchased:[1]	$ 12,000 land	+ $ 28,000 bldgs./land imp.	- $ 5,000 lost capital	= +$ 35,000 value added	
Noncash Real Estate Transfer to Farm (e.g. gifts & inheritances)				+ 10,000	
Depreciation: from 1997 income tax (Include buildings in pre-ACRS, ACRS, MACRS & ADS)				- 10,000	
Real Estate Sold: Total sale price			$ 10,500		
Sale expenses			- 250		
Net sale price				- 10,250	
Note or mtg held by seller			- 0		
Net cash amt rec in 1997			= 10,250[2]		
Total Beginning Value After Changes					$ 409,750
Real Estate Appreciation					$ 8,250

[1]Use Worksheet 4, page 2. [2]Calculated value is a cash inflow to the farm. If part or all of this was converted to nonfarm, include that amount in "personal withdrawals & family expenditures" (Screen 13, page 13).



The order of data entry in Screen 6 is as follows: numbers of livestock, milk sold, butterfat test, production record, DHI#, bST usage, milking frequency, milking system, dairy housing, business type, and financial recordkeeping system.

The value entered for other livestock is the number of total work units for the total number of other livestock. Table 1 on the next page shows estimated work units for various livestock and crops.

When entering the Average Milk Plant Test, the decimal must be typed.

Business description items in Screen 6 are entered by clicking the mouse on the down arrow of the drop-down box, then click on your selection. The appropriate business description item will be displayed on the screen. The DHI number requires an 8-digit entry. The first 2 digits refer to the state, the next 2 digits refer to the county, and the last 4 digits are unique to the farm.

If there were previous year's data, the production record, milking system, business type, milking frequency, dairy housing, and financial recordkeeping system will have last year's data displayed. These items may be revised by clicking the mouse on the arrow of the drop-down box and then click on your selection.

LIVESTOCK & BUSINESS DESCRIPTION — SCREEN 6.

Livestock	Avg. No. For Year	Production Record	Milking System	Primary Business Type

Corn silage	0.8
Other forage harvested	0.6
Corn for grain	0.6
Oats	0.6
Wheat	0.6
Tillable pasture	0

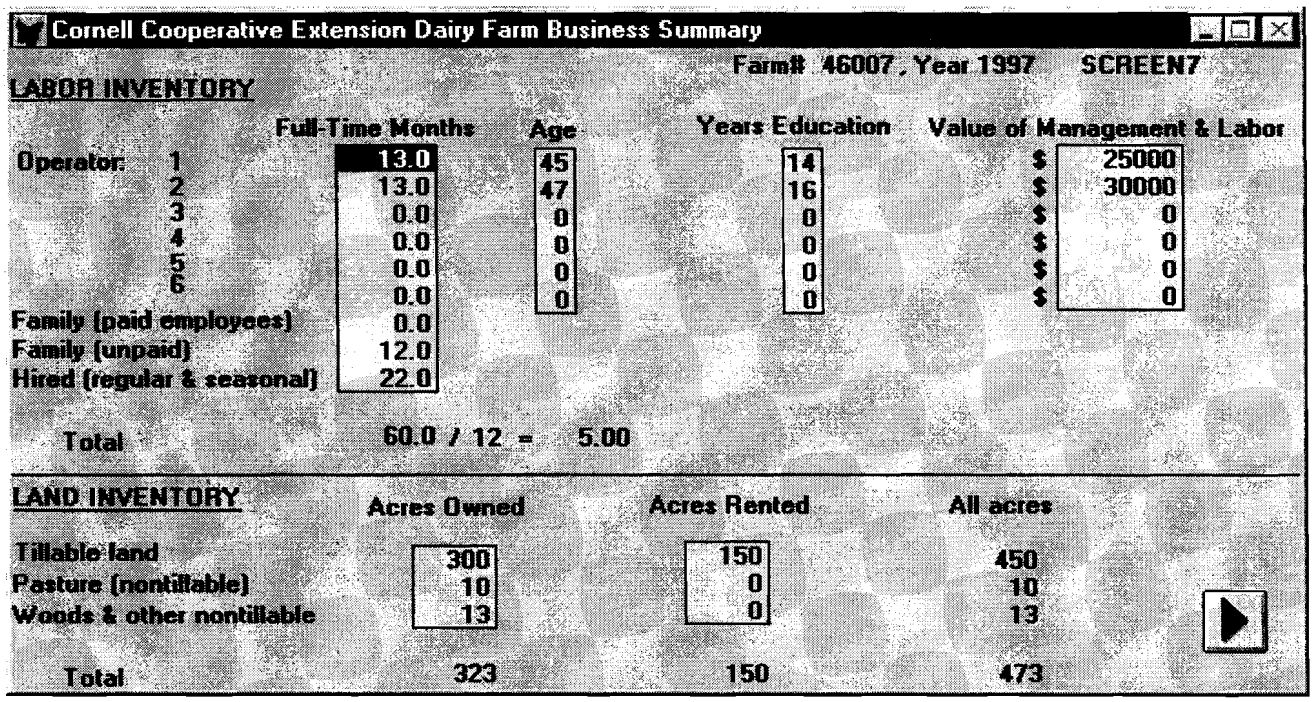
[4] Work units for the primary enterprises are built into Micro DFBS and are not entered by the user. They are provided here for information only.

In Screen 7, the order of data entry for the labor and land inventory is across the rows. To enter a value with decimals in the full-time months column, you must type the decimal point. The total months of labor, worker equivalent, and land inventory totals are calculated. If there were previous year's data, the entire land inventory section will be displayed. If revisions need to be made in this data, simply type over the existing values and ↵ (return/enter). The "all acres" column and the "total" row will be recalculated.

SCREEN 7.

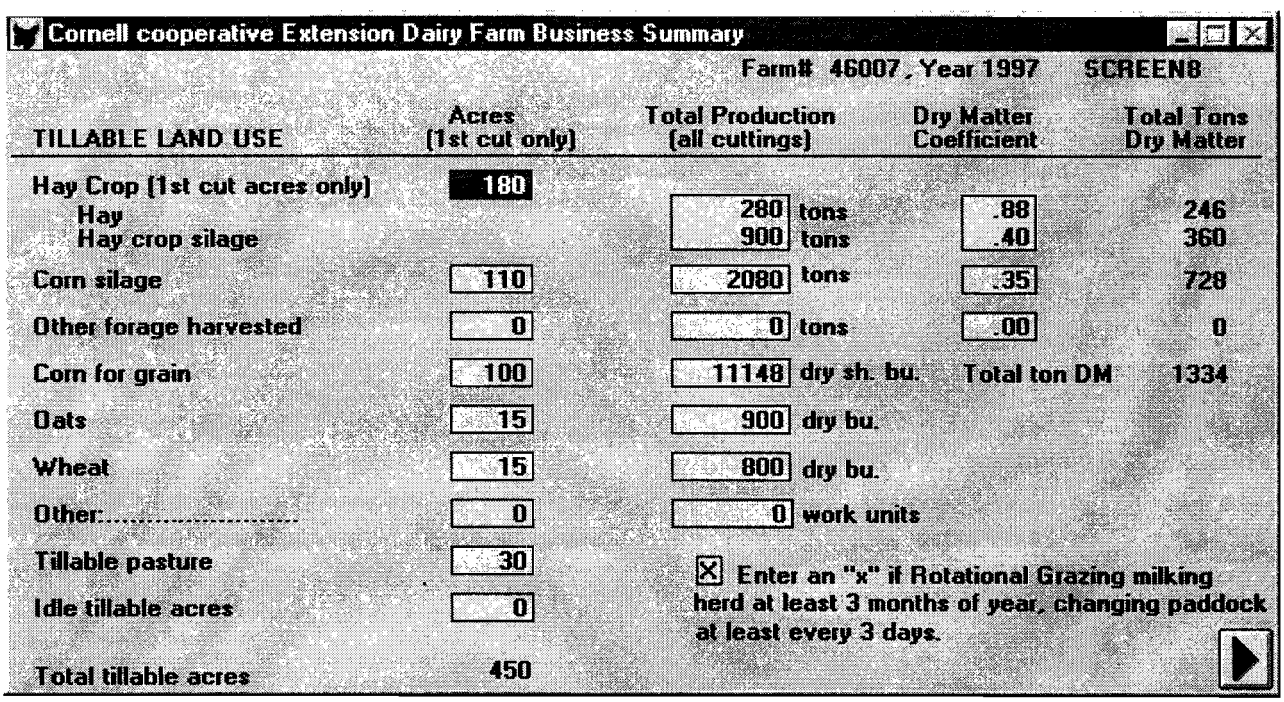
LABOR INVENTORY	Full-Time Months	Age	Years Educ.	Value of Management & Labor
Operator - 1	13	45	14	$ 25,000
- 2	13	47	16	$ 30,000
- 3				$
- 4				$
- 5				$
- 6				$
Family (paid employees)				
Family (unpaid)	12			
Hired (regular & seasonal)	22			
Total	60 ÷ 12 =	5.0	Worker Equivalent	

LAND INVENTORY	Acres Owned	Acres Rented	All Acres
Tillable land	300	150	450
Pasture (nontillable)	10	0	10
Woods & other nontillable	13	0	13
Total	323	150	473



Screen 8 is Tillable Land Use. When entering the data in the dry matter coefficient column, the decimal must be typed. The entry for total production of "Other Crops" is in number of work units (see Table 1 on page 14). If the farm uses rotational grazing, type an "X" in the box next to tillable pasture acres. The order of data entry is across the rows. Total Tillable Acres and the Total Tons Dry Matter column are the calculated values.

TILLABLE LAND USE	Acres (1st cut only)	Total Production (all cuttings)	Dry Matter Coefficient[6]	SCREEN 8. Total Tons Dry Matter
Hay Crop (1st cut acres only)	180	xxxxxxxxxxxxx	xxxxxxxxxxx	xxxxxxxxxxxx
Hay	xxxxxxxxxxx	280 tons	.88	246
Hay crop silage	xxxxxxxxxxx	900 tons	.40	360
Corn silage	110	2,080 tons	.35	728
Other forage harvested		tons		
Corn for grain[5]	100	11,148 dry sh. bu.	Total ton DM	1,334
Oats	15	900 dry bu.		
Wheat	15	800 dry bu.		
Other:		[ ]w.u.[1]		
Tillable pasture	30	[X] Check if Rotational Grazing milking herd at		
Idle tillable acres		least 3 months of year, changing paddock at least every		
Total tillable acres	450	3 days, and more than 30% of the forage consumed during the growing season was from grazing.		



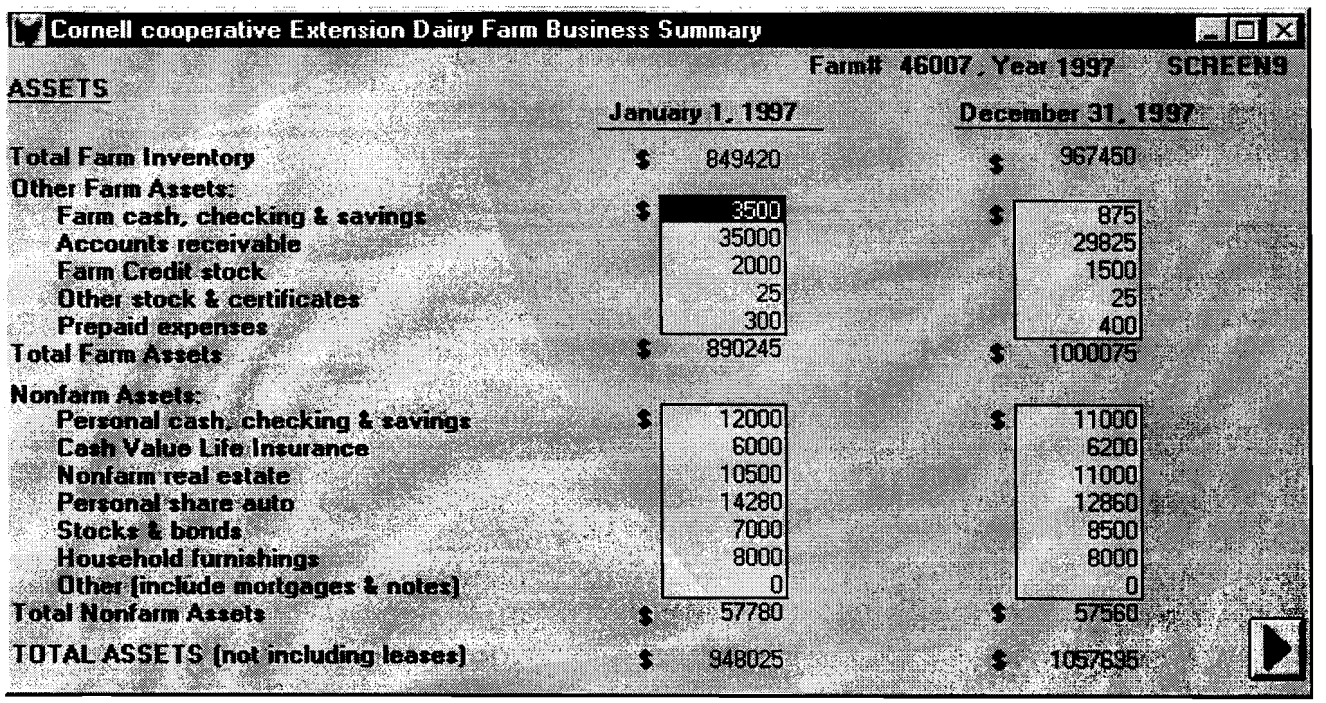
Screen 9 is the Asset portion of the Farm Family Financial Situation. The first items, beginning and end year total farm inventories, are calculated from data entered in earlier screens and displayed here. The order of data entry is across the rows. The calculated values are Total Farm Assets, Total Nonfarm Assets, and Total Assets. If there were previous year's data, the entire beginning year column will be displayed.

FARM FAMILY FINANCIAL SITUATION

SCREEN 9.

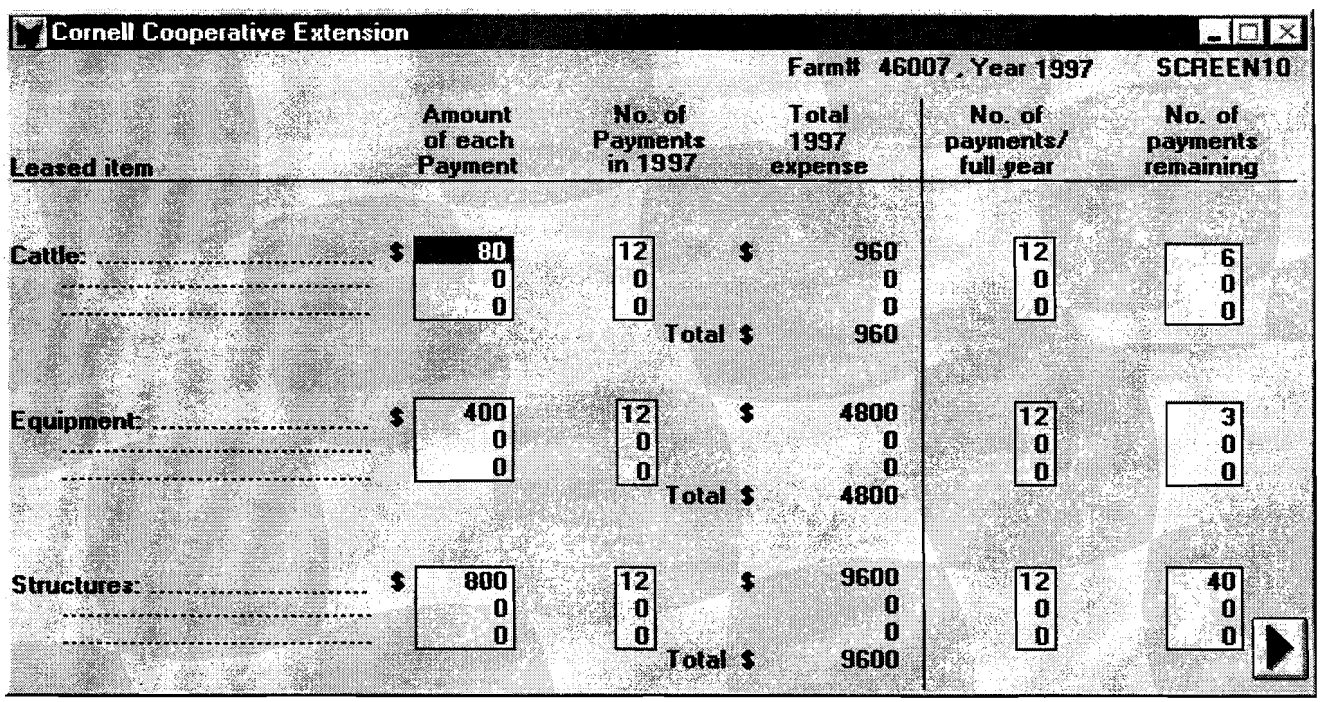
ASSETS

	January 1, 1997[1]	December 31, 1997
Total Farm Inventory[2]	$ 849,420	$ 967,450
Other Farm Assets:		
Farm cash, checking & savings	$ 3,500	$ 875
Accounts receivable[3]	35,000	29,825
Farm Credit stock	2,000	1,500
Other stock & certificates	25	25
Prepaid expenses[4]	x 300 x	x 400 x
Total Farm Assets	$ 890,245	$ 1,000,075
Nonfarm Assets:[5]		
Personal cash, checking & savings	$ 12,000	$ 11,000
Cash value life insurance	6,000	6,200
Nonfarm real estate	10,500	11,000
Personal share auto	14,280	12,860
Stock & bonds	7,000	8,500
Household furnishings	8,000	8,000
Other (include mortgages & notes)	0	0
Total Nonfarm Assets	$ 57,780	$ 57,560
TOTAL ASSETS (not including leases)	$ 948,025	$ 1,057,635



Financial leases are entered in Screen 10. The columns titled "amount of each payment", "no. of payments in 1997", "no. of payments/full year", and "no. of payments remaining" from the data check-in form are entered on Screen 10. The total 1997 expense column is calculated. The order of data entry is across rows.

Leased item	Amount of each payment	No. of payments in 1997	Total 1997 expense	No. of payments/ full year	SCREEN 10. No. of payments remaining
Cattle:	$ 80	12	$ 960	12	6
		Total	$ 960 [1]		
Equipment:	$ 400	12	$ 4,800	12	3
		Total	$ 4,800 [2]		
Structures:	$ 800	12	$ 9,600	12	40
		Total	$ 9,600 [3]		



Screen 11, Liabilities and Planned Debt Payment Schedule, is divided into two screens (Screen 11A and Screen 11B). Screen 11A contains the Long Term and Intermediate Liabilities and Debt Payments. Screen 11B contains the Short Term, Operating Debt, Accounts Payable, Advanced Government Receipts, and Nonfarm Liabilities and Debt Payments. To move from Screen 11A to Screen 11B, click on the proceed ➢ button. To get back to Screen 11A from Screen 11B, click on the "Screens" choice in the bar menu and select "Screens 11A & B". When done with Screen 11A, click the mouse on the proceed ➢ button to close the window.

The first column, the creditor description, is limited to 12 characters of input. You may abbreviate and use upper or lower case letters, however you wish; the description will be printed on the output just as it is entered here.

TOTAL LIAB/PYMTS (not including leases)	$.....	$.....	$.....		$ 76,060	$ 38,230			

net reduction planned in:
operating debt: $ 1,500
accounts payable: 40,000
Tot. Nonfarm Pymts. $ 1,100

When entering the interest rate planned for next year, you must type the decimal. The values entered in the "Amount of Payments" and "Payments Per Year" columns will be multiplied together to arrive at a total annual planned payment.

The "Farm Credit Stock" values at the top of Screen 11B are displayed. These values were entered as assets in Screen 9. The order of data entry is across the rows. The calculated values are the rows for Total Farm Liabilities/Payments and Total Liabilities/Payments. If there were previous year's data, the creditor description and beginning year liability columns will be displayed. **Do not move the previous year's data to a different input line**. The planned payments from previous year's data are used in the calculation of current portion for long term and intermediate term debt.

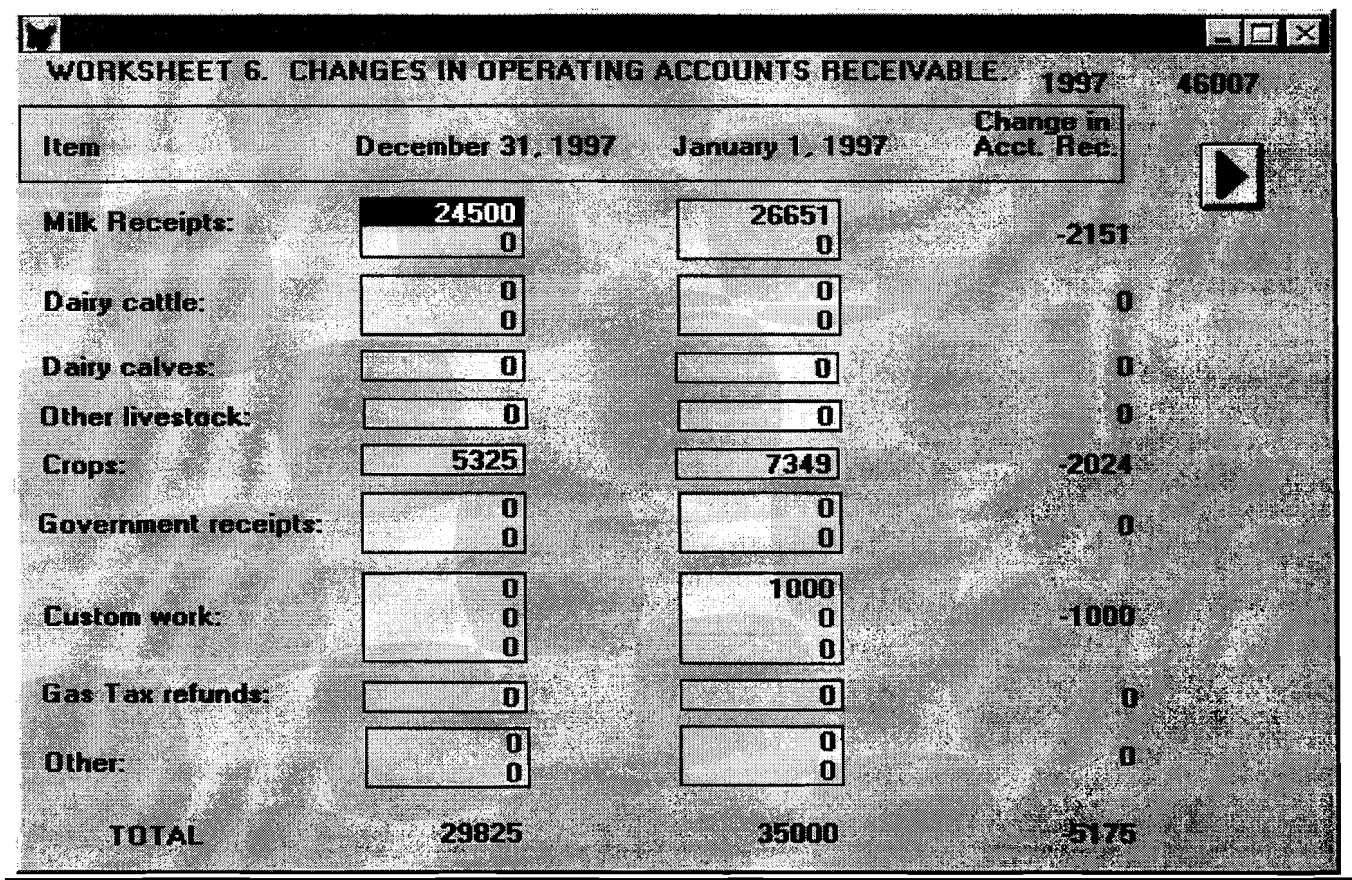
Worksheet 6 is used to calculate the changes in operating accounts receivable. Enter the ending and beginning accounts receivable in the appropriate receipt category. The change in accounts receivable column and the totals for ending and beginning year will be calculated. The changes in accounts receivable will be carried forward to Screen 12, Summary of Receipts and Changes in Inventory and Accounts Receivable.

WORKSHEET 6. CHANGES IN OPERATING ACCOUNTS RECEIVABLE

Account Number or Description	Balance 12/31/97	-	Balance 1/1/97	=	Change in Accounts Receivable	Allocation (Option:go directly to Scr.12,p.10) Receipt Category	Change in Acct. Rec.
Milk Receipts:	$ 24,500	-	$ 26,651	=	$ -2,151	Milk	$ -2,151
						Dairy cattle	
Crops :	$ 5,325	-	$ 7,349	=	$ -2,024	Dairy calves	
						Other livestock	
Custom :	$	-	$ 1,000	=	$ -1,000	Crops	-2,024
						Government receipts	
:	$	-	$	=	$	Custom mach. work	-1,000
						Gas tax refunds	
TOTAL	$ 29,825	-	$ 35,000	=	$ -5,175	Other:	
Must agree with:	(Screen 9)		(Screen 9)		(Screen 12)	====equals====>	$ -5,175



Screen 12 is the Summary of Yearly Receipts and Changes in Inventory and Accounts Receivable. The pounds of milk sold will be displayed on the screen when it is first brought up. This value was entered earlier in Screen 6. The changes in accounts receivable are displayed. They were entered in Worksheet 6. The change in inventory values are also displayed. The dairy cattle change in inventory value is calculated from the dairy cow and heifer values entered in Screen 4. The other livestock change in inventory value is calculated from the bulls and other livestock values entered on Screen 4. The crops change in inventory value is calculated from the grown feeds inventory on Screen 3. The change in advanced government receipts is calculated from the liabilities entered in Screen 11B.

There is work space to itemize other receipt items but, only the total is entered. The calculated values include the change in inventory column, change in accounts receivable column, accrual receipts column, and the total accrual receipts row.

SUMMARY OF 1997 RECEIPTS AND CHANGES IN INVENTORY AND ACCOUNTS RECEIVABLE

SCREEN 12.

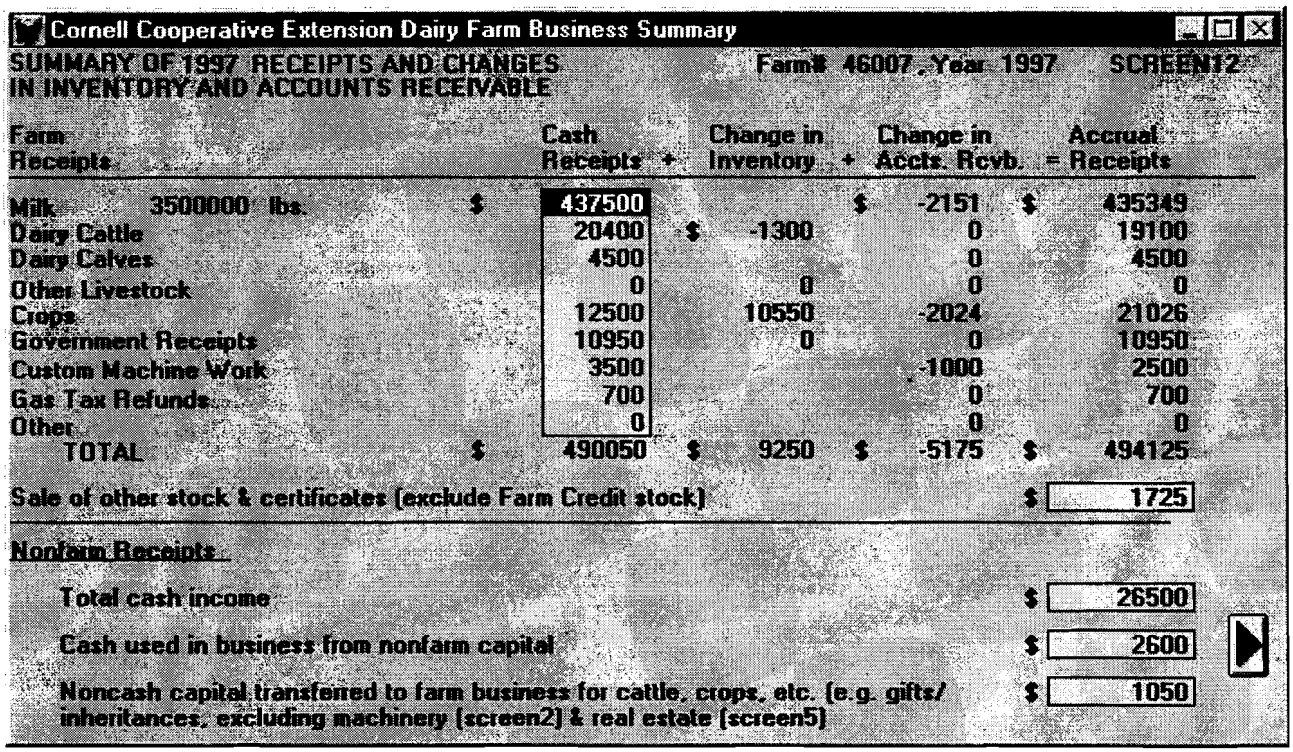
Farm Receipts	Cash Receipts	+	Change in Inventory[1]	+	Change in Accounts Receivable[2]	=	Accrual Receipts
Milk 3,500,000 lbs.	$ 437,500		xxxxxxxx		$ -2,151		$ 435,349
Dairy Cattle	20,400		$ -1,300				19,100
Dairy Calves	4,500		xxxxxxxx				4,500
Other Livestock	0						0
Crops	12,500		10,550		-2,024		21,026
Government Receipts	10,950		[3]				10,950
Custom Machine Work	3,500		xxxxxxxx		-1,000		2,500
Gas Tax Refunds	700		xxxxxxxx				700
Other: ..... $							
..... $							
..... $							
Total Other	0		xxxxxxxx				0
TOTAL	$ 490,050		$ 9,250		$ -5,175		$ 494,125
Sale of other stock & certificates (exclude Farm Credit stock)							$ 1,725

Nonfarm Receipts:

Cash income (describe & itemize largest amounts:
Hillary: $ 26,500; .....: $.....) total = $ 26,500

Cash used in the business from nonfarm capital $ 2,600

Noncash capital transferred to farm business for cattle, crops, etc. (eg gifts/inheritances) [excluding machinery (enter Screen 2) & real estate (enter Screen 5)] $ 1,050



Worksheet 7 is used to calculate the changes in operating accounts payable. Enter the account description, ending and beginning accounts payable and the appropriate code for the expense category. You may enter more than one account payable for a code. All the lines for that code will be totaled and displayed to the right of the expense category. The change in accounts payable columns and the totals for ending and beginning year will be calculated. The changes in accounts payable will be carried forward to Screen 13, Summary of Expenses and Changes in Inventory and Accounts Payable.

WORKSHEET 7. CHANGES IN OPERATING ACCOUNTS PAYABLE
Complete only if you have operating accounts payable.

Account Number or Description	Balance 12/31/97	-	Balance 1/1/97	=	Change in Accounts Payable	Code

Screen 13, Summary of Year's Expenses and Changes in Inventory or Prepaid Expenses and Accounts Payable, is divided in two screens (Screen 13A and Screen 13B). Screen 13A contains the hired labor, feed, machinery, and livestock expense categories. Screen 13B contains the crops, real estate, other, and nonfarm expense categories. To move from Screen 13A to Screen 13B, click the mouse on the proceed ➢ button. To get back to Screen 13A from Screen 13B, click the mouse on the "Screens" choice in the bar menu and select "Screens 13A & B". When done with Screen 13A, click on the proceed button to close the window.

The change in inventory values in the "change in inventory or prepaid expenses" column are displayed when Screen 13 is first brought up. These values are calculated from the purchased feed and supply inventories entered in Screen 3. The change in accounts payable column is also displayed. These values are calculated from the data entered in Worksheet 7. The calculated values are the changes in inventory, changes in accounts payable, accrual expenses column, and the total accrual expenses row.

SUMMARY OF 1997 EXPENSES & CHANGES IN INVENTORY & ACCOUNTS PAYABLE

See page 11 for instructions. SCREEN 13A.

Farm Expenses	Cash Amount Paid	-	Change in Inventory or Prepaid Expenses	+	Change in Accounts Payable	=	Accrual Expenses

Taxes	8500	0	0	8500
Rent & lease	9600	0	0	9600
Other				
Insurance	4000	0	0	4000
Utilities (farm share)	13800	0	25	13825
Interest	38130	0	0	38130
Miscellaneous	5000	680	0	4320
TOTAL OPERATING	$ 406530	$ -1495	$ 34950	$ 442975
Expansion Livestock	$ 0	$ 0	$ 0	$ 0
Purchase of other stock & certificates (exclude Farm Credit stock)				$ 1000
Nonfarm Cash Expenses				
Personal withdrawals & family expenditures				$ 47960

The final screen, Screen 14, contains optional input. The first section is where the breakdown of crop expenses are entered. The total crop expense row at the bottom of the screen is displayed. These values were calculated from the crop expense data entered in Screen 13B. The rows for hay crop, corn, and pasture require data entered in them. The all other crops row is calculated as the residual so the column totals equal the crop expenses in Screen 13B.

The second section of Screen 14 is the input for deferred tax calculations. Enter tax basis, market value, and proprietorship or partnership information.

OPTIONAL INPUT

BREAKDOWN OF 1997 ACCRUAL CROP EXPENSES BY CROP — SCREEN 14A.

Crop	Accrual Fertilizer & Lime	Accrual Seeds & Plants	Accrual Spray, Other Crop Expenses
Hay crop (silage & dry)	$ 5,000	$ 3,500	$ 1,000
Corn (silage & grain)	12,000	4,500	6,000
Pasture	500	0	0
All other crops	750	325	1,700
Total	$ 18,250	$ 8,325	$ 8,700

Totals above must equal accrual expenses in Screen 13, page 13.

OPTIONAL INPUT FOR DEFERRED TAX CALCULATIONS

It will be assumed that:
(1) farm assets not listed below will not significantly influence deferred tax liability, and
(2) all gain on machinery and purchased livestock is ordinary gain.

Tax Basis (underpreciated balance) of: (as of December 31, 1997)

Purchased livestock (included in livestock inventory, Screen 4)	$ 500	
Machinery & equipment (included in machinery inventory, Screen 2)	$ 150,000	
Building & improvements (included in real estate inventory, Screen 5)	$ 55,000	
Part that is single purpose livestock structure, silos, & grain bins (% or $)	____ % OR	$ 3,000
Land (included in land and building inventory, Screen 5)	$ 200,000	
Operator residences[1] (included in land & building inventory, Screen 5)	$ 25,000	
Nonfarm assets (included in Screen 9)	$ 40,000	

Market Value of: — SCREEN 14B.

Operator residences (included in land & building inventory, Screen 5)	$ 50,000	
Single purpose livestock structure, silos & grain bins (% or $ of real estate inventory)	____ % OR	$ 20,000

When data entry is completed, click the mouse on the proceed ➢ button to go back to the data entry menu.

VERIFY THE DATA.

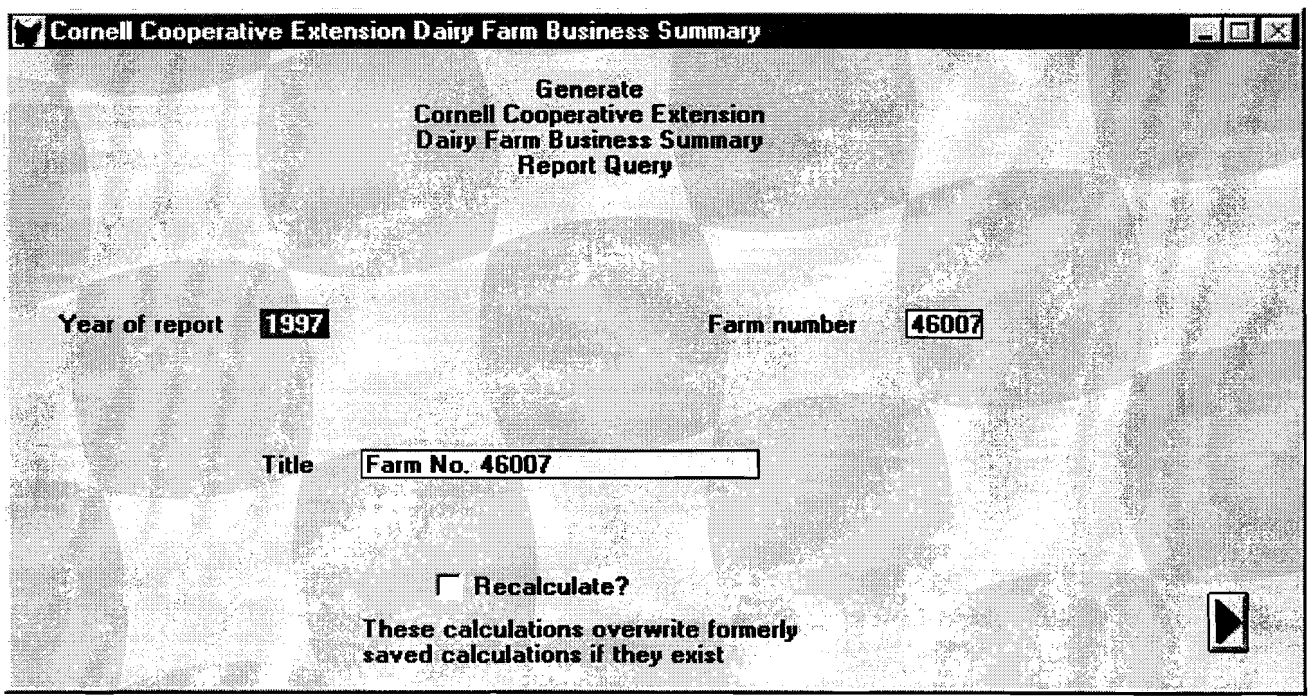
We all make typing mistakes occasionally. Verifying that the data are accurate is an important step that will reduce the embarrassment of having a farmer tell you that you typed one of his values incorrectly and printed out a "nonsense" summary for him. It is tempting to skip this step. The best advice is don't skip this step.

Use the Data Entry Menu option, "New Farm Input or Edit All Screens", to move through each screen for the farm, proofreading the data for errors. If an error is found click the mouse in the left portion of the data field until a vertical bar appears. Then type the correct value. When you press <enter>, any calculations on the screen will be calculated

CALCULATE AND PRINT FARM SUMMARY.[5]

You are now ready to calculate and print a dairy farm business summary. From the Main Menu select Single Farm Report by clicking on it with the mouse or by typing "R".

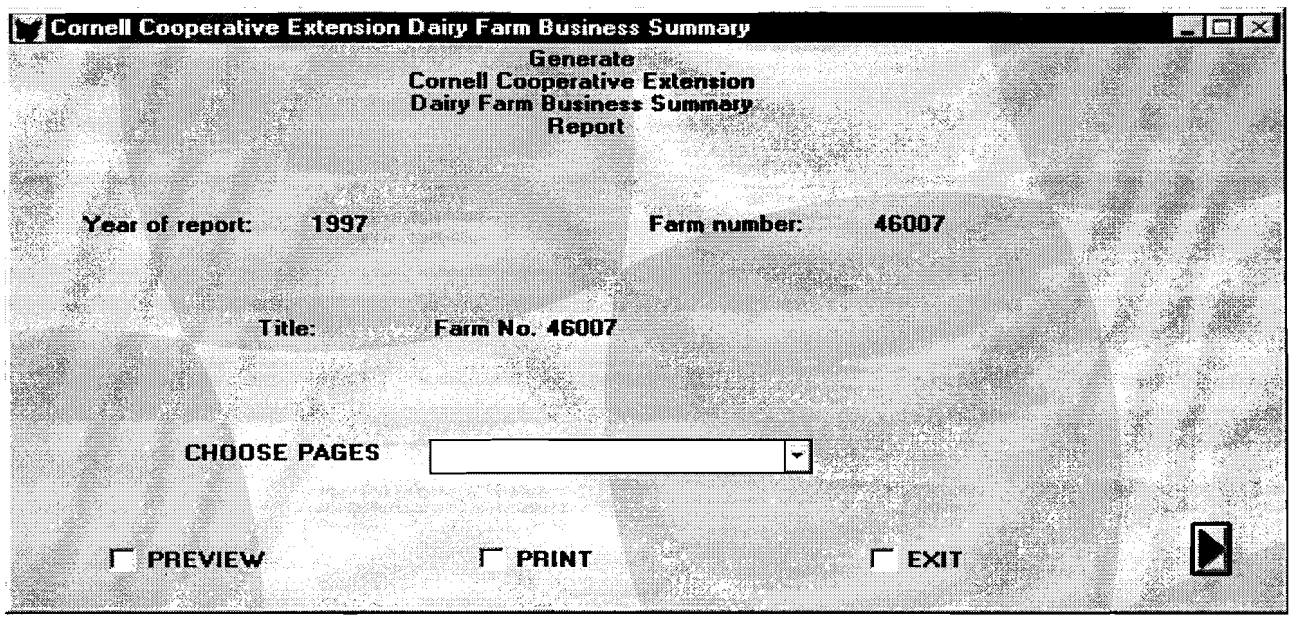
The following screen will be displayed:



[5] See Appendix C for the procedure used to calculate costs of producing milk that are printed on page 10 of the following output.

The "Year of Report" field is highlighted when you enter the Report Query screen. If the year is not correct for the report you want to print, type the correct year and press <enter>. (The "beep" indicates that the field is full.) The cursor moves to the "farm number" field. The farm number shown is for the farm you used last. If this is not the farm number you want to print a report for, type the correct farm number and press <enter>. The cursor moves to the "Title" field. If this is not the title you want printed on each page of the report, type the correct title and press <enter>. If you have not generated a report for this farm before, it is not necessary to click the "recalculate?" box. The calculations will be done automatically. If you have made corrections in the data, however, since it was last printed then do check the recalculate box. Click the mouse on the proceed ➢ button to perform the calculations for the farm report.

When the calculations are completed, you will see the following report screen:



To choose the pages you want to view on the screen or print, click the mouse on the arrow (↓) of the drop-down box labeled "choose pages". You may select "All" to print or view all the pages, or select a page description to print or view one page at a time.

Progr.	=	Page 1, Progress of the Farm Business
Income	=	Page 2, Income Statement
Inc.(cont.)	=	Page 3, Income Statement, continued
Bal.	=	Page 4, Balance Sheet
Bal. Analy.	=	Page 5, Balance Sheet Analysis
Owner Equity	=	Page 6, Statement of Owner Equity
An. Cash Flow	=	Page 7, Annual Cash Flow Statement
Repaym. Analy.	=	Page 8, Repayment Analysis
Crop Analy.	=	Page 9, Cropping Program Analysis
Dairy Analy.	=	Page 10, Dairy Analysis
Cap/Lab. Analy.	=	Page 11, Capital & Labor Efficiency Analysis
An. Cash Flow Wks.	=	Page 12, Annual Cash Flow Worksheet
Opt. Cash Flow St.	=	Optional Annual Cash Flow Statement
Diagnostics	=	Diagnostic Page
Opt. Cond. Bal. St.	=	Condensed Balance Sheet Including Deferred Taxes

Once you have selected the page (or pages) to print or view, click the mouse in the box before "Preview" if you want to see the page on the screen before printing. An "X" will appear in the box. (To unselect "Preview", click in the box again, and the "X" goes away.) With the preview box checked, click on the proceed ➢ button to view the page on the screen. The page is difficult to read, so click the mouse on the "Zoom In" button. Then use the scroll bars along the bottom and right side of the window to view the part of the page you wish to read. Or, position the magnifying glass icon over the area of the page you want to view and click the mouse. When done viewing the page, click on the "OK" button. You will be prompted "Do you want to print this report?" Press <enter> to return to the Report Query screen. Type a "Y" to print the page you just viewed.

To print the page without first previewing it on the screen, click the mouse in the box before "Print", then click on the proceed ➢ button. The program will print to the port and printer that are specified in your Windows™ print manager.

To return to the main menu, click the mouse in the box in front of "Exit", then click on the proceed ➢ button.

CHECK THE DIAGNOSTICS PAGE

The diagnostics page is a listing of data items that fall outside of "normal" ranges for that item. These unusual items may indicate data entry errors or simply unusual farm situations. Look over the diagnostics page. Refer to the section beginning on page 49 entitled, "Hints for Interpreting and Using Dairy Farm Business Summary Diagnostics". Initial each item and write an explanation as necessary on one copy. Send this copy to Cornell along with the diskette and check-in form to indicate that the record is correct. This will save everyone time and telephone calls spent verifying and correcting farm records.

UPDATE OR DISPLAY A RECORD

Select the "Edit Farm Using Single Screens" option on the data entry menu to update a farm record. The program will take you to Screen 1, where the year and farm number are entered. The Screen 1 data will be displayed. Edit it if necessary. Click the mouse on "Screens" in the bar menu and select the screen to update. Use the cursor keys or mouse to move to the appropriate value and retype the new value over the old one. Important: If totals or calculated values appear on the screen, be sure to press return or use the ↓ arrow key to move out of the field that was updated so the calculated items will be recalculated. Close the screen when done updating by clicking on the proceed ➢ button. You may now move to another screen to make more changes in data or return to the main menu, by selecting "Exit" from the bar menu.

SET NEW SCREEN DIRECTORY

It is possible to work with a different set of databases than those that are in your c:\dfbs\database directory (the default). Select "Set New Screen Directory" from the "Utilities Menu". In the space for "Screen Database Directory" enter a path name such as a: or c:\dfbs\data2, wherever the data files are that you want to work with (scrn*.*, old*.*, and wksht*.*). When you exit the DFBS program, the setting reverts to the default of c:\dfbs\database.

DELETE A RECORD

To delete a farm record, select "Utility Menu " on the main menu. Select "Delete Farm From Tables" on the Utility Menu. You will be prompted for a year and farm number. You will be asked confirmation of the year and farm record to delete.

MAKE BACKUP COPIES OF THE DATA

To make a backup copy of your county/regional data, select "Utility Menu" from the main menu. Select "Screen Backup to Diskette" on the utility menu. You will be prompted for the disk drive where the copied files should be stored. The files scrn*.*, old*.*, and wksht*.* will be copied from your data directory on the hard drive. Make a copy to a floppy disk to send to Cornell. Also, make a backup for your files.

MAKE SELECTED COPY OF THE DATA

Use the utility menu option, "Selected Farm Copy" when you want to put one or more farms' data on a floppy disk. When prompted enter the disk drive and path where the selected farms' data should be stored. A list of the farms by year will be displayed. These are the farm records that are included in the scrn*.*, old*.*, and wksht*.* files in the c:\dfbs\database directory (or the data directory you are working with if you used "Set New Screen Directory"). Select one farm record by clicking the mouse on the farm number for the appropriate year. A "√" will appear before the farm number. Select more than one farm record by holding down the "Control" key while clicking the mouse on the farm numbers for the appropriate years. For example, to create a diskette with data for farm number 46007, select 46007 for 1994, 46007 for 1995, 46007 for 1996, and 46007 for 1997. This will provide the data necessary when printing the report for the "Progress of the Farm Business". After selecting the farm records, press "Escape" to continue or click the mouse outside the farm number list box. You will be prompted to enter a diskette if you haven't already done so, then press any key to continue. The files generated will be named scrn1.dbf, scrn1.cdx, scrn2.dbf, scrn2.cdx, etc.; the same filenames of the data in c:\dfbs\database.

APPEND FARM FILES TO DATABASE

Use the utility menu option, "Append Farms to Tables", when you want to add a farm record to the data that is in c:\dfbs\database (or wherever your screen directory is currently set). An existing farm record will not be overwritten. To replace a farm record first use "Delete Farm From Tables" to delete the farm, then add the farm using "Append". After entering the disk drive where the new records are to be retrieved, there will be a listing of the farms by year that are on the disk drive. Select one farm for one year by clicking the mouse on the farm number. A "√" will appear before the farm number. Select more than one farm by holding down the "Control" key and clicking the mouse on the farm numbers. Press "Escape" to continue or click the mouse outside the farm number list box.

EXIT

To leave the Micro DFBS program, select "Exit to Operating System" on the main menu.

1997 DAIRY FARM BUSINESS SUMMARY

Farm No. 46007 January 13, 1998

PROGRESS OF THE FARM BUSINESS

SELECTED FACTORS	1995	1996	1997
Size of Business			
Avg # of cows	125	137	157
Avg # of heifers	85	90	101
Milk sold, lbs.	2617105	2805230	3500000
Worker equiv.	3.00	3.17	5.00
Total tillable acres	450	450	450
Rates of Production			
Milk sold per cow, lbs.	20937	20476	22293
Hay DM per acre, tons	3.5	3.1	3.4
Corn silage per acre, tons	18.2	16.4	18.9
Labor Efficiency			
Cows per worker	42	43	31
Milk sold per worker, lbs.	872368	884931	700000
Cost Control			
Grain & conc. purch. as % milk sales	25%	36%	29%
Dairy feed & crop exp. per cwt. milk	$ 5.81	$ 6.05	$ 5.15
Labor and mach. costs per cow	$ 902	$ 1011	$ 1376
Operating cost of prod. milk per cwt.	$ 13.40	$ 11.87	$ 11.01
Capital Efficiency (average for year)			
Farm capital per cow	$ 6901	$ 6689	$ 6234
Machinery and equipment per cow	$ 1440	$ 1397	$ 1413
Asset turnover ratio	0.49	0.43	0.52
Profitability			
Net farm income w/o apprec.	$ 54300	$ -605	$ 6100
Net farm income w/ appreciation	$ 54300	$ 1420	$ 24250
Labor & management income per op/mgr	$ 21359	$ -9116	$ -16192
Rate return on equity capitial w/apprec.	2.2%	-15.2%	-12.4%
Rate return on all capital w/apprec.	5.3%	-1.5%	-1.2%
Financial Summary			
Farm net worth, end year	$ 339825	$ 387696	$ 407636
Debt to asset ratio	0.61	0.58	0.60
Farm debt per cow	$ 3365	$ 3502	$ 3996
Cash flow coverage ratio	0.41	0.17	0.84

CHANGE IN VALUATION EQUITY				+$ 13150
IMBALANCE/ERROR				-$ 0
End of year farm net worth				= $ 407636
Change in net worth with appreciation				$ 19940

Change in net worth	Farm Business	Farm & Nonfarm
Without appreciation	$ 1790	
With appreciation	$ 19940	$ 14720

The Statement of Owner Equity has two purposes: It allows (1) verification that the accrual income statement and market value balance sheet are interrelated and consistent (in accountants' terms, they reconcile) and (2) identification of the causes of change in equity that occurred on the farm during the year. The Statement of Owner Equity allows you to determine to what degree the change in equity was caused by (1) earnings from the business, and nonfarm income, in excess of withdrawals being retained in the business (called retained earnings), (2) outside capital being invested in the business or farm capital being removed from the business (called contributed/withdrawn capital), and (3) increases or decreases in the value (price) of assets owned by the business (called change in valuation equity).

		Percent Equity (Farm)		22.31%
		Nonfarm debt	$	5000
		Nonfarm deferred taxes	$	6062
Total Nonfarm Assets	$ 57560	Total Nonfarm Liabilities	$	11062
TOTAL ASSETS	$ 1084649	TOTAL LIABILITIES	$	809048
		Total Net Worth	$	275601
		Percent Equity (Total)		25.41%

Deferred taxes represent an estimate of the taxes that would be paid if the farm were sold on the balance sheet date. Accuracy is dependent on the accuracy of the market values and the tax basis data provided. Any tax liability for assets other than livestock, machinery, land, buildings, and nonfarm assets is excluded. It is assumed that all gain on purchased livestock and machinery is ordinary gain and that listed market values are net of selling costs. The effects of investment tax credit carryover and recapture, carryover of operating losses, alternative minimum taxes and other than average exemptions and deductions are excluded because they have only minor influence on the taxes of most farms. However, they could be important.

HINTS FOR INTERPRETING AND USING DAIRY FARM BUSINESS SUMMARY DIAGNOSTICS

The last page(s) of a farm business summary printout are the "diagnostics". Diagnostics serve the purpose of alerting the person editing the record to possible data problems. Diagnostic statements are generated when data are missing, inconsistent or outside a "normal" expected range. Each diagnostic statement should be carefully scrutinized to help insure that the data are accurate. One should not rely on the diagnostics to "catch" data entry or data acquisition errors. Accurate original collection and entry of data are the best methods.

Screen No.

MACHINERY AND EQUIPMENT INVENTORY

2. "Machinery owned but no machinery depreciation."

Check to see if machinery depreciation was collected on the check-in form (Screen 2) and not entered or if an entry error is present. Machinery could be rented from a partner in the business with the market value being reported, but not the depreciation. In situations where machinery is rented from a partner, it is preferable to enter machinery inventory values and depreciation for business analysis purposes. However, check to make certain machinery rental payments have been removed as a cash expense, but that debt payments on machinery remain.

2. "Machinery depreciation = n% of beginning inventory plus new machinery." (When n < 5% or n > 20%)

Depreciation reported is probably too low or too high (Screen 2). Check to be certain that building and/or cattle depreciation has not been included as a machinery entry. Low depreciation values are expected when the average age of machinery is high (greater than 10 years) and little if any new machinery was purchased. High depreciation values are expected when the average age of machinery is low (less than five years) and relatively large purchases of new machinery occurred in recent years.

2. "Machinery appreciation exceeds depreciation."

Check to see if depreciation is within the expected range, but is not correct (Screen 2). Low depreciation often results in appreciation that is unrealistically high. In "normal" years of low to moderate inflation, machinery appreciation is expected to be less than machinery depreciation.

2. "Machinery appreciation = -$n." [When n <(-)10% of beginning machinery inventory]

Reported machinery market values fell more than was accounted for by depreciation (Screen 2). While this is possible, especially in periods of "soft" machinery markets, the decrease was more than 10% of beginning machinery inventory. Check to see if all values, especially depreciation, are correct.

FEED AND SUPPLIES

3. "Feed and supply inventory increase > 25%."

Feed and supply inventory increased beyond what would "normally" be expected (Screen 3). Check to see if physical quantities and/or prices increased from beginning to end of year.

3. "Feed and supply inventory decrease > 25%."

Feed and supply inventory decreased beyond what would normally be expected (Screen 3). Check to see if physical quantities and/or prices decreased from beginning to end of year.

LIVESTOCK INVENTORY

4. "End of year (bred, open, or calf) heifer inventory at beginning prices > beginning of year inventory but no increase in (bred, open, or calf) heifer numbers."

Two possible explanations exist:

(1) An increase in the quality of heifers has occurred.

(2) The average age of youngstock from beginning of year to end of year has increased and thereby value per head increased.

Check to be certain one or both of the above actually occurred (Screen 4).

4. "End of year (bred, open, or calf) heifer inventory at beginning prices < beginning of year inventory, but no decrease in (bred, open, or calf) heifer numbers."

Again, two possible explanations exist:

(1) A decrease in the quality of heifers has occurred.

(2) The average age of youngstock from beginning to end of year has decreased and thereby value per head decreased.

Check to be certain one or both of the above actually occurred (Screen 4).

4. "Change in cow values/head >$100, change = $_____."

The upward or downward movement in dairy cow market prices was greater than $100 per head. Check to see if this actually occurred as a result of:

(1) An increase or decrease in quality of animals.

(2) A change in market conditions from beginning to end of year.

Check to be certain one or both of the above occurred (Screen 4). If the beginning of year values taken from last year's end of year inventory were incorrect, make the change in beginning of year values so as to accurately reflect the market at the beginning of the year being analyzed.

4, 10 & 13. "Number of leased dairy cows > 0 but cattle lease expense = $0."

An inconsistency may exist. Check to see if cattle were leased (Screen 4) and if lease payments were entered correctly (Screens 10 and 13). Cows may in fact be rented from others or boarded for others. In this situation, do not report cows as leased, but enter the rental expense on Screen 13 and total average numbers, including rentals, on Screen 6.

4. "Livestock appreciation is < $0, = $_____."

Livestock values fell from beginning to end of year (Screen 4). Check to make certain this occurred.

4. "Livestock appreciation > change in inventory, = $_____."

The majority of the increase in total livestock inventory resulted from price increases and not growth or quality improvement of the herd (Screen 4). Check to see if this is accurate.

4 & 13. "Expansion livestock expense > $0 but no increase in dairy cow numbers."

An inconsistency exists. If herd size did not increase from beginning to end of year, cattle purchases were not for increase of herd size. Cattle purchases should be entered under "Replacement Livestock" on Screen 13.

An exception to the above is the purchase of youngstock/bred heifers in anticipation of a herd size increase. If this is the situation, disregard the diagnostic.

4 & 12. "Dairy cow numbers decreased _____ and dairy cattle sales < $400/head."

The revenue from dairy cattle sales is divided by the number of cows by which herd size decreased and this diagnostic is printed if the result is less than $400 per head.

Did dairy cow numbers decrease (Screen 4) and, if so, were the prices received for cull cows low or did a higher proportion of cows die, or was the sales revenue not accurately reported (Screen 12)? Check the accuracy of input data.

4. "Dairy cow end year inventory at beginning prices > beginning year inventory but no increase in dairy cow numbers."

Quality of cows increased from beginning to end of year (Screen 4). Check to see if this is accurate.

4. "Dairy cow end year inventory at beginning prices < beginning year inventory but no decrease in dairy cow numbers."

Quality of cows decreased from beginning to end of year (Screen 4). Check to see if this is accurate.

4. "Number of cows = 0, total value = $x." (Where x > 0)
"Number of cows = x, total value = $0." (Where x > 0)
(Also for heifers and bulls and other livestock.)

There is missing data. If number of livestock is entered there must be a corresponding value for those livestock. If a value for livestock is entered, the number of livestock must be entered.

REAL ESTATE INVENTORY

5. "Real estate appreciation > 0.05 of beginning + value added or < 0."

Real estate appreciation is greater than expected in "normal" circumstances or is negative (Screen 5). Real estate values may have not been changed for several years and this year's change reflects more than one year's increase. If this occurred, change the beginning of year value to accurately reflect beginning of year value.

5. "Lost capital > 0.50 of real estate purchased = _____."

Lost capital is greater than "normally" expected (Screen 5). Small capital improvements may not add to the market value of the property and, therefore, lost capital could be equal to the total cost.

5 & 7. "Land and building inventory > $30,000 but no land is owned."

Implies ownership of buildings, but no land (Screens 5 and 7). Check to see if this is accurate. The operator could rent or lease a farm, but own improvements or real estate consistent with the terms of the contract. If the farm is a partnership or corporation, check to determine if assets are recorded consistent with expenses.

5. "Land is owned but no beginning land and building inventory value."

If land is owned, a market value was not entered (Screen 5). Land owned may have incorrectly been entered. The above stated possibilities should also be explored.

5. "Building depreciation > 4% of beginning real estate."

Building depreciation is greater than "normally" expected (Screen 5). Check to see if machinery and equipment or livestock depreciation was incorrectly included. Large investments in new buildings may justify depreciation in excess of four percent.

5. "Real estate inventory value added < $0."

Lost capital exceeds the value added from new real estate purchases (Screen 5). At worst, this should be $0. Check to be certain data entry is correct.

LIVESTOCK AND BUSINESS DESCRIPTION

6 & 4. "Number of bulls and other livestock inconsistent with livestock inventory." (When number = 0 and inventory > 0, or number > 0 and inventory = 0)

Data entered on Screens 4 and 6 are inconsistent with respect to other livestock. Check data collected and entered for accuracy.

6. "Milk per cow = n pounds." (When n <8,000 or n >20,000)

Pounds milk sold per cow is outside the "normal" range. Check to see if average cow numbers and pounds of milk sold (Screen 6) are entered correctly. Check butterfat content to see if a non-Holstein herd is being analyzed.

6 &7 . "Milk per worker = n pounds." (When n < 200,000 or n > 900,000)

Milk sold per worker is outside the "normal" range. Check to see if months of labor (Screen 7) and milk sold (Screen 6) are entered correctly.

6 & 4. "Average number of dairy cows at least 25% more than total at end, owned and leased."

Implies a significant reduction in herd size from beginning to end of year which occurred close to year end (Screens 4 and 6). Check to see if this is correct.

6 & 4. "Average number of dairy cows at least 25% less than total at end, owned and leased."

Implies a significant increase in herd size from beginning to end of year which occurred close to year end (Screens 4 and 6). Check to see if this is correct.

6. "Invalid business description."

One or more of the coded business descriptions (Screen 6) are out of acceptable range. Check data entry.

LABOR

7. "Single proprietorship but operator #2 months > 0."

Single proprietorship category was checked on Screen 6, but more than one operator was recorded on Screen 7. A single proprietor in the majority of instances would have only one operator, the other should be reported as family unpaid. An exception to this would be when a second person is significantly involved in the day-to-day management of the business, then this person would be entered as Operator #2.

7. "Operator #N months > 16." (Where N is operator 1 through 6.)

It is possible to have operator months greater than 12 when converting to months of labor based on 230 hours/month (Screen 6). If an operator enters more than 16 months per year they would be working more than 72 hours per week. Check for accuracy.

7 & 13. "Hired labor expense but no hired labor."

Hired labor expense was recorded on Screen 13 but no months of hired labor were recorded on Screen 7. Check to be certain these two entries are consistent. Example: labor hired off farm to repair a roof should be reported as land, building, and fence repair, not as hired labor. If the farm is a partnership or corporation, check the labor inventory against business organization for consistency.

7 & 13. "Hired labor but no hired labor expense."

Hired labor months were recorded on Screen 7 but no expense on Screen 13. These two entries should be consistent. Example: Hired labor was paid with milk, beef or other farm products. Add the value of the products to receipts (Screen 12) and then count it as an expense (Screen 13). If the farm is a partnership or corporation, check the labor inventory against business organization for consistency.

7 & 6. "Partnership or corporation but operator labor is $\leq$ 12 months."

Partnership or corporation operator labor input is "normally" expected to be greater than 12 months. Check to see if labor input (Screen 7) is correct.

LAND AND CROPS

7 & 13. "Land is rented but rental expense = $0."

Land is rented (Screen 7) but real estate rent/lease is $0 (Screen 13). Check to see if this is correct. Example: If land rent is paid with a portion of crop, report that value as a crop sale and as a rent payment.

7. "There are less than two tillable acres per cow."

Land is very limited. Check to see if feed purchases (Screen 13) reflect low levels of farm grown feeds. Check to see if any owned and rented land has been omitted (Screen 7).

8. "Hay crop yield is < 2 or > 4 tons DM per acre. Yield is _____."

Hay crop yield is outside the "normal" range. Check to see if a large number of acres of new seeding were established, poor weather or good weather existed. Also check acres in hay for accuracy (Screen 8).

8. "Corn silage yield is < 2.5 or > 7 tons DM per acre. Yield is _____."

Corn silage yield is outside "normal" range. Check to see if the dry matter coefficient and conversion are correct (Screen 8). Check acres of corn silage (Screen 8) and determine if some acres were not harvested. Check calculation of quantity harvested.

8. "Corn grain yield is < 50 or > 120 bushels per acre. Yield is _____."

Corn grain yield is outside "normal" range. Check to see if moisture conversion and/or bushel conversions were done correctly (Screen 8). Check acres in corn grain and repeat calculations of quantity harvested.

8. "Oat yield is < 40 or > 100 bushels per acre. Yield is _____."

Oat yield is outside the "normal" range. Check to see if oat acreage was reported under grain and production under forage if harvested as oatlage (Screen 8).

8. "Tons DM harvested per cow < 4 or > 12 = _____."

Tons of dry matter harvested is outside "normal" range. Check dry matter harvested calculations, cow numbers, and feed purchases for consistency.

7 & 8. "Tillable land, all acres, does not equal total tillable acres."

Calculations on Screen 7 and Screen 8 are not correct/consistent. Review the data entries for accuracy and recheck your math.

FINANCIAL LEASES

10 & 13. "Leases cattle but no lease expense."

Cattle are leased (Screen 10) but lease expense is $0 (Screen 13). Check to be certain cattle lease is not included with machinery or real estate lease and the cattle are in fact leased, not rented.

10 & 13. "Leases equipment but no lease expense."

Equipment is leased (Screen 10), but lease expense is $0 (Screen 13). Check to see if cattle or real estate lease includes equipment (Screen 13) and if equipment is in fact leased.

10 & 13. "Leases structures but no lease expense."

Structures are leased (Screen 10), but lease expense is $0 (Screen 13). Check to

see if cattle or real estate lease includes equipment (Screen 13) and if equipment is in fact leased.

ASSETS AND LIABILITIES

11 & 12. "Scheduled debt payments > 0.35 of milk sales = _____%."

Scheduled debt payments are 10 percentage points above the average (Screens 11 and 12). Check milk sales and debt payment schedule for accuracy.

11 & 5. "Long-term debt > 0.80 of land and building inventory."

Long-term debt is higher than "normally" expected. Check to see if data is entered correctly (Screen 10). Falling asset values may have contributed to creation of this situation as well as increased borrowing.

11 & 9. "Farm net worth < 0.30 of farm capital. NW = _____."

Farm net worth is lower than normal (Screen 11). Check all calculations for accuracy. Falling asset values and increased borrowing may have contributed.

11 & 6. "Debt per cow > $3,500 = $_____."

Debt per cow is above average. Check for accuracy of data (Screens 6 and 11).

9 & 12. "Accounts receivable < 5% of milk sales."

The December milk check may not have been included as an account receivable (Screen 9). Check to see if all accounts have been included.

9 & 11. "Intermediate term debt > total farm inventory less real estate."

Intermediate term debt is high and, in fact, greater than intermediate term assets (Screens 9 and 11). Check to see if this is correct.

11. "Principal payment exceeds liability."

If no new money was borrowed, the amount of principal paid should not be greater than the beginning year liability amount. Check to make certain the data are accurate.

11A. "Long-term planned payments > long term debt."

Long-term planned payments being greater than long-term debt would be expected to occur only in the last year of the payment schedule. Check all entries for accuracy (Screen 11).

11A. "Intermediate term planned payments > intermediate term debt."

Intermediate term planned payments greater than intermediate term debt would be expected to occur only in the last year of the payment schedule. Check all entries for accuracy (Screen 11).

11B. "Short-term planned payments > 120% of short-term debt."

Short-term planned payments are higher than expected. Check for accuracy of entries (Screen 11).

11B. "Planned reduction of operating debt > operating debt."

This is a definite inconsistency. The reduction in operating debt cannot be greater than the end of year balance (Screen 11). Check to see if interest is included.

11B. "Planned reduction of accounts payable > accounts payable."

This is a definite inconsistency. The reduction in accounts payable cannot be greater than the end of year balance (Screen 11). Check to make certain interest and penalties have not been included.

11. "Liability > 0 but no scheduled payment, liability = $_____."

Liabilities are greater than $0 but scheduled debt payments are $0, indicates that the payments were inadvertently omitted or, in fact, that no payments are scheduled (Screen 11). Check to make certain the data are accurate.

11. "Decrease in _____ liability from beginning to end year does not equal principal paid. Did refinancing occur?"

If no new money was borrowed, the decrease in the liability amount from beginning to end year should equal the amount of principal paid during the year. Check to make certain the data are accurate (Screen 11).

11. "Amount of money borrowed entered (_____) does not equal calculated money borrowed (_____)."

If a value was entered in the "amount of new borrowings" column (Screen 11), it should equal the calculated value for money borrowed. The formula for calculating money borrowed is: (end year liability - beginning year liability) + principal paid. Check to make certain the data are accurate (Screen 11).

RECEIPTS

12 & 6. "Milk price < $11 or > $15. Price = $_____ per cwt."

Milk price is outside the "normal" range. Check to see if pounds of milk sold are under-reported (Screen 6), milk sales (gross) are over-reported (Screen 12) or a non-Holstein herd is being summarized (Screen 6).

12 & 8. "Tillable crop acres per cow > 4, but $0 crop sales."

Tillable crop acres per cow are high (Screen 7) but no crop sales are reported (Screen 12). Check to see if crop yields are low (Screen 8) or inventories of feed and supplies increased (Screen 3).

12. "No dairy cattle sales."

This statement indicates that dairy cattle sales on Screen 12 is blank. Check to see if this was overlooked when gathering data or not entered in the computer.

12. "No dairy calf sales."

This statement indicates that dairy calf sales on Screen 12 is blank. Check to see if this was overlooked when gathering data, not entered in the computer or if in fact all calves were either raised or died and, therefore, no sales existed.

12. "Government receipts, other receipts or miscellaneous receipts > $5,000."

Government receipts, other receipts or miscellaneous receipts are greater than

normally expected. Verify that the entry is correct (Screen 12) and that other receipt categories are not more appropriate.

12. "Gas tax refund in excess of $500."

Gas tax refund is greater than normally expected. Verify that the entry is correct (Screen 12) and that other receipts have not been included here.

12 & 9. "Total change in accounts receivable entered as a receipt does not equal change in accounts receivable entered as an asset."

This indicates a problem in calculation or data entry as these two totals should be equal.

EXPENSES

13. "Hired labor expense < $1,100 or > $2,500 per month, = $_____ per month."

Expenses per month for family paid and hired labor are outside the normal range. Determine if months of labor recorded (Screen 7) and labor expense (Screen 13) are accurate.

13 & 3. "Nondairy feed inventory or expense is >0, but no nondairy livestock in inventory."

The nondairy feed expense and inventory category should include what is fed to beef cattle, horses, chickens, sheep, etc. Check to see that dairy feed was not entered as nondairy feed.

13. "Total accrual (item) expenses are negative."

An accrual expense (Screen 13) would not likely be a negative value. Check the data for accuracy. Values in the column "Cash amount paid" cannot be negative. It is possible to have negative values in the "Change in Acct. Payable" column; however, an offsetting value in "Cash Amt. Paid" calculates to a positive accrual expense. It is possible to have negative values in the "Change in Inventory" column calculated from entries made on page 2, Screen 3. However, this indicates a decrease in that inventory item and, therefore, would be added when calculating the accrual expense.

13 & 5. "Owns farm real estate but pays no taxes."

Farm real estate is owned (Screen 5) but taxes are not reported (Screen 13). Check to see if taxes were paid but not reported, paid by a third party or not paid during the year.

13 & 11. "Farm liabilities > $0 but no interest expense, liabilities = $_____."

Farm liabilities exist (Screen 11), but no interest expense reported (Screen 13). Check to see if special circumstances exist or if interest was in fact not paid during the year.

13 & 11. "Interest expense on Screen 13 does not equal interest payments on Screen 11."

The total farm liability interest (Screen 11) does not equal cash interest expense (Screen 13). Check to see if data was collected and entered correctly. These two totals must be identical.

13 & 10. "Cattle lease expense > $0, but no lease information."

Cattle lease expense is reported (Screen 13), but lease information is missing (Screen 10). Record the information on Screen 13 once the existence of an actual lease has been verified.

13 & 5. "Owns farm real estate but pays no insurance."

Farm real estate is owned (Screen 5) but no insurance expense is reported (Screen 13). Check to see if insurance expense was omitted or is included in other categories. Make certain real estate is owned.

13 & 12. "Personal withdrawals and family expenditures < nonfarm income."

This indicates that the nonfarm income could be subsidizing the farm business and, therefore, the Net Personal Withdrawals from Farm on page 7 of the Business Summary will be negative. Check to be certain this is accurate.

13 & 4. "Expansion livestock per head of additional dairy cattle = $_____."

Check the accuracy of this value. It should be about the average cost of purchased livestock.

13 & 9. "Total change in prepaid expenses entered as an expense ($_____) does not equal the total prepaid expenses change entered as an asset ($_____).

The total change in prepaid expenses in Screen 13 does not equal the total prepaid expenses change in Screen 9. There must be a data acquisition or data entry problem.

13 & 11B. "Total change in accounts payable entered as expense does not equal change in accounts payable entered as liability."

The total change in accounts payable on Screen 11 does not equal the total accounts payable change on Screen 13. There must be a data acquisition or data entry problem.

13, 12 & 6. "Operating cost of producing milk is < $8 or > $12/cwt., = $_____."

The operating cost of producing milk is outside the "normally" expected range. Check all operating expenses and nondairy receipts for accuracy (Screens 12 and 13) as well as total pounds of milk sold (Screen 6).

13,12,7 & 6. "Total cost of producing milk is < $10 or > $16/cwt., = $_____."

The total cost of producing milk is outside the "normal" range. Check all expenses and nondairy receipts, plus interest on equity capital and value of operator's labor and management and unpaid family labor for accuracy (Screens 12, 13, and 7). Also check the total pounds of milk sold for accuracy (Screen 6).

MANAGEMENT PERFORMANCE MEASURES

13 & 12. "Net farm income w/o appreciation = $n." (When n < $10,000 or > $50,000)

Net farm income without appreciation is outside the "normally" expected range. Review receipts and expenses especially accounts payable and receivable, depreciation, and inventory changes for accuracy.

13 & 12. "Net farm income w/appreciation = $n." (When n < $10,000 or >$50,000)

Net farm income with appreciation is outside the "normally" expected range. Review receipts and expenses especially livestock, machinery, and real estate appreciation for accuracy.

13 & 12. "Labor and management income per operator < $0 or > $30,000 = $_____."

Labor and management income is outside "normally" expected range. Review the cash receipts and cash expenses (Screens 12 and 13) and especially inventory adjustments and/or depreciation for real estate, machinery and equipment, livestock, and feed and supplies.

13 & 12. "Grain and concentrate as % milk unusually low or high. Value is n%." (When n < 10% or > 40%)

Feed purchases as a percent of milk sales is outside the "normally" expected range. Check feed purchases (Screen 13) for accuracy, check to see if crop yields are high and/or a large number of crop acres per cow exists.

13 & 12. "Rate of return on equity capital w/o appreciation = n%." (When n $\leq$ 0% or > 10%)

This indicates a rate of return without appreciation outside the "normally" expected range. Check expenses and receipts as well as assets and liabilities for accuracy.

13, 12 & 11. "Cash flow imbalance (error) is > 1% of total cash inflows."

The cash flow imbalance is greater than can be accepted. Check the family withdrawals and family expenditures calculations for accuracy; remember income and social security taxes are considered personal withdrawals and family expenditures. Check principal payments as well as new borrowings for accuracy. Also consider gifts and inheritances as possible sources of discrepancy.

11 & 9. "Debt to asset ratio < 0.3, = _____."

Debt to asset ratio is very low. Check asset values and liabilities for accuracy.

13, 12 & 11. "Cash flow coverage ratio < 0.8 or > 1.2."

Cash flow coverage ratio is outside "normal" range. Check receipt and expense items as well as debt payments made for accuracy.

13, 12 & 11. "Cash inflow = $n, cash outflow = $n, imbalance = $n"

These values are printed for all farms.

<u>CROP EXPENSES</u>

14. "Sum of fertilizer and lime expenses for hay crop and corn is > farm total for all crops."

The allocation of expenses among crops is not accurate (Screen 14). Check the allocations.

14. "Sum of seed and plant expenses for hay crop and corn is > farm total for all crops."

The allocation of expenses among crops is not accurate (Screen 14). Check the allocation.

14. "Sum of spray and other expenses for hay crop and corn is > farm total for all crops."

The allocation of expenses among crops is not accurate (Screen 14). Check the allocations.

14. "Total crop expenses per acre of hay crop is > $150 or < $20, = $_____."

The total crop expense per acre of hay is outside the "normally" expected range (Screen 14). Check the allocation of expenses to hay and compare with yields to see if a deviation is justified. Also check acreage for accuracy.

OTHER

"Farm coded irregular" - A farm is coded irregular when data are incomplete, missing or judged to be inaccurate.

"Farm coded part-time" - A farm is coded part-time when operator months are less than six months and total labor months are less than 12.

"Farm coded renter" - A farm is coded renter when no tillable land is owned or the real estate inventory at end year = 0.

"Farm coded cash-crop" - A farm is coded dairy-cash crop when cash crop sales amounted to more than 10 percent of accrual milk sales.

APPENDIX A

HOW TO COMPLETE DAIRY FARM BUSINESS SUMMARY DATA CHECK-IN FORMS

HOW TO COMPLETE DAIRY FARM BUSINESS SUMMARY DATA CHECK-IN FORMS

Screen 1. Cooperator's Name and Address (page 1)

Fill in the name of the operator(s) of the farm business, the farm name if there is one, the address, and the county's record project in which he or she is participating. Use the list of processing numbers provided by Cornell to assign numbers to new cooperators and to confirm numbers used for continuing cooperators.

Please indicate if a farm is to be coded "irregular" at the top of the check-in form. An "irregular" farm has missing or inaccurate data and will not be included in the county, regional, or state summary.

Worksheet 1. Machinery and Equipment Purchased (page 1)

The only item from this section required to complete a farm business summary is the total machinery and equipment purchased. Worksheet 1 is included to provide a workplace for the operator, manager or managers to calculate this information. If prior to completion of the check-in forms the farm business has an accurate, up-to-date machinery and equipment inventory there is no particular need to copy that information onto Worksheet 1.

If completion of the worksheet is required, list all new or used machinery and equipment acquired during the year and the "boot" amount paid or obligated to pay on each item. List the market value of items traded-in and make the inventory checks in order to substantiate beginning and end inventory values. Check reported capital expenditures with the inventory book for the business. New items should be inventoried at "boot" plus market value of trade-in less first year's depreciation. Loss or increase in market value may occur from date of purchase to year end. Adjust year end value recorded in inventory to represent year end market values of machinery and equipment purchased. Make sure traded items are removed from this year's inventory. Do not include any leased items. We will assume the list of capital purchases and dollar amount reported here are correct and it will take precedence over other lists that may be included in the record.

Worksheet 2. Machinery and Equipment Sold or Destroyed (page 1)

List machinery and equipment that was disposed of by outright sales and items that were destroyed by fire, flood, and other disasters. Do not list items traded-in here. Report insurance received from machinery destroyed and check to see that all dispositions are removed from the end inventory. Add insurance received from machinery destroyed to total machinery and equipment sold and enter the total in Screen 2.

As with the machinery and equipment purchased, only the total machinery and equipment sold (including insurance proceeds) is required to complete a business summary; consequently, if the farm records are complete and accurate, Worksheet 2 is not needed for input and need not be used.

Screen 2. Machinery and Equipment Inventory and Depreciation (page 1)

The information to be collected in this section is required to calculate the ownership costs incurred in maintaining an inventory of owned machinery and equipment and to calculate the increase (or possibly decrease) in the value of the machinery complement resulting from changes in the price level of farm machinery and equipment. The fixed cost of maintaining the equipment inventory is charged as a business expense while machinery appreciation is credited toward the ownership income of the farm business.

Probably the most difficult information to obtain in this section is the beginning and end-of-year inventory. If this cooperator had a business summary the previous year, the end of the year inventory is the beginning of year inventory for this year. The cooperator then must inventory and determine the market value of machinery and equipment as of December 31 of the year for which you are summarizing. Do not include any leased items.

Machinery and equipment purchased and machinery and equipment sold are the totals from Worksheets 1 and 2 discussed above. If an alternative source of complete information for purchases and sales is available, it is not necessary to complete Worksheets 1 and 2.

Machinery and equipment received from "Noncash Transfer to Farm" is entered in Screen 2. Include machinery and equipment received as a gift/inheritance or converted from nonfarm to a farm business asset.

The next item is machinery and equipment depreciation as calculated for tax purposes. This value is used as the charge against the farm business for the use of the machinery and equipment complement. It is obtained by taking 1997 regular tax depreciation, excluding buildings and cattle from ACRS and MACRS depreciation. Including the Section 179 expensing allowance could bias depreciation upward. Excluding it could bias depreciation downward. Include it if used on a regular, ongoing basis. Exclude and convert to annual depreciation if used on an irregular, occasional basis.

End-of-year inventory less the total beginning inventory after changes is equal to machinery appreciation. This value is then used as the contribution toward ownership income from machinery and equipment.

If machinery appreciation appears to be too high or too low given changes in prevailing machinery and equipment prices during the year, one might consider some of the following possible causes:

If change in inventory due to price appears to be too high, check the following possible causes:

a) There are more new items in the inventory book than listed as capital purchases.

b) New items were not depreciated this year or were valued at "list price" rather than at a value based on cost.

c) Trade-ins and other dispositions were not removed from book.

d) Machinery was revalued upward during the year and beginning inventory was not adjusted in the same direction.

If change in inventory due to price appears to be too low, check these possible causes:

a) New items were not all listed in inventory book.

b) Items acquired through trade were not valued correctly.

c) Items no longer in use were removed from end inventory or devaluated without corresponding changes to beginning inventory.

d) Machinery was revalued downward during the year and beginning inventory was not adjusted in the same direction.

Worksheet 3. Grown Feed and Supplies Inventory Worksheet (page 2)

This worksheet is used to calculate the grown feed and supplies (bedding and lumber) inventory at the beginning and end of year. Include only feed and supplies grown or produced by this farmer. Space is provided to enter quantities of the various grown feed and supplies, their market value per unit, and the calculated market value for each grown item. The total values of the grown feed and supplies at beginning and end of year are calculated and entered in the appropriate spaces in Screen 3. The change will be computed and will appear on Screen 12 as a change in crop inventory. Inventory growth will produce a positive change or increase in crop receipts.

If winter wheat is grown, be sure to include in grown feed end-of-year inventory (Worksheet 3) the value of the crop based on the cost incurred in growing it.

Screen 3. Feed and Supply Inventory (page 2)

Report beginning and end market values of purchased feed and supplies in Screen 3. Workspace is provided for the quantity and market value per unit for the purchased feed and supply categories to assist in the calculation of the total value for each item at beginning and end of year. Of course, if an accurate accounting was made for the previous year, the end-of-year inventory should be used for the beginning-of-year inventory for this year. The beginning-of-year data is not optional; it is required.

Purchased dairy grain and concentrate inventory should include the concentrate, minerals, protein, and grain for the dairy herd including heifers, calves, and bulls. Non-dairy feed inventory includes all feed purchased for livestock such as horses, beef cattle, sheep, chickens, etc.

Many year-end purchases made by farmers are payments made for the next year's feed and supplies. The feed or supplies purchased with these payments must be identified to make them legal tax deductions. Therefore, year-end purchases of feed and supplies must be included in inventory (Screen 3), they are not prepaid expenses (Screen 9).

Unused silage bags should be entered as supplies in the "land/bldg./fence" category.

The footnote for Screen 3 explains how inventory changes are computed and their effect on accrual expenses.

Screen 4. Livestock Inventory (page 3)

Report all leased dairy cows at end of year in the space provided. This number will be added to owned dairy cows at end of year when computing debt levels per cow.

For owned livestock, this section is used to obtain information on the inventory of livestock at the beginning and end of the year and to separate the change in inventory during the year into the change (a) that results from changes in numbers and/or quality of livestock and (b) that result from

price changes during the year. The screen is designed to help inventory the livestock by categories. The heifer inventory allows space for three categories: bred heifers, open heifers (six months to breeding), and calves (under six months). The information required is the number and value at the beginning of the year, the number and value at the end of the year using beginning-of-year prices, and the value at the end of the year using end-of-year prices. The value per head columns are calculated. If you prefer, the values per head may be entered and the total value columns will be calculated.

The quantity and value for beginning-of-year inventory can either be taken from last year's end-of-year inventory if accurate information is available or can be calculated based on the livestock on hand and the value per head at the beginning of the year.

The end-of-year inventory is more complex since the livestock numbers at the end of the year need to be valued both at beginning-of-year prices and at end-of-year prices in order to separate the increase in inventory into two parts. Unless large numbers of animals have been purchased of a different quality or the composition of the animals in the group has been altered significantly during the year, the value per head using the beginning-of-year prices is the same as the value per head in the beginning-of-year inventory. Situations which could result in the value per head in the beginning-of-year inventory and the value per head using beginning-of-year prices for the end-of-year inventory being different include: 1) the purchase of a large number of animals of higher quality than those previously in the herd, and 2) the average age of calves in the end inventory being two or three months more than those in the beginning inventory. Finally, the end-of-year inventory at end-of-year prices is the same number of head as for the end-of-year inventory at the beginning-of-year prices times the value per head based on the market price of the livestock on December 31 of the summary year.

Worksheet 4. Land and Buildings Purchases and Sales (page 2)

In this section, only the totals for cost and lost capital of new purchases and capital improvements, and sale price/amount received of capital sales and losses are required. If the cooperator has an accurate record of his or her real estate transactions, these totals can be taken from that record; if the cooperator does not, Worksheet 4 can be used to assist in calculating the totals.

Screen 5. Real Estate Inventory Balance (page 3)

This section must be completed to confirm changes in the market value of real estate during the year.

a) Report the beginning-of-year market value (previous year's end-of-year value) net of estimated sale expenses.

b) Enter the cost of new purchases and capital improvements for land and buildings and subtract lost capital. Value added (the difference between cost of new real estate and lost capital) is that proportion of the new investment that adds to the market value of the farm.

   Enter the value of real estate that has come into the farm business during the year from gifts/inheritances and from conversion of nonfarm real estate to farm real estate.

c) Building depreciation from 1997 tax return is used as an estimate of a total building depreciation charge for the year. Be sure to include depreciation on single purpose

agricultural structures, grain bins, fences, tile, and silos as well as general purpose buildings.

d) Deduct the net sale price of real estate sold. For example, a five acre lot sold for $25,000 with $1,000 of sale expenses and a mortgage of $15,000 held by the seller would be entered as follows:

Real Estate Sold:	*Total sale price*	*$25,000*	
	Sale expenses	*- 1,000*	
	Net sale price		*- $24,000*
	Note/mortgage held by seller	*- 15,000*	
	Net cash amt. rec'd. in 1997	*= 9,000*	

The "note/mortgage held by seller" of $15,000 must be entered as an "Other Nonfarm Asset" in Screen 9, page 6. If the seller is not the mortgage holder, there would be no entry in the "note/mortgage held by seller" space and the "Net cash amount received in 1997" would then equal $24,000.

The calculated value, "net cash amount received in 1997", is a cash inflow to the farm. If part or all of this was converted to nonfarm, include that amount as a "personal withdrawal and family expenditure" in Screen 13B.

e) Beginning market value plus value added from real estate purchased, minus depreciation and the value of sales, equals total beginning value after changes.

f) End-of-year market value (net of estimated sale expenses) less the total beginning value after changes is equal to real estate appreciation.

Screen 6. Livestock and Business Description (page 5)

The average number of cows for the year is a key factor. It can be taken from the DHIA or other herd testing records. It is the average number of cows in the herd each month totaled and divided by 12. It includes dry cows as well as cows in milk. It includes leased cows. It is not an average of beginning and ending inventory numbers. Also report the average number for year of dairy heifers and bulls. If the data are being entered on a computer in the county, enter the work units for other livestock. Use Table 1 of the Micro-DFBS User's Manual as a guide.

Total pounds of milk sold is the total weight reported by the milk plant. Average milk plant test is not used to convert to a 3.5 equivalent. It is used as a reference only.

Check the appropriate item under Production Record, Milking System, Business Type, Milking Frequency, bST Usage, Dairy Housing, and Primary Financial Recordkeeping System.

Under production record, if DHI or Owner-Sampler are checked, enter the 6-digit DHI number. Providing the DHI number allows possible coordination with the Animal Science Department by combining DHI and DFBS data. If DHI data were used, no individual farm data would be identified. Providing the DHI number does not provide DHI or Animal Science people access to DFBS data.

Under milking frequency, check "2x/day" if all cows were milked twice a day for the entire year. Check "3x/day" if all cows were milked three times a day for the entire year. Check "other" if a portion of the herd was milked three or more times a day, or the total herd was milked three or

more times a day for part of the year, or if the total herd was milked more than three times a day for the entire year.

If bST was used in 1997, check the appropriate "% of herd" category. For example, if a dairy farmer started supplementing his cows on November 1, and supplemented 100 percent of the eligible cows in both November and December, he would select option 1, less than or equal to 25 percent. The calculation would be 100% multiplied by 2 months of usage divided by 12 possible months for supplementation in 1997 = 16.7 percent. Eligible cows are defined as those cows that are 64 or more days in milk.

If bST is no longer being used on any of the herd, check "Stopped using in 1997". If bST was never used, check "not used".

Screen 7. Labor Inventory (page 5)

Begin by identifying the operators of the farm. Operators should include all individuals who are integrally involved in the operation and management of the farm business. They are not limited to those who are the owner of a sole proprietorship or are formally a member of a partnership or corporation. In instances where a husband and wife operate and manage the farm as a team both may be included as operators. The labor input of each operator should then be specified in months. In some instances where one or more operators of the farm business have other work occupying their time, such as operating an off-farm enterprise, directing a farm organization or managing of the family; less than 12 months would be appropriate. In order to calculate more accurate labor efficiency factors, operator months greater than 12 are also possible. Convert average weekly operator hours to months using 4.3 weeks/month and 230 hours/month. For example, Operator #1 works, on average, 60 hours per week, which converts to 13.5 months per year:

$$\left(\frac{60 \text{ hours / week x } 4.3 \text{ weeks / month}}{230 \text{ hours / month}}\right) \text{X } 12 \text{ months worked} = 13.5 \text{ full - time months}$$

In addition, for each operator, indicate their age, their years of education, and the estimated value of their management and labor input. This value should be based on what that person could earn in a similar capacity in similar employment. Any farm expenses for labor or perquisities for these operators should be excluded from the labor expenses entered later in the input. This exclusion will probably be most relevant for corporations but may also apply to other businesses.

In addition, the total months of family labor who are paid, the months of family labor not paid, and the total full-time months of hired labor should be recorded. The full-time months can then be totaled and divided by 12 to determine the worker equivalent.

The conversion to full-time, worker-month equivalents is necessary; conversion is not always easy but is very important to an accurate summary. A high school student may provide three months of worker-month equivalent labor during the 10 month school year by working part-time. Convert hourly labor on the basis of 230 hours per month. There are 4.3 weeks in a month. Below is a formula for converting hours per week to full-time months:

$$\text{Full - time months} = \left(\frac{\text{No. hours / week x } 4.3 \text{ weeks / month}}{230 \text{ hours}}\right) \text{X No. months worked}$$

Screen 7. Land Inventory (page 5)

The purpose of this section is to obtain a complete accounting of the owned and rented acreages included as a part of this farm business. First, the tillable acres owned and rented should be entered. Tillable acres should include all acres that normally are cropped, either in row crops, hay crops, or cropland pasture. Pasture acres owned and rented should include all acres of pasture that are not cropland. Nontillable woodland and other acres owned would then be included and the three would add to total acres owned, rented and to the total acres in the farm business.

Screen 8. Tillable Land Use (page 5)

The purpose of this section is to obtain a complete accounting of the tillable acres in the farm business and an accurate record of the cropping program of the farm business. This record is an essential part of the business summary.

The forage crops should be separated into hay, hay crop silage, corn silage, and other forage crops harvested (could include green chop, small grain silage, and sudan/sorghum silage). Enter only the first cut acres for all hay crops on the first line. Find instructions for allocating hay crop acres to pasture below. The measure of production of the roughages is the total tons of dry matter. The intermediate columns of total production and dry matter coefficient are used to assist in calculating the total tons of dry matter. Total production of all hay crops are divided into dry hay and hay crop silage. The total production of corn for grain, oats, and wheat should be reported on a dry bushel equivalent. Worksheet 5 is included on the opposite page for conversion of corn to a dry shelled basis.

Clear seeding acres should be entered under hay unless another crop is grown on those acres and considered the major crop in which case the acres are entered with the major crop. Acres used to grow winter wheat should be entered with the crop grown during the regular growing season.

After the acreages and production of the harvested crop enterprises have been reported, the acres of tillable cropland included in pasture and the acres of idle tillable cropland should be recorded. Check the box next to tillable pasture if rotational grazing or intensive pasture has been used at least three months of the year for the milking herd, changing the paddock at least every three days and more than 30 percent of the forage consumed during the growing season was from grazing. When the same field is used for both hay crop and pasture, allocate the acreage between hay crop and pasture according to its estimated share of dry matter produced from the field. For example; if hay crop silage was harvested from a 20 acre field on May 30th and the field was intensively grazed for the rest of the season, approximately the same quantity of dry matter was grazed as was ensiled. Allocate 10 acres to hay crop and 10 acres to pasture. Do not include pasture production in total production from hay crop.

The total of all of the acres in each of the enterprises should be the total tillable acres. This total should then be compared to the total tillable acres recorded above in the land inventory. Furthermore, if this cooperator was in the summary the previous year and has not had a change in owned or rented acres, the tillable acres should be exactly the same as they were in the previous year.

Screen 9. Farm Family Financial Situation - Assets (page 6)

The assets section of the Farm Family Financial Situation requires entry of all farm and nonfarm assets for beginning and end of year. Total farm inventory is calculated from the previously-entered inventory sections. If a cooperator had a business summary the previous year, the end-year assets are the beginning-year assets for this year.

The x_____x spaces for prepaid expenses indicates optional input; i.e., the entire concept of prepaid expenses may be ignored if you feel it has no significant affect on the profitability of the business. Items that can be inventoried (such as dairy grain, seeds, and fertilizer) should not be included as prepaid expenses; they should be entered in the purchased feed and supply inventory, Screen 3, page 2.

Do not enter negative numbers for "Farm cash, checking & savings". If there is a negative checkbook balance, it should be considered money borrowed and included in operating debt, and a zero entered for farm cash, checking, and savings.

Nonfarm assets for partnerships and corporations should include nonfarm assets of all families in the business or none at all.

Mortgages or notes held from the sale of farm real estate should be included as "Other Nonfarm Assets".

See the footnotes at the bottom of page 6 of the check-in form for further guidelines to completing the assets section.

Screen 10. Financial Leases (page 7)

The purpose of this table is to help calculate the expenses associated with financial leases and to determine the present assets and liabilities for the leased items. Include those items for which the farmer originally had an obligation to make specific payment for more than one year. Do not include items such as: machines rented per hour or day; buildings, equipment and, cattle rented from a family member; payments on purchase contracts.

The total yearly expense is calculated by multiplying the amount of each payment times the number of payments for the year. The total yearly expenses for each item are added to get the total expense for cattle, equipment, and structures. The totals must be entered under expenses on page 13. The total expense for cattle is entered under cattle lease; the total expense for equipment is entered under machine hire, rent and lease; and the total expense for structures is entered under real estate rent/lease.

Enter the number of payments in a full year and the number of payments remaining for each item. From this information present values for assets and liabilities can be computed for the leased items.

Worksheet 6. Changes in Operating Accounts Receivable (page 7)

The purpose of Worksheet 6 is to assist in calculating the changes in operating accounts receivable and to allocate the changes to the appropriate receipt category for entry in Screen 12, page 10. To calculate the correct change in accounts receivable, subtract the beginning of year balance (January 1, 1997) from the end of year balance (December 31, 1997) to get the increase in accounts receivable. Worksheet 6 is designed to produce the right calculation when used correctly.

The total of the column "Balance, December 31, 1997" in Worksheet 6 must equal the value in Screen 9, page 6 for "Accounts Receivable, December 31, 1997". The total of the column "Balance, January 1, 1997" in the worksheet must equal "Accounts Receivable, January 1, 1997" in Screen 9. The totals of the "Change in Account" and "Receipt Category Amount" columns in Worksheet 6 must be equal. They must also equal the total of the column "Change in Accounts

Receivable" in Screen 12, page 10. See the bottom of page 7 of the check-in form for further guidelines to recording changes in accounts receivable.

Screen 11. Farm Family Financial Situation - Liabilities (pages 8 and 9)

The liabilities and debt payments sections of the Farm Family Financial Situation require entry of all liabilities for beginning and end of year, the principal and interest actually paid in 1997, the interest rate at the beginning of 1998, and the planned payments for 1998. If a cooperator had a business summary the previous year, the end-year liabilities are the beginning-year liabilities for this year.

The primary objective in classifying liabilities is to identify the correct term of the loan. Long-term and intermediate term loans will be analyzed separately in the summary. If more liabilities exist than there are lines for, liabilities for the same term may be combined. Do not include leased items, they are entered in Screen 10.

The "Amount of New Borrowings" column is optional input. If the amount of money borrowed in 1997 is entered, this value will be compared to the calculated value for money borrowed ((End year liability - beginning year liability) + principal paid). If the two values do not agree, a diagnostic will be printed. The calculated value for money borrowed will be used in the Annual Cash Flow Statement.

For Farm Credit liabilities, be sure the proceeds amount is entered as the liability (i.e., exclude Farm Credit stock). The amount of Farm Credit stock will be displayed under Intermediate Term Debt. These values are automatically carried over from Farm Credit stock assets entered in Screen 9, page 6.

If refinancing occurred during 1997, use of the "Amount of Debt Refinanced" column will help you arrive at more accurate values for "Amount of New Borrowings" and "Actual 1997 Principal Payments". The amount of the "old" loan refinanced should be entered as a negative number in the "Amount of Debt Refinanced" column. The "new" loan or refinanced amount added to existing loans is entered as a positive number. These entries offset each other; therefore, the total of the "Amount of Debt Refinanced" column would always be zero. The amount of debt refinanced would <u>not</u> be included in the "Amount of New Borrowings" or the "Actual 1997 Principal Payments" columns.

Include debt payments for all liabilities listed. If no payments are made, please enter zero. In the event of a deferred loan (except FmHA), add the interest to the end year liability, enter the interest as paid (under debt payments, Screen 11 and interest expense, Screen 13), and enter the interest amount as money borrowed. Enter the beginning 1998 interest rate and planned payments for 1998. In the case of an FmHA Deferred Loan, the unpaid interest is not converted to principal; therefore, the interest would be included as an account payable.

The total of the farm interest actually paid in 1997 (7th column) should equal the interest expense entered in Screen 13B, page 13.

The "Nonfarm Liability/Payments" line includes debt incurred for all nonfarm assets purchased. For example, if a pleasure boat was purchased using debt capital, record the beginning and end of year nonfarm loan balances, amount of new borrowing for the boat, actual payments made on the boat or any other nonfarm loan during the year, and next year's planned payments. If the farmer prefers not to record nonfarm liabilities, any new nonfarm borrowings must also be excluded from "personal withdrawals and family expenditures" in Screen 13B, page 13.

See the footnotes at the bottom of pages 8 and 9 of the check-in form for additional guidelines to completing this section.

Screen 12. Summary of 1997 Receipts and Changes in Inventory and Accounts Receivable (page 10)

Record the 1997 cash receipts and changes in accounts receivable in Screen 12. The "Change in Inventory" column is calculated by the computer program from entries previously made in Screen 3 (grown feeds inventory) and Screen 4 (livestock inventory) and Screen 11 (advanced government receipts). Use Worksheet 6 on page 7 to assist in the calculation of changes in accounts receivable. The "Accrual Receipts" column is the total of the first three columns.

Enter the amount received for sale of stock and certificates other than Farm Credit stock. This value will be used in the calculation of appreciation of stock and certificates to be included as ownership income.

The section at the bottom of Screen 12 is used to record nonfarm cash inflows. The last line in Screen 12 is for noncash capital transferred to the farm business for cattle, crops, etc., excluding machinery (enter in Screen 2) and real estate (enter in Screen 5).

See the bottom of page 10 of the check-in form for further guidelines to recording the farm and nonfarm receipts.

Worksheet 7. Changes in Operating Accounts Payable (page 12)

The purpose of Worksheet 7 is to assist in calculating the changes in operating accounts payable and to allocate the changes to the appropriate expense category for entry in Screen 13, page 13. If there are no operating accounts payable, do not use the worksheet, go directly to Screen 13 on page 13. When Worksheet 7 is used, enter the end of year balance, then enter the beginning of year balance to obtain the correct change in accounts payable. Assign and allocate changes in accounts payable to the appropriate expense categories using the codes 1-28. Use one worksheet line per code assigned.

The total of the column "Balance 12/31/97" in Worksheet 7 must equal the value in Screen 11, page 9 for "Accounts Payable, December 31, 1997". The total of the column "Balance 1/1/97" in the worksheet must equal the value in Screen 11 for "Accounts Payable, January 1, 1997". The totals of the two "Change in Accounts Payable" columns in Worksheet 7 must be equal. They must also equal the total of the column "Change in Accounts Payable" in Screen 13, page 13. See the bottom of page 12 of the check-in form for further guidelines to recording changes in accounts payable.

Screen 13. Summary of 1997 Expenses and Changes in Inventory and Accounts Payable (page 13)

Record the 1997 cash expenses and changes in accounts payable in Screen 13. Be sure to include as cash expenses any items paid directly by a bank through use of a "line-of-credit". Payment on the "line-of-credit" is a reduction in the account payable to the bank. Use Worksheet 7 on page 12 to assist in the calculation of changes in accounts payable. The "Accrual Expenses" column is the result of cash expenses less changes in inventory or prepaid expenses plus the changes in accounts payable.

The "change in inventory or prepaid expenses" column contains both calculated values and optional input values. The change in inventory items (_ _ _ _ _ spaces) are calculated by the computer program from entries previously made in Screen 3 (purchased feed and supplies inventory). The change in prepaid expense items (x_____x spaces) are optional input (i.e., the entire concept of prepaid expenses may be ignored if you feel it has no significant affect on the profitability of the business). The total change in prepaid expenses must equal the difference between prepaid expense totals in Screen 9, page 6 (end year - beginning year).

Enter the amount spent for purchase of stock and certificates other than Farm Credit stock. This value will be used in the calculation of appreciation of stock and certificates to be included as ownership income.

Enter all personal withdrawals and family expenditures in the space provided at the bottom of Screen 13. Do not skip this entry. It is necessary for the Annual Cash Flow Statement to balance and also for an accurate Cash Flow Coverage Ratio to be calculated. Include all cash withdrawals plus all additional nonfarm expenses paid with farm cash or from farm accounts, e.g., income tax, self-employment tax, life insurance, and wages of corporate owner-operators. Include withdrawals used for nonfarm loan payments, savings, and investments as well as family living expenses. Include borrowed capital used for nonfarm purchases, providing it has been entered as a nonfarm liability in Screen 11, page 9. E.g., if a pleasure boat was purchased using debt capital, in the year of purchase the amount borrowed and any payments made during the year must be included as a family expenditure. If any or all "Nonfarm Cash Income" has been excluded from the value entered in Screen 12, page 10, you must also exclude any family expenses paid from that income.

See page 11 of the check-in form for further guidelines to recording farm expenses.

Screen 14. Optional Input (page 14)

Breakdown of 1997 Crop Expenses by Crop

In most cases it is possible to identify on which crop large purchases of inputs were used. Use field records, and dates and descriptions for large transactions.

Record the breakdown of crop expenses for hay crop, corn, pasture, and other crops in the top section of Screen 14A. The "Total" line at the bottom of the screen must equal the accrual expenses on Screen 13B, page 13, for fertilizer and lime, seeds and plants, and spray and other. Calculate the accrual expense for these three crop expense categories on Screen 13B by totaling "Cash Amount Paid" - "Change in Inventory" + "Change in Accounts Payable". The "Change in Inventory" values are calculated from the beginning and end year inventory values in Screen 3, page 2 (end year minus beginning year = change in inventory).

The computer program will display on Screen 14A the total accrual expenses for the crop expense categories from Screen 13B at the time of data entry. The "All other crops" line will be calculated using the accrual expense totals less the values entered in the first three lines of the screen for hay crop, corn, and pasture.

Unless you have a better basis for allocation, allocate lime expenses proportionately across all crop acres, to allow for the fact that benefits extend to crops grown in future years, not just the first year. Charge fertilizer, chemical, and seed costs to the crop applied to. Of course, fertilizer and chemicals can have carryover effects on future crops as well, but in most cases, it would be impossible to accurately allocate these carryover effects.

Optional Input for Deferred Tax Calculations

A balance sheet including deferred taxes can be printed for those farms that are able to complete this section of Screen 14. It is assumed that (1) farm assets not listed in this section will not significantly influence deferred tax liability, and (2) all gain on machinery and purchased livestock is ordinary gain. Enter tax basis information for assets previously entered in inventory. Operator residences should be included in tax basis for "buildings & improvements" as well as for "operator residences" if it was included in the Real Estate Inventory in Screen 5. Enter market values for operator residences; single purpose livestock structure, silos, and grain bins; and, purchased livestock. Enter proprietorship and partnership information. Spousal partners filing a joint tax return must combine their ownership in one column. The partner's percent share of farm adjusted gross income must include current cattle sales as well as Schedule F net farm profits. The partner's percent ownership of nonfarm assets must be based on only those included in Screen 9.

[1]If you participated in the Dairy Farm Business Summary project last year, there is no need to enter the January 1, 1997 values unless a change needs to be made in the values entered last year.

[2]The sum of machinery inventory, livestock inventory, feed and supplies, and real estate market value for both beginning and end of year. The computer program automatically calculates this entry from earlier input.

[3]Remember to include the January milk check as an account receivable. The amount of accounts receivable at beginning and end of year must agree with the total accounts receivable calculated in Worksheet 6, page 7.

[4]Include any expenses that have been paid for in advance of their use. For example, 1998 rent paid in 1997. The total change in prepaid expenses (end year minus beginning year) must be distributed among the proper expense categories in the "Change in Inventory or Prepaid Expense" column in Screen 13, page 13.

[5]Nonfarm assets for partnerships and corporations should include nonfarm assets of all families in the business or none at all.

Name_____ [Proc. no. _____]

FINANCIAL LEASES

Fill in the following table if you are leasing cattle, equipment, or structures from outside your family or business. Include only formal financial lease agreements; i.e., where there is a scheduled payment commitment. Do not include rent paid here but record it under the appropriate expense category on Screen 13, page 13.

Leased item	Amount of each payment	No. of payments in 1997	Total 1997 expense	SCREEN 10. No. of payments/ full year	SCREEN 10. No. of payments remaining

						Dairy cattle	_____
_____:	$ _____	-	$_____	=	$_____	Dairy calves	_____
						Other livestock	_____
_____:	$ _____	-	$_____	=	$_____	Crops	_____
						Government receipts	_____
_____:	$ _____	-	$_____	=	$_____	Custom mach. work	_____
						Gas tax refunds	_____
TOTAL	$_____	-	$_____	=	$_____	Other: _____	_____
Must agree with:	(Screen 9)		(Screen 9)		(Screen 12)	====equals====>	$_____

Guidelines for Recording Accounts Receivable

1. Identify changes in operating accounts receivable by subtracting beginning from end of year balance (e.g. changes in milk receipts = January 1998 check minus January 1997 check).
2. Assign and allocate changes in accounts receivable to appropriate farm receipts using worksheet or go directly to Screen 12, page 10.
3. The total of the "Change in Accounts Receivable" column must equal "Total Change in Accounts Receivable" in Screen 12, page 10.
4. All accounts receivable should appear as assets on the balance sheet, Screen 9, page 6.

Sale of other stock & certificates (exclude Farm Credit stock)							$_____

Nonfarm Receipts:

Cash income (describe & itemize largest amounts:
.....: $.....; .....: $.....) total = $_____

Cash used in the business from nonfarm capital $_____

Noncash capital transferred to farm business for cattle, crops, etc. (e.g. gifts/inheritances) [excluding machinery (enter Screen 2) & real estate (enter Screen 5)] $_____

[1]End of year (at beginning prices for cattle) minus beginning of year. [2]Use Worksheet 6 on page 7 to calculate. [3]Change in advanced government receipts (beginning year minus end year) calculated from values entered in Screen 11, page 9.

Guidelines for Recording This Year's Receipts

1. Include gross value for pounds of milk sold.
2. Dairy cattle sales include receipts from cull cows and breeding stock. Include bob calf receipts under dairy calves sold.
3. Crop sales include sales of standing and harvested crops and any crop insurance proceeds.
4. Machinery and real estate sales are netted out in the inventory-depreciation calculations and must not be added in with other farm receipts.
5. Itemize and identify miscellaneous receipts of more than $500. Include income from maple product sales and positions such as director of cooperative.
6. Nonfarm cash income from nonfarm work for self and spouse, tax refunds, principal and interest received from prior sale of farm assets, timber sales, gas and oil royalties, gravel sales, income from elected office, and other nonfarm income that is available for debt payments and family living. In some instances, receipts such as timber sales should be classified as farm income; i.e., if the farm operator has actively managed the enterprise and the corresponding expenses are included in Screen 13, page 13. All nonfarm income must be entered for the Annual Cash Flow Statement to balance.
7. Cash used in the business from nonfarm capital is all the rest of the cash flowing into the farm business from outside. Include cash from personal savings accounts, stocks or bonds converted to cash, cash gifts and inheritances.
8. Noncash capital transferred to farm business includes gifts and inheritances of farm assets (excluding machinery & real estate) and the conversion of nonfarm assets to farm assets.

Guidelines for Recording This Year's Expenses on Page 13

1. Enter hired labor expenses separately including wages, social security paid on labor, worker's compensation insurance (net of refunds), unemployment insurance, and privileges purchased for hired labor. Wages paid must be consistent with months of hired labor. Check to see that monthly wages range between $975 and $2,500 per employee. Make sure that wages do not include "draws" to partners or wages of corporate owner-operators for individuals entered as operators in Screen 7, page 5.

2. Dairy grain and concentrate bought should include the concentrate, minerals, protein, and grain purchased during the year for the dairy herd including heifers, calves, and bulls. Dairy roughage includes hay and silage for the dairy herd as well as anhydrous ammonia purchased for silage additive. All feed purchased for livestock such as horses, beef cattle, sheep, etc. should be included in nondairy livestock feed.

3. Include all machinery rent paid and any lease payments on machinery. Include machinery parts and repair expenses as well as insurance and registration for trucks used solely for farm purposes under machinery repairs and farm vehicle expense. Also include expenses for farm share of other vehicles.

4. Milk marketing expenses include government assessments, milk hauling, milk promotion, and coop dues. Do not include capital assessments. Cattle lease expense includes cattle lease payments and cattle rent. Other livestock expenses include DHIC dues and cattle registration.

5. Enter all the town, county, and school taxes paid on farm real estate. Exclude income and self-employment taxes. (Itemize corporate taxes under miscellaneous.) Sales taxes should be capitalized along with cost of improvement.

6. Enter all the fire and farm liability insurance paid on farm property. Exclude life insurance and personal health insurance. Enter employee health insurance under hired labor expense, truck/auto insurance as machinery expense, and crop insurance as other crop expense.

7. Enter the farm share of utility expenses (e.g. electricity, telephone, heating fuel).

8. Include all real estate rent paid and any lease payments on structures. Identify taxes and insurance paid by the rentee as rent. Enter machinery lease payments under machine hire, rent or lease, cattle lease payments under cattle lease expense.

9. Include all interest paid on farm liabilities including finance charges. Make sure interest paid equals total farm interest, column 7, Screen 11, page 8.

10. Miscellaneous expenses should not be large. Include only those items which cannot be identified within another category. Maple product expenses should be entered as miscellaneous.

11. Cattle and other livestock purchased must be divided into those purchased as replacements and those that increase the size of the herd (expansion). Start by assigning the increase in herd size corresponding to changes recorded on Screen 4, page 3.

	=====equals======>	$______

Guidelines for Recording Accounts Payable

1. Identify changes in open operating accounts payable from beginning to end of year. These are accounts established when farm inputs, such as feed, fertilizer, farm supplies, machinery, repairs, and veterinarian services were bought on credit.
2. If there is more than one account per dealer or farm supplier (e.g., feed is purchased from the same supplier as fertilizer), list them separately on the left-hand portion of the worksheet to facilitate easier allocation to farm expense categories.
3. Assign and allocate changes in open operating accounts payable to appropriate farm expenses using the codes 1-28. Totals will be carried over to Screen 13, page 13.
4. When more than one type of farm input is included in a particular open account, allocate to the expense categories using the estimated ratio of farm input actually purchased from the account during the year.
5. The total of the "Change in Accounts Payable" column must equal "Total Change in Accounts Payable" on Screen 13, page 13.
6. If scheduled debt payments were not made, there is likely an increase in accounts payable for "interest". However, if the loan was refinanced and the unpaid amount added to the principal, the interest is considered paid and is reported in Screen 11, pages 8 and 9.
7. All accounts payable should appear as liabilities on the balance sheet, Screen 11B, page 9.

Name_____ [Proc. no. _____]

SUMMARY OF 1997 EXPENSES & CHANGES IN INVENTORY & ACCOUNTS PAYABLE

See page 11 for instructions. SCREEN 13A.

Purchase of other stock & certificates (exclude Farm Credit stock)							$ _____
Nonfarm Cash Expenses							
Personal withdrawals & family expenditures[4]							$ _____

[1]Changes in prepaid expense can be entered in x_____x spaces. Total change in prepaid expense must = the difference between prepaid expense totals in Screen 9, page 6 (end year minus beg. year).

[2]Use Worksheet 7 on page 12 to calculate.

[3]Must calculate for completion of Screen 14, page 14.

[4]Include all cash withdrawals plus all additional nonfarm expenses paid with farm cash or from farm accounts, e.g., income tax, self-employment tax, life insurance and wages of corporate owner-operators. Include withdrawals used for nonfarm loan payments, savings and investments as well as family living expenses. Include borrowed capital used for nonfarm purchases, providing it has been entered as a new nonfarm liability in Screen 11B, page 9. If any or all "Nonfarm Cash Income" has been excluded from the value entered in Screen 12, page 10, you must also exclude any family expenses paid from that income.

APPENDIX C

PROCEDURES FOR CALCULATING COST OF PRODUCING MILK

PROCEDURES FOR CALCULATING COST OF PRODUCING MILK -
1997 DAIRY FARM BUSINESS SUMMARY
FOR HENRY HOLSTEIN

		Example[1]
Total Accrual Operating Expenses	$442,975	
Plus: Expansion Livestock Expense	+ 0	
Accrual Operating Expenses Including Expansion Livestock		$ 442,975
Total Accrual Receipts	$493,075	
Less: Accrual Milk Sales	-435,349	
Accrual Receipts Less Milk Sales		- 57,726
Operating Cost of Producing Milk[2]		$ 385,249
Total Accrual Expenses		$ 486,975
Accrual Receipts Less Milk Sales		- 57,726
Purchased Inputs Cost of Producing Milk[3]		$ 429,249
Total Accrual Expenses		$ 486,975
Family Labor Unpaid		+ 18,600
Value of Operator's Labor & Management		+ 55,000
Real Interest on Equity Capital		+ 19,883
Accrual Receipts Less Milk Sales		- 57,726
Total Cost of Producing Milk[4]		$ 522,732

1 Same example as in "Calculate and Print Farm Summary" section of this publication.

2 Considering only operating costs, this measure shows how you are doing on cost control in "operating" the business. If milk receipts are less than this measure, the farm has serious milk production profitability troubles which must be corrected immediately if the business is to survive.

3 Considering all costs except unpaid family labor and the opportunity cost of operator's labor, management, and equity capital, this measure after being subtracted from milk receipts will show the return from milk production to the above mentioned factors of production. If milk receipts are less than this measure of cost of producing milk, the business has milk production profitability difficulties. If the operating cost of producing milk is less than milk sales, but this measure is more than milk sales, the farm business is contributing to but not totally covering fixed costs. This situation must be corrected for long-run business survival.

4 Considering all costs of producing milk, including the opportunity cost of operator provided inputs, this measure is the best indicator of long-run business survival. On many farms, the total cost of producing milk will be more than milk sales. This does not imply the business is doomed. If milk sales are greater than the previously discussed two measures of cost of milk production, but less than the total cost of producing milk, the business is not returning the total opportunity cost of operator provided inputs. For long-run business survival, farms should strive for milk sales to meet or exceed this cost of producing milk.

APPENDIX D

A LISTING OF DFBS FIELD NAMES

A Listing of DFBS Field Names

The field names below are listed by order of column positions as they appear within each DFBS screen file, from left to right. For each field there is a listing of the DFBS field name and a short description of the variable.

SCREEN 1 DATA: FARM INFORMATION

Field Name	Description
YEAR	Data Year
FARM_NO	Farm Number
OP_NAME	Operator's Name
FARM_NAME	Farm Name
ADDRESS	Farm Address
CITY	City
STATE	State
ZIP	Zip Code
COUNTY	County
PHONE_NO	Phone Number
REG_FARM	Regular Data, "" = No, X = Yes
IRREG_FARM	Irregular or Incomplete Data "" = No, X = Yes
DDP_MEMBR	Dairy Diversion Program, "" = No, X = Yes (1984 & 1985 only)
VERIFIED	Verified Using Verify Procedure, "" = No, X = Yes (obsolete)
CERT_PROD	Certified Milk Producer
CERT_YEAR	Year first became certified

SCREEN 2 DATA: MACHINERY & EQUIPMENT INVENTORY

Field Name	Description
YEAR	Data Year
FARM_NO	Farm Number
MACH_BEG	Beginning Machinery Inventory
MACH_END	Ending Machinery Inventory
MACH_PURCH	Purchased Machinery
MACH_TRANS	Noncash Machinery Transfer to Farm
MACH_SOLD	Machinery Sold
MACH_DEPR	Machinery Depreciation
MACH_ADJ	Total Beginning Machinery Inventory After Changes
MACH_APPRE	Machinery Appreciation

SCREEN 3 DATA. FEED & SUPPLY INVENTORY

Field Name	Description
YEAR	Data Year
FARM_NO	Farm Number
GROWN_BEG	Total Grown Feeds Beginning Inventory
GROWN_END	Total Grown Feeds Ending Inventory
GROWN_CHNG	Total Grown Feeds Inventory Change
GRAIN_BEG	Dairy Grain and Concentrate Beginning Inventory
GRAIN_END	Dairy Grain and Concentrate Ending Inventory
GRAIN_CHNG	Dairy Grain and Concentrate Inventory Change
RUFAGE_BEG	Roughage Beginning Inventory
RUFAGE_END	Roughage Ending Inventory
RUFAGE_CHNG	Roughage Inventory Change
NONDARYBEG	Nondairy Feed Beginning Inventory
NONDARYEND	Nondairy Feed Ending Inventory
NODARYCHNG	Nondairy Inventory Change
PARTS_BEG	Machine Parts Beginning Inventory
PARTS_END	Machine Parts Ending Inventory
PARTS_CHNG	Machine Parts Inventory Change
FUEL_BEG	Fuel, Oil & Grease Beginning Inventory

FUEL_END	Fuel, Oil & Grease Ending Inventory
FUEL_CHNG	Fuel, Oil & Grease Inventory Change
SEMEN_BEG	Livestock Semen Beginning Inventory
SEMEN_END	Livestock Semen Ending Inventory
SEMEN_CHNG	Livestock Semen Inventory Change
VET_BEG	Veterinary Supplies Beginning Inventory
VET_END	Veterinary Supplies Ending Inventory
VET_CHNG	Veterinary Supplies Inventory Change
BEDING_BEG	Bedding Beginning Inventory
BEDING_END	Bedding Ending Inventory
BEDNG_CHNG	Bedding Inventory Change
MLKSUP_BEG	Milking Supplies Beginning Inventory
MLKSUP_END	Milking Supplies Ending Invetory
MLKSP_CHNG	Milking Supplies Inventory Change
BST_BEG	bST Supplements Beginning Inventory
BST_END	bST Supplements End Inventory
BST_CHNG	bST Supplements Inventory Change
OTHLIV_BEG	Other Livestock Supplies Beginning Inventory
OTHLIV_END	Other Livestock Supplies Ending Inventory
OTHLV_CHNG	Other Livestock Supplies Inventory Change
FERT_BEG	Fertilizer & Lime Beginning Inventory
FERT_END	Fertilizer & Lime Ending Inventory
FERT_CHNG	Fertilizer & Lime Inventory Change
SEEDS_BEG	Seeds & Plants Beginning Inventory
SEEDS_END	Seeds & Plants Ending Inventory
SEEDS_CHNG	Seeds & Plants Inventory Change
SPRAY_BEG	Spray and Other Crop Beginning Inventory
SPRAY_END	Spray and Other Crop Ending Inventory
SPRAY_CHNG	Spray and Other Crop Inventory Chnage
LNDBLD_BEG	Land, Building & Fence Beginning Inventory
LNDBLD_END	Land, Building & Fence Ending Inventory
LNDBD_CHNG	Land, Building & Fence Inventory Change
OTHSUP_BEG	Other Supplies Beginning Inventory
OTHSUP_END	Other Supplies Ending Inventory
OTHSP_CHNG	Other Supplies Inventory Change
FEEDSUPBEG	Total Feed and Supplies Beginning Inventory
FEEDSUPEND	Total Feed and Supplies Ending Inventory

SCREEN 4 DATA: LIVESTOCK INVENTORY

Field Name	Description
YEAR	Data Year
FARM_NO	Farm Number
COWS_LEASE	Number of Leased/Rented Dairy Cows at End of Year
COWS_BEG1	Number of Cows on January 1, line 1
COWS_BEG2	Number of Cows on January 1, line 2
COWBEGINV1	Cow Inventory Value on January 1, line 1
COWBEGINV2	Cow Inventory Value on January 1, line 2
CWBG1VALHD	Cow Value Per Head on January 1, line 1
CWBG2VALHD	Cow Value Per Head on January 1, line 2
COWS_END1	Number of Cows as of December 31, line 1
COWS_END2	Number of Cows as of December 31, line 2
COW_BPVAL1	Cow Inventory Value on December 31 at January 1 Prices, line 1
COW_BPVAL2	Cow Inventory Value on December 31 at January 1 Prices, line 2
CWBP1VALHD	Cow Value Per Head on December 31 at January 1 Prices, line 1
CWBP2VALHD	Cow Value Per Head on December 31 at January 1 Prices, line 2
COWENDINV1	Cow Inventory Value on December 31, line 1
COWENDINV2	Cow Inventory Value on December 31, line 2
CWEN1VALHD	Cow Value Per Head on December 31, line 1
CWEN2VALHD	Cow Value Per Head on December 31, line 2
COWS_BEG_T	Total Number of Dairy Cows on January 1

COWBEGINVT	Total Inventory Value of Dairy Cows on January 1
COWS_END_T	Total Number of Dairy Cows on December 31
COW_BPVALT	Cow Inventory Value on December 31 at January 1 Prices
COWENDINVT	Cow Inventory Value on December 31
HEF_BEG1	Number of Bred Heifers on January 1
HEF_BEG2	Number of Open Heifers on January 1
HEF_BEG3	Number of Calves on January 1
HEFBEGINV1	Bred Heifer Inventory Value on January 1
HEFBEGINV2	Open Heifer Inventory Value on January 1
HEFBEGINV3	Calf Inventory Value on January 1
HFBG1VALHD	Bred Heifer Value Per Head on January 1
HFBG2VALHD	Open Heifer Value Per Head on January 1
HFBG3VALHD	Calf Value Per Head on January 1
HEF_END1	Number of Bred Heifers on December 31
HEF_END2	Number of Open Heifers on December 31
HEF_END3	Number of Calves on December 31
HEF_BPVAL1	Bred Heifer Inventory Value on December 31 at January 1 Prices
HEF_BPVAL2	Open Heifer Inventory Value on December 31 at January 1 Prices
HEF_BPVAL3	Calf Inventory Value on December 31 at January 1 Prices
HFBP1VALHD	Bred Heifer Value Per Head on December 31 at January 1 Prices
HFBP2VALHD	Open Heifer Value Per Head on December 31 at January 1 Prices
HFBP3VALHD	Calf Value Per Head on December 31 at January 1 Prices
HEFENDINV1	Bred Heifer Inventory Value on December 31
HEFENDINV2	Open Heifer Inventory Value on December 31
HEFENDINV3	Calf Inventory Value on December 31
HFEN1VALHD	Bred Heifer Value Per Head on December 31
HFEN2VALHD	Open Heifer Value Per Head on December 31
HFEN3VALHD	Calf Value Per Head on December 31
HEF_BEG_TL	Total Number of Heifers on January 1
HEFBEGINVT	Total Inventory Value of Heifers on January 1
HEF_END_T	Total Number of Heifers on December 31
HEF_BPVALT	Total Inventory Value of Heifers on December 31 at January 1 Prices
HEFENDINVT	Total Inventory Value of Heifers on December 31
BULL_BEG1	Number of Bulls or Other Livestock, January 1, line 1
BULL_BEG2	Number of Bulls or Other Livestock, January 1, line 2
BULBEGINV1	Bulls or Other Livestock Inventory Value, January 1, line 1
BULBEGINV2	Bulls or Other Livestock Inventory Value, January 1, line 2
BLBG1VALHD	Bulls or Other Livestock Value Per Head, January 1, line 1
BLBG2VALHD	Bulls or Other Livestock Value Per Head, January 1, line 2
BULL_END1	Number of Bulls or Other Livestock, December 31, line 1
BULL_END2	Number of Bulls or Other Livestock, December 31, line 2
BUL_BPVAL1	Bulls or Other Livestock Inventory Value, Dec. 31@ Jan. 1 Prices, line 1
BUL_BPVAL2	Bulls or Other Livestock Inventory Value, Dec. 31@ Jan. 1 Prices, line 2
BLBP1VALHD	Bulls or Other Livestock Value Per Head, Dec. 31@ Jan. 1 Prices, line 1
BLBP2VALHD	Bulls or Other Livestock Value Per Head, Dec. 31@ Jan. 1 Prices, line 2
BULENDINV1	Bulls or Other Livestock Inventory Value, December 31, line 1
BULENDINV2	Bulls or Other Livestock Inventory Value, December 31, line 2
BLEN1VALHD	Bulls or Other Livestock Value Per Head, December 31, line 1
BLEN2VALHD	Bulls or Other Livestock Value Per Head, December 31, line 2
BULL_BEG_T	Total Number of Bulls or Other Livestock, January 1
BULBEGINVT	Total Inventory Value of Bulls or Other Livestock, January 1
BULL_END_T	Total Number of Bulls or Other Livestock, December 31
BUL_BPVALT	Total Inventory Value of Bulls /Other Livestock, Dec. 31 @ Jan. 1 Prices
BULENDINVT	Total Inventory Value of Bulls or Other Livestock, December 31
LVST_BEG_T	Total Number of Livestock , January 1
LVSTBEGINV	Total Inventory Value of Livestock, January 1
LVST_END_T	Total Number of Livestock, December 31
LVSTBPVALT	Total Inventory Value of Livestock, December 31 at January 1 Prices
LVSTENDINV	Total Inventory Value of Livestock, December 31

SCREEN 5 DATA: REAL ESTATE INVENTORY BALANCE

Field Name	Description
YEAR	Data Year
FARM_NO	Farm Number
RE_BEGINV	Land and Buildings Beginning Market Value
RE_ENDINV	Land and Buildings Ending Market Value
NEW_LAND	New Land Purchased
NEW_BLDG	New Buildings Purchased
LOST_CAP	Lost Capital
VALUE_ADD	Value added (NEW_LAND + NEW_BLDG - LOST_CAP)
RE_TRANS	Noncash Real Estate Transfer to Farm
RE_DEPR	Real Estate Depreciation
RE_NETSALE	Net Sale Price (RE_TOTSALE - RE_SALEXP)
RE_TOTSALE	Total Sale Price of Real Estate Sold
RE_SALEXP	Real Estate Sale Expenses
RE_NOTE	Note or Mortgage Held by Seller
RE_NETCASH	Net Cash Received by Seller (RE_NETSALE - RE_NOTE)
RE_ADJ	Total Beginning Real Estate Value After Changes
RE_APPRE	Real Estate Appreciation (RE_ENDINV - RE_ADJ)
RESOLD_APP	Appreciation on Real Estate Sold (obsolete)

SCREEN 6 DATA: LIVESTOCK & BUSINESS DESCRIPTION

Field Name	Description
YEAR	Data Year
FARM_NO	Farm Number
COW_AVGNO	Average Number of Cows
HEIF_AVGNO	Average Number of Heifers
BULL_AVGNO	Average Number of Bulls
OTHLVST_WU	Average Number of Other Livestock in Work Units
MILK_LBS	Pounds of Milk Sold
BF_PCT	Average Butterfat Percentage (Milk Plant Test)
PROD_REC	Production Record System; 1 = DHI, 2 = O.S., 3 = Other, 4 = None
DHI_NUM	DHI Number if DHI member
MILK_SYS	Milking System; 1 = Bucket and Carry, 2 = Dumping station, 3 = Pipeline, = Herringbone Parlor, 5 = Other
BUS_TYPE	Primary Business type 1 = Single Prop, 2 = Partnership 3 = Corporation
BUSREC_SYS	Primary Financial Recordkeeping System; 1 = ELFAC II, 2 = Account Book, 3= Agrifax Mail-in, 4 = On-Farm Computer, 5 = Other
BARN_TYPE	Dairy Housing; 1 = Stanchion/Tie-Stall, 2 = Freestall, 3 = Combination
MILK_FREQ	Milking Frequency; 1 = 2x/day, 2 = 3x/day, 3 = Other
BST_USE	BST use; 1 = <25%, 2 = 25-75%, 3 = >75%, 4 = Stopped using in analysis year, 5 = Not Used

SCREEN 7 DATA: LABOR AND LAND INVENTORY

YEAR	Data Year
FARM_NO	Farm Number
OPER_MO_1	Full-Time Months Worked by Operator 1
OPER_MO_2	Full-Time Months Worked by Operator 2
OPER_MO_3	Full-Time Months Worked by Operator 3
OPER_MO_4	Full-Time Months Worked by Operator 4
OPER_MO_5	Full-Time Months Worked by Operator 5
OPER_MO_6	Full-Time Months Worked by Operator 6
OPER_AGE_1	Age of Operator 1
OPER_AGE_2	Age of Operator 2
OPER_AGE_3	Age of Operator 3
OPER_AGE_4	Age of Operator 4
OPER_AGE_5	Age of Operator 5
OPER_AGE_6	Age of Operator 6

OPER_ED_1	Years of Education of Operator 1
OPER_ED_2	Years of Education of Operator 2
OPER_ED_3	Years of Education of Operator 3
OPER_ED_4	Years of Education of Operator 4
OPER_ED_5	Years of Education of Operator 5
OPER_ED_6	Years of Education of Operator 6
OP_LABVAL1	Value of Labor and Management of Operator 1
OP_LABVAL2	Value of Labor and Management of Operator 2
OP_LABVAL3	Value of Labor and Management of Operator 3
OP_LABVAL4	Value of Labor and Management of Operator 4
OP_LABVAL5	Value of Labor and Management of Operator 5
OP_LABVAL6	Value of Labor and Management of Operator 6
FAM_PD_MO	Full-Time Number of Month Worked by Family (Paid)
FAMUNPD_MO	Full-Time Number of Month Worked by Family (UnPaid)
HIRED_MO	Full-Time Number of Month Worked by Hired Labor
TOT_MONLBR	Total Number of Full-Time Months Worked
WKR_EQUIV	Total Worker Equivalent Units
CRPACR_OWN	Tillable Acres Owned
CRPACR_RNT	Tillable Acres Rented
CRPACR_TOT	Total Tillable Acres
PASTAC_OWN	Pasture (Nontillable) Acres Owned
PASTAC_RNT	Pasture (Nontillable) Acres Rented
PASTAC_TOT	Total Pasture (NonTillable) Acres
WOODAC_OWN	Woods and other nontillable Acres Owned
WOODAC_RNT	Woods and other nontillable Acres Rented
WOODAC_TOT	Total Woods and other nontillable Acres
ACRES_OWN	Total Acres Owned
ACRES_RNT	Total Acres Rented
ACRES_TOT	Total Acres

SCREEN 8 DATA: TILLABLE LAND USE

YEAR	Data Year
FARM_NO	Farm Number
HAY_ACRES	1st cut Hay Crop Acres
HAY_PROD	Total Production Hay
HAY_DM	Dry Matter Coefficient Hay
HAY_TDM	Total Tons Hay Dry Matter
HCS_PROD	Total Hay Crop Silage Production
HCS_DM	Dry Matter Coefficient of Hay Crop Silage
HCS_TDM	Total Tons Dry Matter of Hay Crop Silage
SILAGE_ACR	Corn Silage Acres
CS_PROD	Total Production of Corn Silage
CS_DM	Dry Matter Coefficient of Corn Silage
CS_TDM	Total Tons Dry Matter of Corn Silage
OTHFOR_ACR	Other Forage Harvested Acres
OTHFR_PROD	Total Other Forage Production
OTHFR_DM	Dry Matter Coefficient of Other Forage
OTHFR_TDM	Total Tons Dry Matter of Other Forage
GRAIN_ACRE	Acres of Corn for Grain
CG_PROD	Total Production of Corn for Grain
TOTFORG_DM	Total Tons of Forage DM Produced
OATS_ACRE	Total Acres of Oats
OATS_PROD	Total Oats Production (dry bu.)
WHEAT_ACRE	Total Acres of Wheat
WHEAT_PROD	Total Wheat Production (dry bu.)
OTHER_ACRE	Total Other Acres
OTHCRP_WU	Total Production Other Crops Work Units
TILPAS_ACR	Total Tillable Pasture Acres
ROT_GRAZE	Rotational Grazing
IDLE_ACRE	Total Idle Acres

TILACR_TOT	Total Tillable Acres

SCREEN 9 DATA: FARM FAMILY FINANCIAL SITUATION - ASSETS

YEAR	Data Year
FARM_NO	Farm Number
TOTINV_BEG	Total Farm Inventory Beginning (Jan 1
TOTINV_END	Total Farm Inventory Ending (Dec 31)
FMCASH_BEG	Farm cash, checking & savings (Jan 1)
FMCASH_END	Farm cash, checking & savings (Dec 31)
ACTREC_BEG	Accounts Receivable (Jan 1)
ACTREC_END	Accounts Receivable (Dec 31)
FCSTK_BEG	Farm Credit Stock (Jan 1)
FCSTK_END	Farm Credit Stock (Dec 31)
OTHSTK_BEG	Other Stock and Certificates (Jan 1)
OTHSTK_END	Other Stock and Certificates (Dec 31)
PPEXP_BEG	Prepaid Expenses (Jan 1)
PPEXP_END	Prepaid Expenses (Dec 31)
FRMAST_BEG	Total Farm Assets (Jan 1)
FRMAST_END	Total Farm Assets (Dec 31)
NFMCASHBEG	Personal cash, checking & savings (Jan 1)
NFMCASHEND	Personal cash, checking & savings (Dec 31)
LIFEINSBEG	Cash Value Life Insurance (Jan 1)
LIFEINSEND	Cash Value Life Insurance (Dec 31)
NFM_RE_BEG	Nonfarm Real Estate (Jan 1)
NFM_RE_END	Nonfarm Real Estate (Dec 31)
AUTO_BEG	Personal Share Auto (Jan 1)
AUTO_END	Personal Share Auto (Dec 31)
NFMSTK_BEG	Nonfarm Stock & Bonds (Jan 1)
NFMSTK_END	Nonfarm Stock & Bonds (Dec 31)
HSEHLD_BEG	Household Furnishings (Jan 1)
HSEHLD_END	Household Furnishings (Dec 31)
OTHNFM_BEG	Other (including mortgages & notes) (Jan 1)
OTHNFM_END	Other (including mortgages & notes) (Dec 31)
TOTNFM_BEG	Total Nonfarm Assets (Jan 1)
TOTNFM_END	Total Nonfarm Assets (Dec 31)
TOTAST_BEG	Total Assets (not including leases) (Jan 1)
TOTAST_END	Total Assets (not including leases) (Dec 31)

SCREEN 10 DATA: FINANCIAL LEASES

YEAR	Data Year
FARM_NO	Farm Number
CATTLE LEASES	
CATLS_AMT1	Amount of each payment for Cattle Lease #1
CATLS_AMT2	Amount of each payment for Cattle Lease #2
CATLS_AMT3	Amount of each payment for Cattle Lease #3
CATNOPMTS1	Number of Payments for Cattle Lease #1 in Current year
CATNOPMTS2	Number of Payments for Cattle Lease #2 in Current year
CATNOPMTS3	Number of Payments for Cattle Lease #3 in Current year
CATLS_EXP1	Total Expenses for Cattle Lease # 1
CATLS_EXP2	Total Expenses for Cattle Lease # 2
CATLS_EXP3	Total Expenses for Cattle Lease # 3
CAT_PAYYR1	Number of Payments per year for Cattle Lease #1
CAT_PAYYR2	Number of Payments per year for Cattle Lease #2
CAT_PAYYR3	Number of Payments per year for Cattle Lease #3
CAT_PAYRM1	Number of payments remaining for Cattle Lease #1
CAT_PAYRM2	Number of payments remaining for Cattle Lease #2
CAT_PAYRM3	Number of payments remaining for Cattle Lease #3

CATLS_EXPT	Total Cattle Lease Expenses for Current Year

EQUIPMENT LEASES

EQPLS_AMT1	Amount of each payment for Equipment Lease #1
EQPLS_AMT2	Amount of each payment for Equipment Lease #2
EQPLS_AMT3	Amount of each payment for Equipment Lease #3
EQ_NOPMTS1	Number of Payments for Equipment Lease #1 in Current year
EQ_NOPMTS2	Number of Payments for Equipment Lease #2 in Current year
EQ_NOPMTS3	Number of Payments for Equipment Lease #3 in Current year
EQPLS_EXP1	Total Expenses for Equipment Lease # 1
EQPLS_EXP2	Total Expenses for Equipment Lease # 2
EQPLS_EXP3	Total Expenses for Equipment Lease # 3
EQP_PAYYR1	Number of Payments per year for Equipment Lease #1
EQP_PAYYR2	Number of Payments per year for Equipment Lease #2
EQP_PAYYR3	Number of Payments per year for Equipment Lease #3
EQP_PAYRM1	Number of payments remaining for Equipment Lease #1
EQP_PAYRM2	Number of payments remaining for Equipment Lease #2
EQP_PAYRM3	Number of payments remaining for Equipment Lease #3
EQPLS_EXPT	Total Equipment Lease Expenses for Current Year

STRUCTURAL LEASES

STRLS_AMT1	Amount of each payment for Structure Lease #1
STRLS_AMT2	Amount of each payment for Structure Lease #2
STRLS_AMT3	Amount of each payment for Structure Lease #3
STRNOPMTS1	Number of Payments for Structure Lease #1 in Current year
STRNOPMTS2	Number of Payments for Structure Lease #2 in Current year
STRNOPMTS3	Number of Payments for Structure Lease #3 in Current year
STRLS_EXP1	Total Expenses for Structure Lease # 1
STRLS_EXP2	Total Expenses for Structure Lease # 2
STRLS_EXP3	Total Expenses for Structure Lease # 3
STR_PAYYR1	Number of Payments per year for Structure Lease #1
STR_PAYYR2	Number of Payments per year for Structure Lease #2
STR_PAYYR3	Number of Payments per year for Structure Lease #3
STR_PAYRM1	Number of payments remaining for Structure Lease #1
STR_PAYRM2	Number of payments remaining for Structure Lease #2
STR_PAYRM3	Number of payments remaining for Structure Lease #3
STRLS_EXPT	Total Structure Lease Expenses for Current Year

SCREEN 11A DATA: FARM FAMILY FINANCIAL SITUATION: LIABILITIES AND DEBT PAYMENTS

YEAR	Data Year

ST_PRIN2	Actual Principal Payments
ST_PRIN3	Actual Principal Payments
ST_INT1	Actual Interest Payments
ST_INT2	Actual Interest Payments
ST_INT3	Actual Interest Payments
ST_INTRAT1	Interest Rate
ST_INTRAT2	Interest Rate
ST_INTRAT3	Interest Rate
ST_PYMT1	Planned Amount of Payments
ST_PYMT2	Planned Amount of Payments
ST_PYMT3	Planned Amount of Payments
ST_PMTYR1	Payments per Year
ST_PMTYR2	Payments per Year
ST_PMTYR3	Payments per Year

Operating Debt (borrowed to buy items entered as expenses)

OPER_DEBT1	Creditors Name
OPER_DEBT2	Creditors Name
OP_BEG1	Amount of Loan (Jan 1)
OP_BEG2	Amount of Loan (Jan 1)
OP_END1	Amount of Loan (Dec 31)
OP_END2	Amount of Loan (Dec 31)
OP_INT1	Actual Interest Payments
OP_INT2	Actual Interest Payments
OP_NETRED1	Planned Net Reduction in Operating Debt
OP_NETRED2	Planned Net Reduction in Operating Debt

Other Liabilities

ACTPAY_BEG	Accounts Payable (Jan 1)
ACTPAY_END	Accounts Payable (Dec 31)
ACTPAY_INT	Actual Interest Payments on Accounts Payable
AP_NETRED	Planned Net Reduction in Accounts Payable
GOVREC_BEG	Advanced Government Receipts (Jan 1)
GOVREC_END	Advanced Government Receipts (Dec 31)
FRMLIB_BEG	Total Farm Liabilities (Jan 1)
FRMLIB_END	Total Farm Liabilites (Dec 31)
FRMTOTPRIN	Total Farm Principal Payments
FRMTOTINT	Total Farm Interest Payments
NFRMDETBEG	Nonfarm Liabilities (Jan 1) without leases
NFRMDETEND	Nonfarm Liabilities (Dec 31) without leases
NF_BORROW	Amount of New Nonfarm Borrowings
NF_PRIN	Actual Nonfarm Principal Payments
NF_INT	Actual Nonfarm Interest Payments
NF_PYMTS	Total Nonfarm Planned Payments
TOTLIB_BEG	Total Liabilities (Jan 1) without leases
TOTLIB_END	Total Liabilities (Dec 31) without leases
TOT_PRIN	Total Actual Principal Payments
TOT_INT	Total Actual Interest Payments

SCREEN 12 DATA: SUMMARY OF RECEIPTS AND CHANGES IN INVENTORY AND ACCOUNTS RECEIVABLE

YEAR	Data Year
FARM_NO	Farm Number
MILK_CASH	Cash Milk Receipts

MILK_CHAR	Change in Milk Accounts Receivable
MILK_ACCRL	Accrual Milk Receipts
CATT_CASH	Cash Cattle Receipts
CATT_CHINV	Change in Dairy Cattle Inventory
CATT_CHAR	Change in Dairy Cattle Accounts Receivable
CATT_ACCRL	Accrual Dairy Cattle Receipts
HEIF_CASH	Cash Heifer Receipts
HEIF_CHAR	Change in Dairy Calves Accounts Receivable
HEIF_ACCRL	Accrual Dairy Calves Receipts
OTHLV_CASH	Cash Other Livestock Receipts
OTHLVCHINV	Change in Other Livestock Inventory
OTHLV_CHAR	Change in Other Livestock Accounts Receivable
OTHLV_ACCL	Accrual Other Livestock Receipts
CROPS_CASH	Cash Crops Receipts
GROWN_CHNG	Change in Grown Feed Inventory
CROPS_CHAR	Change in Crops Accounts Receivable
CROPS_ACCL	Accrual Crop Receipts
GOVRC_CASH	Cash Government Receipts
GOVR_CHINV	Change in Government Receipts Inventory
GOVRC_CHAR	Change in Government Receipts Accounts Receivable
GOVRC_ACCL	Accrual Goverment Receipts
CUSTM_CASH	Cash Custom Machine Work Receipts
CUSTM_CHAR	Change in Custom Machine Work Accounts Receivable
CUSTM_ACCL	Accrual Custom Machine Work Receipts
GASTX_CASH	Cash Gas Tax Refunds
GASTX_CHAR	Change in Gas Tax Refunds Accounts Receivable
GASTX_ACCL	Accrual Gas Tax Refunds
OTHER_CASH	Cash Other Receipts
OTHER_CHAR	Change in Other Receipts Accounts Receivable
OTHER_ACCL	Accrual Other Receipts
TOTCASHREC	Total Cash Receipts
TOT_CHINV	Total Change in Inventory
TOTAL_CHAR	Total Change in Accounts Receivable
TOTACCRECT	Total Accrual Receipts
SALE_STOCK	Sale of Other Stock & Certificates (exclude Farm Credit stock)
NONFARMINC	Nonfarm Cash Income
CASH_TRANS	Cash used in the business from nonfarm capital
NOCASHTRAN	Noncash capital transfeered to farm business for cattle, crops, etc. (e.g. gifts/inheritances)

SCREEN 13 DATA: SUMMARY OF EXPENSES AND CHANGES IN INVENTORY AND ACCOUNTS PAYABLE

YEAR	Data Year
FARM_NO	Farm Number
LABOR_EXP	Hired Labor Cash Expense
LABOR_PP	Hired Labor Change in Inventory or PrePaid Expenses
LABOR_AP	Hired Labor Change in Accounts Payable
LABOR_ACRL	Accrual Hired Labor Expenses
GRAIN_EXP	Dairy Grain & Concentrate Cash Expense Paid
GRAIN_AP	Change in Dairy Grain & Concentrate Accounts Payable
GRAIN_ACRL	Accrual Dairy Grain and Concentrate Expenses
RUFAG_EXP	Cash Dairy Roughage Expenses
RUFAG_AP	Change in Dairy Roughage Accounts Payable
RUFAG_ACRL	Accrual Dairy Roughage Expenses
NODARY_EXP	Cash Nondairy Feed Expenses
NODARY_AP	Change in Nondairy Feed Accounts Payable
NODRY_ACRL	Accrual Nondairy Feed Expenses
MACHRNTEXP	Cash Machine Hire, Rent & Lease Expense
MACHRNT_PP	Change in Prepaid Machine Hire, Rent & Lease Expenses
MACHRNT_AP	Change in Machine Hire, Rent & Lease Accounts Payable
MCHRNTACRL	Accrual Machine Hire, Rent & Lease Expenses

MACHREPEXP	Cash Machine repairs & farm vehicle expenses
MACHREP_AP	Change in Machine Repairs & Farm Vehicle Expenses Accounts Payable
MCHREPACRL	Accrual Machine Repairs & Farm Vehicle Expenses
AUTO_PP	Only <1995 Change in PrePaid Auto Expenses
AUTO_CASH	Only <1995 Cash Auto Expenses
AUTO_AP	Only <1995 Change in Auto Accounts Payable
AUTO_ACRL	Only <1995 Accrual Auto Expenses
FUEL_EXP	Cash Fuel, Oil & Grease Expenses
FUEL_AP	Change in Fuel, Oil & Grease Accounts Payable
FUEL_ACRL	Accrual Fuel, Oil & Grease Expenses
REPLVSTEXP	Cash Replacement Livestock Expenses
REPLVST_PP	Change in Prepaid Replacement Livestock Expenses
REPLVST_AP	Change in Replacement Livestock Accounts Payable
REPLVKACRL	Accrual Replacement Livestock Expenses
BREED_EXP	Cash Breeding Expenses
BREED_AP	Change in Breeding Accounts Payable
BREED_ACRL	Accrual Breeding Expense
VET_EXP	Cash Veterinary & Medicine Expenses
VET_AP	Change in Veterinary & Medicine Accounts Payable
VET_ACRL	Accrual Veterinary & Medicine Expenses
MILKMKTEXP	Cash Milk Marketing Expenses
MILKMKT_PP	Change in PrePaid Milk Marketing Expenses
MILKMKT_AP	Change in Milk Marketing Accounts Payable
MLKMKTACRL	Accrual Milk Marketing Expenses
BEDDINGEXP	Cash Bedding Expenses
BEDDING_AP	Change in Bedding Accounts Payable
BED_ACRL	Accrual Bedding Expenses
MILKSUPEXP	Cash Milking Supplies Expenses
MILKSUP_AP	Change in Milking Supplies Accounts Payable
MLKSUPACRL	Accrual Milking Supplies Expenses
CATTLS_EXP	Cash Cattle Lease Expenses
CATTLES_PP	Change in Prepaid Cattle Lease Expenses
CATTLS_AP	Change in Cattle Lease Accounts Payable
CATLS_ACRL	Accrual Cattle Lease Expenses
CUSTBRDEXP	Cash Custom Boarding Expenses
CUSTBRD_PP	Change in PrePaid Custom Boarding Expenses
CUSTBRD_AP	Change in Custom Boarding Accounts Payable
CSTBRDACRL	Accrual Custom Boarding Expenses
BST_EXP	Cash bST Expenses
BST_AP	Change in bST Accounts Payable
BST_ACRL	Accrual bST Expenses
OTHLVSKEXP	Cash Other Livestock Expenses
OTHLVSK_AP	Change in Other Livestock Accounts Payable
OTHLV_ACRL	Accrual Other Livestock Expenses
FERT_EXP	Cash Fertilizer & Lime Expenses
FERT_AP	Change in Fertilizer & Lime Accounts Payable
FERT_ACRL	Accrual Fertilizer & Lime Accounts Payable
SEEDS_EXP	Cash Seeds & Plants Expenses
SEEDS_AP	Change in Seeds & Plants Accounts Payable
SEEDS_ACRL	Accrual Seeds & Plants Expenses
SPRAY_EXP	Cash Spray Expenses
SPRAY_AP	Change in Spray Accounts Payable
SPRAY_ACRL	Accrual Spray Expenses
BLDG_EXP	Cash Land, Building & Fence Repair Expenses
BLDG_AP	Change in Land, Building & Fence Repair Accounts Payable
BLDG_ACRL	Accrual Land, Building & Fence Repair Expenses
TAXES_EXP	Cash Taxes Expenses
TAXES_PP	Change in Prepaid Taxes
TAXES_AP	Change in Taxes Accounts Payable
TAXES_ACRL	Accrual Taxes Expenses
INSUR_EXP	Cash Insurance Expenses
INSUR_PP	Change in Prepaid Insurance Expenses

INSUR_AP	Change in Insurance Account Payable
INSUR_ACRL	Accrual Insurance Expenses
RENT_EXP	Cash Rent & Lease Expense
RENT_PP	Change in Prepaid Rent & Lease Expenses
RENT_AP	Change in Rent & Lease Accounts Payable
RENT_ACRL	Accrual Rent & Lease Expenses
TELE_EXP	Only <1995 Cash Telephone Expenses
TELE_PP	Only <1995 Change in Prepaid Telephone Expenses
TELE_AP	Only <1995 Change in Telephone Account Payable
TELE_ACRL	Only <1995 Accrual Telephone Expenses
UTIL_EXP	Cash Utilities Expenses
UTIL_PP	Change in Prepaid Utilities Expenses
UTIL_AP	Change in Utilities Accounts Payable
UTIL_ACRL	Accrual Utilities Expenses
INTRST_EXP	Cash Interest Expenses
INTRST_PP	Change in Prepaid Interest Expenses
INTRST_AP	Change in Interest Accounts Payable
INTRSTACRL	Accrual Interest Expenses
MISC_EXP	Cash Miscellaneous Expenses
MISC_AP	Change in Miscellaneous Accounts Payable
MISC_ACRL	Accrual Miscellaneous Expenses
TOTCASHEXP	Total Cash Expenses
TOTEXPCHNG	Total Change in Inventory or Prepaid Expenses
TOTCHNG_AP	Total Change in Accounts Payable
TOTEXPACRL	Total Accrual Expenses
EXPAN_EXP	Cash Expansion Expenses
EXPAN_PP	Change in PrePaid Expansion Expenses
EXPAN_AP	Change in Expansion Accounts Payable
EXPAN_ACRL	Accrual Expansion Expenses
BUY_STOCK	Purchase of other stock & certificates (exclude Farm Credit stock)
PERS_WITH	Personal Withdrawals & Family Expenditures

SCREEN 14 DATA: OPTIONAL INPUT

YEAR	Data Year
FARM_NO	Farm Number

BREAKDOWN OF ACCRUAL CROP EXPENSES BY CROP

HAY_FERT	Accrual Hay Crop Fertilizer and Lime
HAY_SEEDS	Accrual Hay Crop Seeds & Plants
HAY_SPRAY	Accrual Hay Crop Spray and Other Crop Expenses
CORN_FERT	Accrual Corn Fertilizer & Lime
CORN_SEEDS	Accrual Corn Seeds & Plants
CORN_SPRAY	Accrual Corn Spray and Other Crop Expenses
PAST_FERT	Accrual Pasture Fertilizer & Lime
PAST_SEEDS	Accrual Pasture Seeds & Plants
PAST_SPRAY	Accrual Pasture Spray and Other Crop Expenses
OTH_FERT	Accrual All Other Crops Fertilizer & Lime
OTH_SEEDS	Accrual All Other Crops Seeds & Plants
OTH_SPRAY	Accrual All Other Crops Spray and Other Crop Expenses
FERT_ACRL	Accrual Fertilizer & Lime Expenses
SEEDS_ACRL	Accrual Seeds & Plants Expenses
SPRAY_ACRL	Accrual Spray and Other Crop Expenses

OPTIONAL INPUT FOR DEFERRED TAX CALCULATIONS

LVSTK_TAXB	Purchased Livestock Tax Basis
MACH_TAXB	Machinery & Equipment Tax Basis
BLDG_TAXB	Building & Improvements Tax Basis
SINGPURP1	Single Purpose structures etc. %
SINGPURP2	Single Purpose structures etc. $
LAND_TAXB	Land Tax Basis

OPRES_TAXB	Operator Residences Tax Basis
NONFM_TAXB	Nonfarm Assets Tax Basis
OPRES_MKVL	Operator Residences Market Value
SINGPURP3	Single Purpose structures etc. %
SINGPURP4	Single Purpose structures etc. $
LVSK_MKVL1	Purchased Livestock Market Value %
LVSK_MKVL2	Purchased Livestock Market Value $
TAXFILSTAT	Tax Filling Status of Proprietorship
NFINC_OPER	Nonfarm income of operator on which self-employment tax w/paid
TAXFILPRT1	Tax filing status of partner 1
TAXFILPRT2	Tax filing status of partner 2
TAXFILPRT3	Tax filing status of partner 3
TAXFILPRT4	Tax filing status of partner 4
TAXFILPRT5	Tax filing status of partner 5
ADJGROSS1	Percent Share of Farm Adjusted Gross Income Partner 1
ADJGROSS2	Percent Share of Farm Adjusted Gross Income Partner 2
ADJGROSS3	Percent Share of Farm Adjusted Gross Income Partner 3
ADJGROSS4	Percent Share of Farm Adjusted Gross Income Partner 4
ADJGROSS5	Percent Share of Farm Adjusted Gross Income Partner 5
CURRASS1	Percent Ownership of Current Assets Partner 1
CURRASS2	Percent Ownership of Current Assets Partner 2
CURRASS3	Percent Ownership of Current Assets Partner 3
CURRASS4	Percent Ownership of Current Assets Partner 4
CURRASS5	Percent Ownership of Current Assets Partner 5
LVSTKOWN1	Percent Ownership of Livestock Partner 1
LVSTKOWN2	Percent Ownership of Livestock Partner 2
LVSTKOWN3	Percent Ownership of Livestock Partner 3
LVSTKOWN4	Percent Ownership of Livestock Partner 4
LVSTKOWN5	Percent Ownership of Livestock Partner 5
MACHOWN1	Percent Ownership of Machinery Partner 1
MACHOWN2	Percent Ownership of Machinery Partner 2
MACHOWN3	Percent Ownership of Machinery Partner 3
MACHOWN4	Percent Ownership of Machinery Partner 4
MACHOWN5	Percent Ownership of Machinery Partner 5
RE_OWN_1	Percent Ownership of Real Estate Partner 1
RE_OWN_2	Percent Ownership of Real Estate Partner 2
RE_OWN_3	Percent Ownership of Real Estate Partner 3
RE_OWN_4	Percent Ownership of Real Estate Partner 4
RE_OWN_5	Percent Ownership of Real Estate Partner 5
NF_OWN_1	Percent Ownership of Nonfarm Assets Listed Partner 1
NF_OWN_2	Percent Ownership of Nonfarm Assets Listed Partner 2
NF_OWN_3	Percent Ownership of Nonfarm Assets Listed Partner 3
NF_OWN_4	Percent Ownership of Nonfarm Assets Listed Partner 4
NF_OWN_5	Percent Ownership of Nonfarm Assets Listed Partner 5
NFINCPART1	Percent Ownership of Nonfarm Income of operator on which self-employment tax was paid, Partner 1
NFINCPART2	Percent Ownership of Nonfarm Income of operator on which self-employment tax was paid, Partner 2
NFINCPART3	Percent Ownership of Nonfarm Income of operator on which self-employment tax was paid, Partner 3
NFINCPART4	Percent Ownership of Nonfarm Income of operator on which self-employment tax was paid, Partner 4
NFINCPART5	Percent Ownership of Nonfarm Income of operator on which self-employment tax was paid, Partner 5

OTHFRACRE	Other Forage Tons Per Acre
TOTFRACRE	Total Forage Tons Per Acre
CG_ACRE	Corn Grain Bushels Per Acre
OAT_ACRE	Oats Bushels Per Acre
WHT_ACRE	Wheat Bushels Per Acre
CORNFERTAC	All Corn Fertilizer Expense Per Acre
CORNSEEDAC	All Corn Seed Expense Per Acre
CORNSPRAC	All Corn Spray Expense Per Acre
SIL_FERT	Corn Silage Fertilizer Expense Per Tons Dry Matter
SIL_SEEDS	Corn Silage Seed Expense Per Tons Dry Matter
SIL_SPRAY	Corn Silage Spray Expense Per Tons Dry Matter
CG_FERT	Corn Grain Fertilizer Expense Per Dry Shell Bushel
CG_SEEDS	Corn Grain Seed Expense Per Dry Shell Bushel
CG_SPRAY	Corn Grain Spray Expense Per Dry Shell Bushel
HAYFERTACR	Hay Fertilizer Expense Per Acre
HAYSEEDACR	Hay Seed Expense Per Acre
HAYSPRAYAC	Hay Spray Expense Per Acre
HAYFERTTDM	Hay Fertilizer Expense Per Ton Dry Matter
HAYSEEDTDM	Hay Seed Expense Per Ton Dry Matter
HAYSPRYTDM	Hay Spray Expense Per Ton Dry Matter
PASFERTTIL	Pasture Fertilizer Expense Per Tillable Pasture Acre
PASSEEDTIL	Pasture Seed Expense Per Tillable Pasture Acre
PASSPRATIL	Pasture Spray Expense Per Tillable Pasture Acre
PASFERTTOT	Pasture Fertilizer Expense Per Total Pasture Acre
PASSEEDTOT	Pasture Seed Expense Per Total Pasture Acre
PASSPRATOT	Pasture Spray Expense Per Total Pasture Acre
FERT_ACRE	Fertilizer Expense Per Tillable Acre
SEEDS_ACRE	Seed Expense Per Tillable Acre
SPRAY_ACRE	Spray Expense Per Tillable Acre
CRPEXP_ACR	Crop Expense Per Tillable Acre
CORNEXPACR	Corn Crop Expense Per Corn Acre
CSEXP_TDM	Corn Silage Crop Expense Per Ton Dry Matter
CGEXP_BU	Corn Grain Crop Expense Per Dry Shell Bushel
HAYEXPACR	Hay Crop Expense Per Acre
HAYEXPTDM	Hay Crop Expense Per Ton Dry Matter
PASEXPTILL	Pasture Crop Expense Per Tillable Pasture Acre
PASEXPACRE	Pasture Crop Expense Per Total Pasture Acre
MACH_INTST	Interest on Machinery Investment
MACH_COST	Total Machinery Cost
FUEL_ACRE	Fuel Expense Per Tillable Acre

MCHREPACRE	Machinery Repair & Vehicle Expense Per Tillable Acre
MCHRENTACR	Machinery Hire, Rent & Lease Expense Per Tillable Acre
MCHINT_ACR	Machinery Interest Per Tillable Acre
MCHDEP_ACR	Machinery Depreciation Per Tillable Acre
MCHCST_ACR	Machinery Cost Per Tillable Acre
TILACRCOW	Tillable Acres Per Cow
FORACR_COW	Forage Acres Per Cow
FORDM_COW	Harvested Forage Dry Matter Per Cow
COW_CHINV	Cow Change in Inventory without Appreciation
HEF1_CHINV	Bred Heifer Change in Inventory without Appreciation
HEF2_CHINV	Open Heifer Change in Inventory without Appreciation
HEF3_CHINV	Calf Change in Inventory without Appreciation
HEF1APPRE	Bred Heifer Appreciation
HEF2APPRE	Open Heifer Appreciation
HEF3APPRE	Calf Appreciation
COWTOTEND	Total End Cow Numbers, Including Leased Cows
COW_APPRE	Cow Appreciation
MILK_COW	Pounds Milk Sold Per Cow
DARYRECTOT	Total Dairy Receipts
MILKRECCOW	Milk Receipts Per Cow
CATTRECCOW	Cattle Sale Receipts Per Cow
CAFRECCOW	Calf Sale Receipts Per Cow
DARYRECCOW	Total Dairy Receipts Per Cow
MILKRECCWT	Milk Receipts Per Cwt.
CATTRECCWT	Cattle Sale Receipts Per Cwt.
CAFRECCWT	Calf Sale Receipts Per Cwt.
DARYRECCWT	Total Dairy Receipts Per Cwt.
OPCOST_TOT	Operating Cost of Producing Milk
INCOST_TOT	Purchased Inputs Cost of Producing Milk
TOTCOSTPRD	Total Cost of Producing Milk
OPCOST_COW	Operating Cost of Producing Milk Per Cow
INCOST_COW	Purchased Inputs Cost of Producing Milk Per Cow
TOTCST_COW	Total Cost of Producing Milk Per Cow
OPCOST_CWT	Operating Cost of Producing Milk Per Cwt.
INCOST_CWT	Purchased Inputs Cost of Producing Milk Per Cwt.
TOTCST_CWT	Total Cost of Producing Milk Per Cwt.
NFINO_COW	Net Farm Income Without Appreciation Per Cow
NFIWTH_COW	Net Farm Income With Appreciation Per Cow
NFINO_CWT	Net Farm Income Without Appreciation Per Cwt.
NFIWTH_CWT	Net Farm Income With Appreciation Per Cwt.
DARYFEDTOT	Total Purchased Dairy Feed
CONC_COW	Purchased Dairy Grain & Concentrate Expense Per Cow
RUF_COW	Purchased Roughage Expense Per Cow
DARYFEDCOW	Purchased Dairy Feed Expense Per Cow
CONC_CWT	Purchased Dairy Grain and Concentrate per Cwt.
RUF_CWT	Purchased Roughage Expense Per Cow
DARYFEDCWT	Purchased Dairy Feed Expense Per Cwt.
CONCPCTMLK	Purchased Dairy Grain & Concentrate as a % of Milk Receipts
FEEDCRPTOT	Purchased Feed & Crop Expense
FEEDCRPCOW	Purchased Feed & Crop Expense Per Cow
FEEDCRPCWT	Purchased Feed & Crop Expense Per Cwt.
FEEDPCTMLK	Purchased Feed & Crop Expense as a % of Milk Receipts

FIELDS USED IN CALCULATION OF CURRENT PORTION FOR PAGE 4 OF DFBS REPORT, STORED IN OLDCP.DBF

YEAR	Data Year
FARM_NO	Farm Number
LT_BEG1	Long-Term Beginning Year Liability #1
LT_BEG2	Long-Term Beginning Year Liability #2
LT_BEG3	Long-Term Beginning Year Liability #3
LT_BEG4	Long-Term Beginning Year Liability #4
LT_BEG5	Long-Term Beginning Year Liability #5
LT_END1	Long-Term End Year Liability #1
LT_END2	Long-Term End Year Liability #2
LT_END3	Long-Term End Year Liability #3
LT_END4	Long-Term End Year Liability #4
LT_END5	Long-Term End Year Liability #5
IT_BEG1	Intermediate Beginning Year Liability #1
IT_BEG2	Intermediate Beginning Year Liability #2
IT_BEG3	Intermediate Beginning Year Liability #3
IT_BEG4	Intermediate Beginning Year Liability #4
IT_BEG5	Intermediate Beginning Year Liability #5
IT_BEG6	Intermediate Beginning Year Liability #6
IT_BEG7	Intermediate Beginning Year Liability #7
IT_BEG8	Intermediate Beginning Year Liability #8
IT_BEG9	Intermediate Beginning Year Liability #9
IT_END1	Intermediate End Year Liability #1
IT_END2	Intermediate End Year Liability #2
IT_END3	Intermediate End Year Liability #3
IT_END4	Intermediate End Year Liability #4
IT_END5	Intermediate End Year Liability #5
IT_END6	Intermediate End Year Liability #6
IT_END7	Intermediate End Year Liability #7
IT_END8	Intermediate End Year Liability #8
IT_END9	Intermediate End Year Liability #9
CP_LT_BEG	Long-Term Current Portion at Beginning of Year
CP_LT_END	Long-Term Current Portion at End of Year
CP_IT_BEG	Intermediate Current Portion at Beginning of Year
CP_IT_END	Intermediate Current Portion at End of Year
